

Contents

Author biographies	VII
Abbreviations	IX
1 Introduction	1
Historical perspective	1
Epidemiology	4
HCV genotypes	5
Modes of transmission and risk factors	7
Economic and social burden	8
References	9
2 The HCV particle and its life cycle	13
The HCV particle	13
The HCV life cycle	14
References	18
3 Clinical features	21
Acute and chronic HCV infection	21
Natural history of chronic HCV infection	22
Clinical manifestations	23
Prognosis and factors affecting disease progression	27
Conclusion	29
References	30
4 Pathophysiology	33
Immune response	33
Molecular mechanisms of liver injury	37
References	45

5	Diagnosis	49
	Screening for chronic HCV infection	49
	Assays for detecting HCV infection	51
	Genotyping HCV	53
	Liver biopsy and histology	53
	Non-invasive tests	56
	Conclusion	57
	References	59
6	Management of HCV infection	61
	Introduction	61
	Goals of therapy	61
	Patient assessment for antiviral therapy	62
	Overview of drugs currently approved for HCV management	64
	Treatment regimens for chronic HCV	67
	Management of acute HCV infection	74
	Management of HIV/HCV coinfection	74
	Management of HCV in other patient groups	75
	Conclusion	75
	References	76
7	Future challenges	79
	References	82

Handbook of Hepatitis C

Goossens, N.; Clément, S.; Negro, F. (Eds.)

2016, XI, 82 p. 19 illus. in color., Softcover

ISBN: 978-3-319-28051-6
