

Contents

1	Introduction	1
1.1	The Five Eras of Astronomy	2
1.2	Defining a Survey	3
2	The Naked Eye Era	7
2.1	The Babylonians and the Mul.Apin Tablets	9
2.2	The Greeks: Aristotle, Hipparchus, and Ptolemy	10
2.3	Islamic Astronomy	14
2.4	Chinese Astronomy	16
2.5	Tycho Brahe	17
3	The Telescope Era	21
3.1	Surveying the Solar System	22
3.2	Halley, Flamsteed and Navigation	26
3.3	Messier, Herschel, and Nebulae	29
3.4	Variable Stars and Photometry	32
3.5	Moving Stars	34
3.6	The BD Catalog	35
4	The Photography Era	37
4.1	Carte du Ciel	38
4.2	Harvard Plate Collection	40
4.3	Schmidt Camera Surveys	42
4.4	Harvard Spectroscopic Survey	44
5	Radio Surveys	47
5.1	Jansky and Reber	47
5.2	Post World War II Radio Astronomy	53
5.3	The Big Bang Controversy	54
5.4	Recent Radio Surveys	55
5.5	The Pulsar Discovery Survey	57

5.6	The 21-cm Spectral Line	59
5.7	Molecules in the Milky Way	62
5.8	Searching for ET	65
6	Infrared Surveys	69
6.1	The Caltech TMSS Survey	70
6.2	2MASS and DENIS	73
6.3	The AFGL survey	76
6.4	IRAS	79
6.5	AKARI and WISE	81
6.6	UKIDSS and VISTA	83
6.7	SCUBA-2	85
7	The Cosmic Microwave Background	87
7.1	Discovery of the CMB	87
7.2	COBE	89
7.3	Mapping the Fluctuations in the CMB	91
7.4	The Planck Spacecraft	94
8	Ultraviolet Surveys	97
8.1	TD-1A	99
8.2	GALEX	100
8.3	Extreme Ultraviolet Surveys	101
9	X-ray Surveys	105
9.1	Early Discoveries	105
9.2	UHURU and HEAO-A	108
9.3	Neutron Stars and Black Holes	110
9.4	ROSAT	112
10	Gamma Ray Surveys	117
10.1	Early Surveys	118
10.2	COS-B	119
10.3	Compton and Fermi Satellites	120
10.4	Gamma Ray Bursts	122
10.5	Very High Energy Gamma Rays	124
11	Space Astrometry	129
11.1	Hipparcos	129
11.2	Gaia	132
12	The CCD Era	135
12.1	Sloan Digital Sky Survey	136
12.2	Pan-STARRS	139
12.3	Asteroid Searches	142
12.4	LSST	145

13	Microsurveys	147
13.1	Hubble Deep Fields	147
13.2	The COSMOS Survey	152
13.3	The MACHO Survey	156
13.4	The Kepler Exoplanet Survey	158
14	Accessing Astronomy Surveys	165
	Appendices	167
A.1	Further Reading	167
A.2	Units	168
A.3	Wavelength and Energy	170
A.4	Diffraction Limit	171
A.5	Precession	172
A.6	Stellar Magnitudes	173
A.7	Coordinate Systems	174
A.8	Interstellar Extinction and Reddening	175
A.9	Radiation, Temperature, and Wavelength	176
A.10	Redshift-Age Relationship	178
A.11	Determining the Properties of an Exoplanet	180
	Index	183

Surveying the Skies

How Astronomers Map the Universe

Wynn-Williams, G.

2016, XI, 187 p. 129 illus., 89 illus. in color., Softcover

ISBN: 978-3-319-28508-5
