

Contents

1	Theoretical Concepts for Single Cluster Imaging	1
1.1	Introduction: X-Ray Imaging of Single Nanoparticles	1
1.2	Propagation, Absorption and Scattering of Light in Matter	4
1.2.1	Wavelength Dependent Response of Matter	5
1.2.2	Scattering from Free and Bound Electrons	7
1.2.3	Scattering from a Spherical Particle	14
1.3	Atoms in Intense XUV Pulses	29
1.3.1	Wavelength Dependent Nonlinear Processes	29
1.3.2	Ionization Properties of Atomic Xenon in the XUV Range	33
1.4	Clusters in Intense Laser Pulses	37
1.4.1	Clusters as Model Systems for Laser–Matter Interaction	37
1.4.2	Properties and Dynamics of a Nanoplasma	39
1.4.3	Rare Gas Clusters in Intense Short-Wavelength Pulses	44
	References	52
2	Experimental Setup	57
2.1	FLASH Free-Electron Laser for Short Wavelength Radiation	57
2.1.1	Basic Principle of a Free-Electron Laser	58
2.1.2	Characteristics of the FLASH FEL	62
2.1.3	Guiding and Focussing Optics for XUV Light	63
2.2	Experiment for Imaging and Ion Spectroscopy of Single Clusters	66
2.2.1	Experimental Layout	67
2.2.2	Cluster Generation	67
2.2.3	Detection of Scattered Light	73
2.2.4	Ion Detection	75
	References	80

3 Results and Discussion: Imaging and Ion Spectroscopy of Single Large Xenon Clusters	83
3.1 Introduction	83
3.2 Measurements in Single-Particle Mode	85
3.2.1 Statistics in Single-Particle Mode	85
3.2.2 Data Acquisition and Processing	86
3.2.3 The Limit of Single Particle Mode: Newton Rings.	87
3.3 Information on Cluster Morphology in Single Cluster	
Scattering Patterns	89
3.3.1 The Shape of Clusters Changing with Size	90
3.3.2 Time Structure of a Pulsed Jet	96
3.4 Ejection of Surface Ions from a Quasi-Neutral Nanoplasma.	102
3.4.1 The Concept of Exposure Power Density (epd)	102
3.4.2 SIMION Simulation of the Bipolar Time-of-Flight Spectrometer.	104
3.4.3 Size Dependent Effects in Kinetic Energy Distributions	109
3.4.4 Recombination Versus Expansion in a Large Dense Nanoplasma	113
3.4.5 Net Charge Versus Charge Separation at the Surface	116
3.5 Fingerprints of a Nanoplasma Shell in Size-Selected Scattering Profiles	121
3.5.1 Modulation in Size-Sorted Scattering Profiles	122
3.5.2 Time-Binning of the Nanoplasma Development.	125
3.5.3 Simulation of Scattering Profiles from Core-Shell Systems	128
3.5.4 Optical Properties of a Dense Xenon Nanoplasma	133
3.5.5 Simulation of Radial Charge State Densities	137
3.5.6 Conclusions for the Scattering Data and Discussion	142
References	143
4 Summary and Outlook	147
References	149
Appendix A: Detector Calibration	151
Appendix B: 1D Monte-Carlo Simulation of Light Penetration	157

Ionization and Plasma Dynamics of Single Large Xenon
Clusters in Superintense XUV Pulses

Rupp, D.

2016, XIV, 161 p. 85 illus., 45 illus. in color., Hardcover

ISBN: 978-3-319-28647-1
