

Contents

1	Real Numbers, Sequences, and Limits	1
1.1	Terminology and Notation	1
1.1.1	Set Theoretic Terminology and Notation	1
1.1.2	Functions	3
1.2	Real Numbers	7
1.2.1	Rules of Arithmetic	7
1.2.2	The Order Axioms	9
1.2.3	The Number Line	11
1.2.4	The Absolute Value and the Triangle Inequality	12
1.2.5	The Archimedean Property of \mathbb{R}	16
1.2.6	Problems	17
1.3	The Limit of a Sequence	19
1.3.1	The Definition of the Limit of a Sequence	19
1.3.2	The Limits of Combinations of Sequences	24
1.3.3	Problems	29
1.4	The Cauchy Convergence Criterion	30
1.4.1	Basic Facts about Cauchy Sequences	30
1.4.2	Irrational Numbers Are Uncountable	37
1.4.3	Problems	41
1.5	The Least Upper Bound Principle	42
1.5.1	The Least Upper Bound Principle	42
1.5.2	Monotone Sequences	46
1.5.3	Problems	52
1.6	Infinite Limits	53
1.6.1	The Definition of the Infinite Limit	53
1.6.2	Propositions for the Evaluation of Infinite Limits	55
1.6.3	Problems	59
2	Limits and Continuity of Functions	61
2.1	Continuity	61
2.1.1	The Definition of Continuity	61

2.1.2	Uniform Continuity	67
2.1.3	The Continuity of Basic Functions and Their Combinations ..	70
2.1.4	Problems	73
2.2	The Limit of a Function at a Point	75
2.2.1	The Definition of the Limit of a Function	75
2.2.2	Basic Facts about Limits	77
2.2.3	Problems	84
2.3	Infinite Limits and Limits at Infinity	85
2.3.1	Infinite Limits	85
2.3.2	Limits at Infinity	92
2.3.3	Problems	96
2.4	The Intermediate Value Theorem	97
2.4.1	The Extreme Value Theorem	97
2.4.2	The Intermediate Value Theorem	98
2.4.3	The Existence and Continuity of Inverse Functions.....	100
2.4.4	Problems	108
3	The Derivative	109
3.1	The Derivative.....	109
3.1.1	The Definition of the Derivative	109
3.1.2	The Derivative as a Function	114
3.1.3	The Leibniz Notation	116
3.1.4	Higher-Order Derivatives.....	119
3.1.5	Problems	121
3.2	Local Linear Approximations and the Differential	122
3.2.1	Local Linear Approximations	122
3.2.2	The Differential	128
3.2.3	The Traditional Notation for the Differential.....	131
3.2.4	Problems	133
3.3	Rules of Differentiation.....	135
3.3.1	The Power Rule	135
3.3.2	Differentiation is a Linear Operation	136
3.3.3	Product and Quotient Rules	138
3.3.4	The Chain Rule	141
3.3.5	The Derivative of an Inverse Function	143
3.3.6	Problems	147
3.4	The Mean Value Theorem	148
3.4.1	The Proof of the Mean Value Theorem	148
3.4.2	Some Consequences of the Mean Value Theorem	152
3.4.3	Convexity	153
3.4.4	Problems	160
3.5	L'Hôpital's Rule.....	161
3.5.1	Problems	168

4 The Riemann Integral	169
4.1 The Riemann Integral	169
4.1.1 Definition of the Riemann Integral	169
4.1.2 Continuous Functions and Monotone Functions are Integrable	181
4.1.3 Problems	184
4.2 Basic Properties of the Riemann Integral	185
4.2.1 The Integrals of Combinations of Functions	185
4.2.2 Additivity of the Integral with Respect to Intervals	191
4.2.3 Mean Value Theorems for Integrals	193
4.2.4 Problems	196
4.3 The Fundamental Theorem of Calculus	197
4.3.1 The Fundamental Theorem of Calculus: Part 1	197
4.3.2 The Fundamental Theorem: Part 2	204
4.3.3 Problems	209
4.4 The Substitution Rule and Integration by Parts	210
4.4.1 The Substitution Rule for Indefinite Integrals	210
4.4.2 The Substitution Rule for Definite Integrals	213
4.4.3 Integration by Parts for Indefinite Integrals	217
4.4.4 Integration by Parts for Definite Integrals	219
4.4.5 Problems	221
4.5 Improper Integrals: Part 1	222
4.5.1 Improper Integrals on Unbounded Intervals	222
4.5.2 Improper Integrals That Involve Discontinuous Functions	231
4.5.3 Problems	238
4.6 Improper Integrals: Part 2	239
4.6.1 Comparison Tests for Improper Integrals on Unbounded Intervals	239
4.6.2 Comparison Tests for Improper Integrals That Involve Discontinuous Functions	252
4.6.3 Problems	259
5 Infinite Series	261
5.1 Infinite Series of Numbers	261
5.1.1 Definitions	261
5.1.2 Criteria for the Convergence of Infinite Series	266
5.1.3 Problems	274
5.2 Convergence Tests for Infinite Series: Part 1	274
5.2.1 The Ratio Test	275
5.2.2 The Root Test	280
5.2.3 The Integral Test	282
5.2.4 Comparison Tests	289
5.2.5 Problems	293
5.3 Convergence Tests for Infinite Series: Part 2	295
5.3.1 Alternating Series	295

5.3.2	Dirichlet's Test and Abel's Test	300
5.3.3	A Strategy to Test Infinite Series for Convergence or Divergence	306
5.3.4	Problems	310
6	Sequences and Series of Functions	313
6.1	Sequences of Functions	313
6.1.1	The Convergence of Sequences of Functions	313
6.1.2	Some Properties of Uniformly Convergent Sequences	320
6.1.3	Proof of Remark 2	327
6.1.4	Problems	329
6.2	Infinite Series of Functions	330
6.2.1	The Convergence of Series of Functions	330
6.2.2	Tests for the Convergence of Series of Functions	331
6.2.3	Continuity, Integrability, and Differentiability of Sums	337
6.2.4	Problems	337
6.3	Power Series	339
6.3.1	The Convergence of Power Series	340
6.3.2	Termwise Integration and Differentiation of Power Series ...	345
6.3.3	Problems	350
6.4	Taylor Series	351
6.4.1	Taylor's Formula	351
6.4.2	Problems	367
6.5	Another Look at Special Functions	369
6.5.1	The Natural Exponential Function	370
6.5.2	The Natural Logarithm	372
6.5.3	Sine and Cosine	374
Index		381
