

# Contents

<b>1</b>	<b>What Is Digital Soil Morphometrics and Where Might It Be Going? . . . . .</b>	<b>1</b>
	Edward J. Jones and Alex B. McBratney	
<b>Part I Soil Profile Properties</b>		
<b>2</b>	<b>Quantifying Soil Structure and Porosity Using Three-Dimensional Laser Scanning . . . . .</b>	<b>19</b>
	Daniel R. Hirmas, Daniel Giménez, Edison A. Mome Filho, Matthew Patterson, Kim Drager, Brian F. Platt and Dennis V. Eck	
<b>3</b>	<b>Portable X-Ray Fluorescence (pXRF) for Determining Cr and Ni Contents of Serpentine Soils in the Field . . . . .</b>	<b>37</b>
	Zeng-Yei Hseu, Zueng-Sang Chen, Chen-Chi Tsai and Shih-Hao Jien	
<b>4</b>	<b>In Situ Analysis of Soil Mineral Composition Through Conjoint Use of Visible, Near-Infrared and X-Ray Fluorescence Spectroscopy . . . . .</b>	<b>51</b>
	Edward J. Jones and Alex B. McBratney	
<b>5</b>	<b>The Effect of Soil Moisture and Texture on Fe Concentration Using Portable X-Ray Fluorescence Spectrometers . . . . .</b>	<b>63</b>
	Uta Stockmann, Ho Jun Jang, Budiman Minasny and Alex B. McBratney	
<b>6</b>	<b>Estimating Soil Texture from a Limited Region of the Visible/Near-Infrared Spectrum. . . . .</b>	<b>73</b>
	Elisângela Benedet Silva, Alexandre ten Caten, Ricardo Simão Diniz Dalmolin, André Carnieletto Dotto, Walquiria Chaves Silva and Elvio Giasson	

- 7 Estimating Soil Properties with a Mobile Phone . . . . . 89**  
 Matt Aitkenhead, David Donnelly, Malcolm Coull  
 and Richard Gwatkin

## **Part II Soil Profile Imaging**

- 8 Advances Towards Quantitative Assessments  
 of Soil Profile Properties. . . . . 113**  
 Pierre Roudier, Andrew Manderson and Carolyn Hedley
- 9 Computer Graphics Procedural Modeling of Soil Structure . . . . . 133**  
 Hansoo Kim, Minerva J. Dorantes, Darrell G. Schulze  
 and Bedrich Benes
- 10 Soil Profile Imaging for Estimating the Depth Distributions  
 of Clay, Iron, and Hydrological Conditions of Soils  
 Under Rice in Northern Taiwan . . . . . 145**  
 Shih-Hao Jien, Zeng-Yei Hseu, Chen-Chi Tsai  
 and Zueng-Sang Chen
- 11 Variation of Soil Properties in a Mollisol Profile Wall . . . . . 165**  
 Jenna R. Grauer-Gray and Alfred E. Hartemink
- 12 Mapping a Profile Wall of a Typic Udipsamments  
 from the Central Sands in Wisconsin, USA . . . . . 191**  
 Kabindra Adhikari, Alfred E. Hartemink and Budiman Minasny
- 13 Comparative Analysis of Saturated Hydraulic Conductivity  
 ( $K_{sat}$ ) Derived from Image Analysis of Soil Thin Sections,  
 Pedotransfer Functions, and Field-Measured Methods . . . . . 207**  
 Zamir Libohova, Philip Schoeneberger, Phillip R. Owens,  
 Skye Wills, Doug Wysocki, Candiss Williams and Cathy Seybold

## **Part III Soil Depth Functions**

- 14 Measuring and Modelling Soil Depth Functions. . . . . 225**  
 Budiman Minasny, Uta Stockmann, Alfred E. Hartemink  
 and Alex B. McBratney
- 15 Electrical Conductivity Depth Functions for Delineating  
 Paleosols . . . . . 241**  
 Glenn Borchardt
- 16 Numerical Clustering of Soil Series Using Profile  
 Morphological Attributes for Potato . . . . . 253**  
 Michaël A. Leblanc, Gilles Gagné and Léon E. Parent
- 17 Digital Summaries of Pedon Descriptions . . . . . 267**  
 Stephen Roecker, Jay Skovlin, Dylan Beaudette and Skye Wills

<b>18 Probabilistic Representation of Genetic Soil Horizons . . . . .</b>	<b>281</b>
D.E. Beaudette, P. Roudier and J. Skovlin	
<b>19 Using Soil Depth Functions to Distinguish Dystric from Xanthic Ferralsols in the Landscape . . . . .</b>	<b>295</b>
Helena Saraiva Koenow Pinheiro, Waldir de Carvalho Jr., Cesar da Silva Chagas, Lucia Helena Cunha dos Anjos and Phillip Ray Owens	
<b>20 Comparing Soil C Stocks from Soil Profile Data Using Four Different Methods. . . . .</b>	<b>315</b>
Benito R. Bonfatti, Alfred E. Hartemink and Elvio Giasson	
<b>21 Evaluation of Pedotransfer Equations to Predict Deep Soil Carbon Stock in Tropical Podzols Compared to Other Soils of the Brazilian Amazon Forest. . . . .</b>	<b>331</b>
O.J.R. Pereira, C.R. Montes, Y. Lucas and A.J. Melfi	
 <b>Part IV Digital Soil Morphometrics—Use and Applications</b>	
<b>22 The Next Generation of Soil Survey Digital Products. . . . .</b>	<b>353</b>
Jon Hempel, David Hoover, Robert Long, Erika Micheli, Vincent Lang and Alex McBratney	
<b>23 Digital Soil Morphometrics Brings Revolution to Soil Classification . . . . .</b>	<b>365</b>
Judit Nagy, Adam Csorba, Vince Lang, Marta Fuchs and Erika Micheli	
<b>24 From Profile Morphometrics to Digital Soil Mapping . . . . .</b>	<b>383</b>
José A.M. Demattê	
<b>25 Cone Penetrometers as a Tool for Distinguishing Soil Profiles and Mapping Soil Erosion . . . . .</b>	<b>401</b>
Francisco J. Arriaga, Birl Lowery, Dalvan J. Reinert and Kevin McSweeney	
<b>26 Use of Ground-Penetrating Radar to Determine Depth to Compacted Layer in Soils Under Pasture . . . . .</b>	<b>411</b>
Edwin Muñiz, Richard K. Shaw, Daniel Gimenez, Carey A. Williams and Laura Kenny	
 <b>Part V Summary and Conclusions</b>	
<b>27 Developments in Digital Soil Morphometrics . . . . .</b>	<b>425</b>
Alfred E. Hartemink and Budiman Minasny	
<b>Index . . . . .</b>	<b>435</b>
