

Contents

1	Bivariate Left Fractional Pseudo-Polynomial Monotone Approximation	1
	George A. Anastassiou	
2	Bivariate Right Fractional Polynomial Monotone Approximation ...	19
	George A. Anastassiou	
3	Uniform Approximation with Rates by Multivariate Generalized Discrete Singular Operators	33
	George A. Anastassiou and Merve Kester	
4	Summation Process by Max-Product Operators	59
	Türkan Yeliz Gökçer and Oktay Duman	
5	Fixed Point in a Non-metrizable Space	69
	Abdalla Tallafha and Suad A. Alhihi	
6	Second Hankel Determinant for New Subclass Defined by a Linear Operator	79
	Aisha Ahmed Amer	
7	Some Asymptotics for Extremal Polynomials	87
	Gökalp Alpan, Alexander Goncharov, and Burak Hatinoğlu	
8	Some Differential Subordinations Using Ruscheweyh Derivative and a Multiplier Transformation	103
	Alina Alb Lupaş	
9	Some Results on the Bivariate Laguerre Polynomials	125
	Mehmet Ali Özarslan and Cemaliye Kürt	
10	Inner Product Spaces and Quadratic Functional Equations	137
	Choonkil Park, Won-Gil Park, and Themistocles M. Rassias	
11	Fuzzy Partial Metric Spaces	153
	Fariha Jumaa Amer	

12	Bounded and Unbounded Fundamental Solutions in MAC Models ..	163
	Igor Neygebauer	
13	Schurer Generalization of q-Hybrid Summation Integral Type Operators	179
	İlker Vural, Birol Altın, and İsmet Yüksel	
14	Approximation by q-Baskakov–Durrmeyer Type Operators of Two Variables	195
	İsmet Yüksel, Ülkü Dinlemez, and Birol Altın	
15	Blow Up of Solutions of Second Order Semilinear Parabolic Equations Under Robin Boundary Conditions	211
	Jamila Kalantarova and Mustafa Polat	
16	Functional Inequalities in Fuzzy Normed Spaces	225
	Jung Rye Lee, Reza Saadati, and Dong Yun Shin	
17	Principal Vectors of Matrix-Valued Difference Operators	247
	Yelda Aygar and Murat Olgun	
18	Some Extensions of Preinvexity for Stochastic Processes	259
	Nurgül Okur Bekar, Hande Günay Akdemir, and İmdat İçsan	
19	On One Boundary-Value Problem with Two Nonlocal Conditions for a Parabolic Equation	271
	Olga Danilkina	
20	Neighborhoods of Analytic Functions Associated with Fractional Derivative	289
	Osman Altıntaş	
21	Spectrums of Solvable Pantograph Type Delay Differential Operators for First Order	299
	Zameddin I. Ismailov and Pembe Ipek	
22	Non-commutative Geometry and Applications to Physical Systems ..	313
	Slimane Zaim	
23	The (s, t)-Generalized Jacobsthal Matrix Sequences	325
	Şükran Uygun and Kemal Uslu	
24	Domain Decomposition Approximation Approach for an Elliptic Partial Differential Equation	337
	Tahira Nasreen Buttar and Naila Sajid	
25	Voronovskaja Type Approximation Theorem for q-Szász–Schurer Operators	353
	Tuba Vedi and Mehmet Ali Özarslan	

26	Approximation to Derivatives of Functions by Linear Operators Acting on Weighted Spaces by Power Series Method.....	363
	Emre Taş and Tuğba Yurdakadim	
27	Generalized Iterated Fractional Representation Formulae and Inequalities	373
	George A. Anastassiou	

Computational Analysis

AMAT, Ankara, May 2015 Selected Contributions

Anastassiou, G.A.; Duman, O. (Eds.)

2016, XV, 396 p. 2 illus. in color., Hardcover

ISBN: 978-3-319-28441-5
