

# Contents

<b>Multiscale Analysis as a Central Component of Urban Physics Modeling</b> . . . . .	1
Benoit Beckers	
<b>A Path-Following Method Based on Plastic Dissipation Control</b> . . . . .	29
Boštjan Brank, Andjelka Stanić and Adnan Ibrahimbegovic	
<b>Improved Implicit Immersed Boundary Method via Operator Splitting</b> . . . . .	49
Shang-Gui Cai, Abdellatif Ouahsine, Julien Favier and Yannick Hoarau	
<b>Modelling Wave Energy Conversion of a Semi-submerged Heaving Cylinder</b> . . . . .	67
Shang-Gui Cai, Abdellatif Ouahsine and Philippe Sergeant	
<b>Multiscale Modeling of Imperfect Interfaces and Applications</b> . . . . .	81
S. Dumont, F. Lebon, M.L. Raffa, R. Rizzoni and H. Weleman	
<b>A Stochastic Multi-scale Approach for Numerical Modeling of Complex Materials—Application to Uniaxial Cyclic Response of Concrete</b> . . . . .	123
Pierre Jehel	
<b>Relating Structure and Model</b> . . . . .	161
Ivica Kožar	
<b>Fat Latin Hypercube Sampling and Efficient Sparse Polynomial Chaos Expansion for Uncertainty Propagation on Finite Precision Models: Application to 2D Deep Drawing Process</b> . . . . .	185
Jérémy Lebon, Guénhaël Le Quilliec, Piotr Breitkopf, Rajan Filomeno Coelho and Pierre Villon	

<b>Multiscale Atomistic-to-Continuum Reduced Models for Micromechanical Systems</b> . . . . .	215
Eduard Mareníć and Adnan Ibrahimbegovic	
<b>Inverse Problems in a Bayesian Setting</b> . . . . .	245
Hermann G. Matthies, Elmar Zander, Bojana V. Rosić, Alexander Litvinenko and Oliver Pajonk	
<b>Heterogeneous Materials Models, Coupled Mechanics-Probability Problems and Energetically Optimal Model Reduction</b> . . . . .	287
Rainer Niekamp, Martin Krosche and Adnan Ibrahimbegović	
<b>Modelling of Internal Fluid Flow in Cracks with Embedded Strong Discontinuities</b> . . . . .	315
Mijo Nikolic, Adnan Ibrahimbegovic and Predrag Miscevic	
<b>Reliability Calculus on Crack Propagation Problem with a Markov Renewal Process</b> . . . . .	343
Chrysanthi A. Papamichail, Salim Bouzebda and Nikolaos Limnios	
<b>Multi-scale Simulation of Newtonian and Non-Newtonian Multi-phase Flows.</b> . . . .	379
Juan Luis Prieto	
<b>Numerical Modeling of Flow-Driven Piezoelectric Energy Harvesting Devices</b> . . . . .	399
S. Ravi and A. Zilian	
<b>Comparison of Numerical Approaches to Bayesian Updating</b> . . . . .	427
Bojana Rosić, Jan Sýkora, Oliver Pajonk, Anna Kučerová and Hermann G. Matthies	
<b>Two Models for Hydraulic Cylinders in Flexible Multibody Simulations.</b> . . . .	463
Antti Ylinen, Jari Mäkinen and Reijo Kouhia	

Computational Methods for Solids and Fluids  
Multiscale Analysis, Probability Aspects and Model  
Reduction

Ibrahimbegovic, A. (Ed.)

2016, XII, 493 p. 224 illus. in color., Hardcover

ISBN: 978-3-319-27994-7
