

Contents

| | | |
|-----------------------------------------|----------------------------------------------|-----------|
| 1 | Introduction. | 1 |
| 1.1 | Motivation and Background. | 1 |
| 1.2 | Mathematical Descriptions and Basic Concepts | 3 |
| 1.3 | Practical Examples | 6 |
| 1.3.1 | Solar Thermal Receiver. | 6 |
| 1.3.2 | Samuelson's Multiplier-Accelerator Model. | 8 |
| 1.3.3 | NASA F-8 Test Aircraft | 9 |
| 1.3.4 | Networked Control Systems. | 11 |
| 1.4 | Literature Review. | 14 |
| 1.4.1 | Ideal TPs. | 14 |
| 1.4.2 | Uncertain TPs | 16 |
| 1.4.3 | Partially Unknown TPs | 17 |
| 1.4.4 | Piecewise Homogeneous TPs. | 18 |
| 1.4.5 | Memory TPs | 18 |
| 1.5 | Organization of the Book | 19 |
| Part I Partially Unknown TPs | | |
| 2 | Stability and Stabilization. | 23 |
| 2.1 | Problem Formulation | 23 |
| 2.2 | Stability | 26 |
| 2.2.1 | Continuous-Time Systems | 26 |
| 2.2.2 | Discrete-Time Systems | 30 |
| 2.3 | Stabilization | 33 |
| 2.3.1 | Continuous-Time Systems | 33 |
| 2.3.2 | Discrete-Time Systems | 35 |
| 2.4 | Numerical Examples. | 38 |
| 2.5 | Summary | 44 |

| | | |
|----------|----------------------------------------|----|
| 3 | H_∞ Filtering | 45 |
| 3.1 | Problem Formulation | 45 |
| 3.2 | H_∞ Filtering | 47 |
| 3.2.1 | H_∞ Filtering Analysis | 47 |
| 3.2.2 | H_∞ Filter Design | 51 |
| 3.3 | Numerical Example | 53 |
| 3.4 | Summary | 56 |
| 4 | Time-Delay Systems Case | 57 |
| 4.1 | Problem Formulation | 58 |
| 4.2 | Stability and Stabilization | 59 |
| 4.3 | Numerical Example | 67 |
| 4.4 | Summary | 70 |
| 5 | Composite TPs Case | 71 |
| 5.1 | Introduction | 71 |
| 5.2 | Problem Formulation | 73 |
| 5.3 | Stability | 75 |
| 5.4 | Numerical Examples | 81 |
| 5.5 | Summary | 85 |

Part II Piecewise Homogeneous TPs

| | | |
|----------|----------------------------------------------|-----|
| 6 | H_∞ Control | 89 |
| 6.1 | Nondeterministic Variations | 90 |
| 6.1.1 | Arbitrary Variation | 90 |
| 6.1.2 | Average Dwell Time Variation | 95 |
| 6.2 | Stochastic Variation | 105 |
| 6.2.1 | Problem Formulation | 105 |
| 6.2.2 | Stochastic Variation | 107 |
| 6.2.3 | A Unified Framework | 109 |
| 6.3 | Systems with Saturation | 111 |
| 6.3.1 | Problem Formulation | 111 |
| 6.3.2 | H_∞ Performance Analysis | 114 |
| 6.3.3 | H_∞ Output Feedback Controller Design | 118 |
| 6.4 | Numerical Examples | 122 |
| 6.5 | Summary | 133 |
| 7 | Classical and Resilient Filtering | 135 |
| 7.1 | Classical H_∞ Filter | 136 |
| 7.1.1 | Problem Formulation | 136 |
| 7.1.2 | Error Performance Analysis | 138 |
| 7.1.3 | A Unified Framework | 141 |
| 7.1.4 | Filter Design | 144 |

| | | |
|-----------------------------|------------------------------------------------------------------------|------------|
| 7.2 | Resilient H_∞ Filtering | 145 |
| 7.2.1 | Preliminaries | 145 |
| 7.2.2 | Error Performance Analysis | 151 |
| 7.2.3 | Filter Design | 160 |
| 7.3 | Numerical Examples | 163 |
| 7.4 | Summary | 170 |
| 8 | H_∞ Model Reduction | 173 |
| 8.1 | Problem Formulation | 173 |
| 8.2 | H_∞ Model Error Performance | 176 |
| 8.2.1 | Type I: Arbitrary Variation | 176 |
| 8.2.2 | Type II: Stochastic Variation | 177 |
| 8.2.3 | A Unified Framework | 179 |
| 8.3 | H_∞ Reduced-Order Model Design | 181 |
| 8.4 | Numerical Example | 183 |
| 8.5 | Summary | 184 |
| Part III Memory TPs | | |
| 9 | σ-Error Stability and Stabilization | 189 |
| 9.1 | Problem Formulation | 189 |
| 9.2 | Main Results | 192 |
| 9.3 | Numerical Examples | 198 |
| 9.4 | Summary | 204 |
| 10 | Time-Varying Lyapunov Function Approach | 207 |
| 10.1 | Problem Formulation | 207 |
| 10.2 | Stability and Stabilization | 210 |
| 10.3 | Numerical Examples | 219 |
| 10.4 | Summary | 224 |
| 11 | Nonlinear Systems Case | 225 |
| 11.1 | Problem Formulation | 225 |
| 11.2 | Stability and Stabilization | 229 |
| 11.3 | Numerical Examples | 240 |
| 11.4 | Summary | 248 |
| References | | 249 |
| Index | | 261 |

Analysis and Design of Markov Jump Systems with
Complex Transition Probabilities

Zhang, L.; Yang, T.; Shi, P.; Zhu, Y.

2016, XVI, 263 p. 47 illus., 39 illus. in color., Hardcover

ISBN: 978-3-319-28846-8
