

Contents

1	Paper as a Substrate for Sensors.	1
1.1	Composition and Structure	1
1.2	Advantages and Disadvantages of Paper as an Analytical Substrate	2
1.3	Methods of Fabrication	4
1.4	History of Paper in Analytics	7
1.5	Paper-Based Analytics During the Last Decade	9
1.5.1	Enhanced Sensitivity and Signal Amplification	9
1.5.2	Three-Dimensional Architecture	10
1.5.3	Timing and Valving	11
1.5.4	Detection Methods	12
	References	16
2	Analysis of Glucose, Cholesterol and Uric Acid	25
2.1	Literature Review	25
2.1.1	Importance of Glucose, Cholesterol and Uric Acid	25
2.1.2	Methods of Quantification	27
2.1.3	Quantification of Proteins	34
2.1.4	Enzyme Immobilization on Paper	36
2.1.5	Flow in Paper Matrix	38
2.2	Materials and Methods	40
2.2.1	Reagents and Materials	40
2.2.2	Equipment	40
2.2.3	Substrate	41
2.2.4	Analysis of Glucose, Cholesterol and Uric Acid	42

2.3	Results and Discussion	67
2.3.1	Substrate.	67
2.3.2	Optical Detection.	67
2.3.3	Methods of Enzyme Immobilization on Paper	76
2.3.4	Electrochemical Detection.	92
2.4	Partial Conclusions.	99
	References	102
3	Electronic Tongue Systems for the Analysis of Beverages.	109
3.1	Literature Review.	109
3.1.1	Sensor Arrays	109
3.1.2	Analytical Techniques	111
3.1.3	Signal Processing.	112
3.1.4	Potentiometric Sensors for Electronic Tongue Systems	114
3.1.5	Application of Sensor Arrays.	121
3.1.6	Paper-Based Electronic Tongues	128
3.2	Materials and Methods	133
3.2.1	Reagents and Materials.	133
3.2.2	Equipment	133
3.2.3	Development of Potentiometric Sensors	134
3.2.4	Discrimination of Forged Water Samples	136
3.2.5	Integration of Reference Electrode	140
3.2.6	Discrimination of Beers	143
3.2.7	Minimization of Sample Volume	149
3.2.8	Discrimination of Wines	151
3.2.9	Detection with a Multimeter	154
3.3	Results and Discussion	155
3.3.1	Development of Potentiometric Sensors	155
3.3.2	Discrimination of Forged Water Samples	156
3.3.3	Integration of Reference Electrode	161
3.3.4	Discrimination of Beers	163
3.3.5	Minimization of Sample Volume	171
3.3.6	Discrimination of Wines	172
3.3.7	Detection with Multimeter.	176
3.4	Partial Conclusions.	177
	References	178
	Conclusions.	183

Analysis of Samples of Clinical and Alimentary Interest
with Paper-based Devices

Witkowska Nery, E.

2016, XVII, 184 p. 83 illus., 80 illus. in color., Hardcover

ISBN: 978-3-319-28671-6
