

Contents

1	Learner-Centered Teaching for Environmental and Sustainability Studies	1
	Loren B. Byrne	
Part I Conceptual Foundations and Frameworks		
2	Which Is Most Sustainable? Using Everyday Objects to Examine Trade-Offs Among the “Three Pillars” of Sustainability.....	31
	Corina McKendry	
3	An Introduction to Systems Thinking Using Plastic Dinosaurs	37
	Laura A. Hyatt	
4	An Introductory Examination of Worldviews and Why They Matter for Environmental and Sustainability Studies	43
	Loren B. Byrne	
5	Building Resilience: Modeling Resilience Concepts Using Legos.....	51
	Courtney E. Quinn and John E. Quinn	
6	Eco-crimes and Eco-redemptions: Discussing the Challenges and Opportunities of Personal Sustainability	57
	Mercedes C. Quesada-Embid	
7	Engaging with Complexity: Exploring the Terrain of Leadership for Sustainability	65
	Matthew Kolan	
8	Discovering Authentic Hope: Helping Students Reflect on Learning and Living with Purpose	73
	Kimberly F. Langmaid	

- 9 Teaching How Scientific Consensus Is Developed Through Simplified Meta-analysis of Peer-Reviewed Literature** 79
Emily S.J. Rauschert

Part II Ecology, Ecosystems and Environmental Management

- 10 Understanding Ecosystems and Their Services Through Apollo 13 and Bottle Models** 89
Carmen T. Agouridis and Tyler M. Sanderson
- 11 Using Soil Organisms to Explore Ecosystem Functioning, Services, and Sustainability**..... 97
Jessica Baum and Rachel Thiet
- 12 Fire, Pollution, and Grazing: Oh My! A Game in Which Native and Invasive Plants Compete Under Multiple Disturbance Regimes**..... 105
Heather E. Schneider and Lynn C. Sweet
- 13 Exploring Trophic Cascades in Lake Food Webs with a Spreadsheet Model** 111
Kyle A. Emery, Jessica A. Gephart, Grace M. Wilkinson, Alice F. Besterman, and Michael L. Pace
- 14 Ants, Elephants, and Experimental Design: Understanding Science and Examining Connections Between Species Interactions and Ecosystem Processes** 117
Christine M. Stracey
- 15 Teaching Lyme Disease Ecology Through a Primary Literature Jigsaw Activity** 123
Jae R. Pasari
- 16 A Fishery Activity to Examine the Tragedy of the Common Goldfish Cracker** 129
Jessa Madosky
- 17 Making Biodiversity Stewardship Tangible Using a Place-Based Approach** 137
Christine Vatovec
- 18 Conservation Triage: Debating Which Species to Save and Why**..... 143
Loren B. Byrne
- 19 Everything Cannot Be Equal: Ranking Priorities and Revealing Worldviews to Guide Watershed Management** 149
Bethany B. Cutts
- 20 Location, Location, Location! Analyzing Residential Development in Environmentally-Fragile Areas**..... 155
Erica A. Morin

Part III Consumption, Economics and Energy

21 Tasting Sustainability: Using Multisensory Activities to Retune Food Preferences	165
Jennifer Gaddis	
22 Relationships Between Consumption and Sustainability: Assessing the Effect of Life Cycle Costs on Market Price.....	173
Madhavi Venkatesan	
23 Business Sustainability and the Triple Bottom Line: Considering the Interrelationships of People, Profit, and Planet	181
Marilyn Smith	
24 A Triple-Bottom-Line Analysis of Energy-Efficient Lighting	187
Timothy Lindstrom and Catherine Middlecamp	
25 Go with the Flow: Analyzing Energy Use and Efficiency in the USA	195
James D. Wagner	
26 Exploring Complexities of Energy Options Through a Jigsaw Activity.....	201
Nathan Hensley	

Part IV Environmental Justice and Pollution

27 Introducing the Conflicting Meanings of “Justice” Using a Candy-Distribution Exercise.....	209
Kate J. Darby	
28 Beyond Band-Aids: Using Systems Thinking to Assess Environmental Justice	215
Meghann Jarchow	
29 Engaging the Empathic Imagination to Explore Environmental Justice	221
Joseph Witt	
30 Helping Students Envision Justice in the Sustainable City.....	227
Joshua Long	
31 Social-Ecological Systems Mapping to Enhance Students’ Understanding of Community-Scale Conflicts Related to Industrial Pollution.....	233
Curt Dawe Gervich	
32 The Skies, the Limits: Assessing the Benefits and Drawbacks of Tighter US Soot Emission Standards.....	239
Sandra L. Cooke	

33 Don't Blame the Trees: Using Data to Examine How Trees Contribute to Air Pollution	245
Patrick W. Crumrine	
 Part V Information Literacy and Communication	
34 Evaluating the Effectiveness of Green Roofs: A Case Study for Literature Research and Critical Thinking	253
Erika Crispo	
35 The Story of Source Reliability: Practicing Research and Evaluation Skills Using "The Story of Stuff" Video	261
J.J. LaFantasie	
36 Critically Evaluating Non-scholarly Sources Through Team-Based Learning	267
Nathan Ruhl	
37 Using the Insight, Question, and Challenge (IQC) Framework to Improve Students' Environmental Communication Skills	273
Seaton Tarrant	
38 Building Students' Communication Skills and Understanding of Environmental and Sustainability Issues Interactively and Cumulatively with Pecha Kucha Presentations	279
Bonnie McBain and Liam Phelan	
39 Engaging in Climate Change Conversations: A Role-Playing Exercise to Cultivate Effective Communication	285
Stephen Siperstein	
40 Writing Letters to the Editor to Promote Environmental Citizenship and Improve Student Writing	293
Andrew J. Schneller	
41 Captioning Political Cartoons from Different Perspectives as a Tool for Student Reflection	301
Katharine A. Owens	
42 Analyzing Nature as a Persuasive Tool in Advertisements	307
Rebecca Duncan	
43 Making and Assessing Art in the Sustainability Classroom	313
Bruno Borsari	
Index	319

Learner-Centered Teaching Activities for Environmental
and Sustainability Studies

Byrne, L.B. (Ed.)

2016, XX, 322 p. 3 illus., Hardcover

ISBN: 978-3-319-28541-2
