Part I Control and Supervision for Complex Networks and Systems

1	Diagnosis for Control and Decision Support for Autonomous Vehicles.	3
	Mogens Blanke, Søren Hansen and Morten Rufus Blas	
1.1	Introduction	4
1.2	Graph-Based Analysis	5
1.2.1	Reconfigurability and Safety.	6
1.2.2	Subsystem Services	6
1.2.3	Service at System Level.	7
1.2.4	Availability and Safety	8
1.2.5	Structure Graph	9
1.2.6	Constraints	9
1.2.7	Variables	9
1.2.8	Matching and Results	10
1.2.9	Active Isolation	11
1.2.10	Analysis of Scenarios with Multiple Faults.	11
1.3	Design Procedure Based on Analysis of Behavioural Relations	12
1.3.1	Tools for Analysis of System Structure Properties	12
1.3.2	Transformation to Signal Space and Analysis	13
1.3.3	Robust Residuals	15
1.3.4	Evaluation of Residuals	15
1.4	Aeroplane Diagnosis and Fault Handling	16
1.4.1	Airspeed Sensor Problem	16
1.4.2	Model for Diagnosis	17
1.4.3	Signal Analysis.	19
1.4.4	Change Detection	20
1.4.5	Results.	23

1.5	Fault-Tolerant Guidance Using Vision	23
1.5.1	Modelling the Natural Environment	25
1.5.2	Stereo Camera	26
1.5.3	Robust Stereo Enhancement by Texture	26
1.5.4	Texton Labelling	27
1.5.5	Structural Model	29
1.5.6	Residuals for Fault Diagnosis	29
1.5.7	Field Tests	30
1.5.8	Control	32
1.6	Conclusions	33
	References	33
2	Integration of Supervisory Control Synthesis in Model-Based Systems Engineering	39
	Jos C.M. Baeten, Joanna M. van de Mortel-Fronczak and Jacobus E. Rooda	
2.1	Introduction	39
2.2	Overview	41
2.3	Synthesis-Based Supervisory Control Engineering	44
2.4	Model Transformations	47
2.5	Industrial Cases	50
2.5.1	MRI Scanner	50
2.5.2	Océ printer	52
2.5.3	Theme Park Vehicle	53
2.6	Conclusions	56
	References	57
3	Output Synchronization of Dynamical Networks Having Nodes with Relative-Degree-One Nonlinear Systems	59
	Yanyan Liu, Georgi Dimirovski and Jun Zhao	
3.1	Introduction	60
3.2	Problem Statement and Preliminaries	62
3.3	The Output Synchronization	63
3.4	An Illustrative Example	68
3.5	Conclusion	70
	References	70
4	Mechanism Design for Incentive Compatible Control of Networks	73
	Anil Kumar Chorppe and Tansu Alpcan	
4.1	Introduction	73
4.1.1	Revenue Maximization in Wireless Networks	74
4.1.2	Network Mechanism Design with Malicious Users	74
4.1.3	Privacy in Mobile Commerce	76
4.2	General System Model	77
4.3	Pricing Mechanism for Designer Revenue Maximization	79

4.4	Mechanism Design and Game Model with Malicious Users . . .	82
4.5	Price of Malice in Mechanisms	83
4.5.1	Price of Malice in VCG Mechanism:	83
4.5.2	Price of Malice in Indirect Auction Mechanisms	85
4.5.3	Price of Malice in Pricing Mechanisms	89
4.5.4	Differentiated Pricing.	90
4.6	Privacy Mechanism Model	93
4.6.1	Privacy Mechanism	97
4.7	Discussion and Open Problems	97
	References.	99
5	Building Smart Grid: Optimal Coordination of Consumption with Decentralized Energy Generation and Storage	101
	Araz Ashouri, Sebastian Gaulocher and Petr Korba	
5.1	Abbreviations	102
5.2	Introduction	102
5.2.1	Smart Grid Philosophy.	102
5.2.2	Building Energy Management Systems in Smart Grids	104
5.3	Methodology	105
5.3.1	Modeling Framework and Paradigms	105
5.3.2	Model Predictive Control	106
5.4	Modeling	108
5.5	Results	112
5.5.1	Load Shifting	112
5.5.2	Power Limiting.	114
5.5.3	Effect of Tariffs	115
5.5.4	Some Practical Considerations	116
5.6	Conclusions	117
	References.	118
6	Passivity-Based Switching Rule and Control Law Co-design of Networked Switched Systems with Feedback Delays	119
	Dan Ma and Georgi M. Dimirovski	
6.1	Introduction	120
6.2	Preliminaries	122
6.3	Passivity-Based Switching Rule Design	126
6.4	Switching Rule and Feedback Control Law Co-design.	131
6.5	An Illustrative Example	134
6.6	Conclusions	135
	References.	135

**Part II Machine Intelligence and Learning Control
in Complex Systems**

7	Creating and Controlling Complex Biological Brains	141
	Kevin Warwick	
7.1	Introduction	141
7.2	Culture Preparation	143
7.3	Experimental Platform	144
7.4	Experimental Results	147
7.5	Learning	150
7.6	Conclusions	152
7.7	Future Research	153
	References.	154
8	Iterative Learning Control as an Enabler for Robotic-Assisted Upper Limb Stroke Rehabilitation.	157
	Eric Rogers, Chris T. Freeman, Ann-Marie Hughes, Jane H. Burridge, Katie L. Meadmore and Tim Exell	
8.1	Introduction	157
8.2	ILC Applied to Stroke Rehabilitation.	159
8.2.1	Measurement in Neurorehabilitation.	162
8.3	ILC for Rehabilitation of Planar Tasks.	164
8.3.1	Human Arm Model: Passive System	165
8.3.2	Robotic Control Scheme	166
8.3.3	Trajectory Selection.	169
8.3.4	ILC Structure and Design.	170
8.3.5	Clinical Assessment.	174
8.4	Iterative Learning Control of the Unconstrained Upper Limb	177
8.4.1	Stimulated Arm Model	177
8.4.2	3D Control Schemes	180
8.5	Conclusions and Further Research.	184
	References.	185
9	Adaptive Fuzzy Modeling Based Assessment of Operator Functional State in Complex Human–Machine Systems	189
	Jianhua Zhang and Rubin Wang	
9.1	Introduction	190
9.2	Data Acquisition Experiments.	191
9.2.1	Subjects.	191
9.2.2	Experimental Equipments and Environment	191
9.2.3	Experimental Tasks	192
9.2.4	Experimental Procedure	193
9.3	Adaptive Fuzzy Modeling Methods	194
9.3.1	OFS-Related Psycho-physiological Markers	195
9.3.2	Basics of Fuzzy Modeling Paradigm	196
9.3.3	Mamdani-Type Fuzzy Model	197

9.4	OFS Estimation Results and Discussion	198
9.4.1	OFS Estimation Results	198
9.4.2	Discussions	204
9.5	Conclusion and Future Work	207
	References.	208
10	Space-Independent Community Detection in Airport Networks . . .	211
	Emil Gegov, Maria Nadia Postorino, Alexander Gegov and Boriana Vatchova	
10.1	Introduction	211
10.2	Research Methodology	214
10.2.1	Network Modelling	216
10.2.2	Network Analysis	216
10.3	Simulation Results	219
10.3.1	Network Parameters	220
10.3.2	Community Structure.	224
10.4	Discussion	226
10.4.1	Network Parameters	226
10.4.2	Community Structure.	228
10.5	Conclusion.	236
	Appendix A.	237
	Appendix B.	242
	References.	247
11	Decentralized Control of Complex Dynamic Systems Employing Function Emulation by Neural Networks	249
	Yuanwei Jing, Yanxin Zhang, Vesna M. Ojleska, Tatjana D. Kolemisevska-Gugulovska and Georgi M. Dimirovski	
11.1	Introduction	250
11.2	Problem Statement and Assumptions	252
11.3	ANN Emulation-Base Decentralized Control of the Similarity Class of Complex Dynamic Systems	253
11.4	Application to Complex Inverted Pendulums Mechatronic Plant System	261
11.5	Conclusions	264
	References.	265
12	Neural Networks with Strong Anticipation and Some Related Problems of Complexity Theory	267
	Oleksandr S. Makarenko	
12.1	Introduction	267
12.2	Strong Anticipation Property	268
12.3	Neural Network Example with Anticipation	271
12.3.1	Classical Hopfield Model	271
12.3.2	Neural Network with Anticipation.	272

12.4	Numerical Realization of Simple Model with Anticipation	273
12.4.1	Calculation Results	273
12.5	Mathematical and Applied Problems for Future Investigations	277
12.6	Conclusions and Further Lines of Investigations	279
	References.	280
 Part III Control and Supervision of Complex Mechanical Structures and Robots		
13	How to Cope with Disturbances in Biped Locomotion?	285
	Miomir Vukobratović, Branislav Borovac, Mirko Raković and Milutin Nikolić	
13.1	Introduction	285
13.2	Basic Issues	286
13.3	Biped Mechanical Structure	288
13.4	Compensation of Small Disturbances.	292
13.5	Compensation of Large Disturbances.	297
13.5.1	Characteristic Compensating Movements	298
13.5.2	Analysis of Compensating Movements.	299
13.5.3	Compensation Involving Only the Ankle Joint	300
13.5.4	Compensation Simultaneous Motion of the Ankle and the Hip Joints.	303
13.5.5	Compensation Simulation—Only by Ankle and Using Simultaneously Ankle and the Hip Joints.	305
13.6	Conclusions	311
	References.	312
14	New Adaptive Algorithm of Flexible Spacecraft Control.	313
	Vladislav Yu. Rutkovsky, Victor M. Glumov and Victor M. Sukhanov	
14.1	Introduction	313
14.2	Adaptation Algorithm Synthesis	315
14.3	Mathematical Model of the Large Space Structure.	320
14.4	Design of the LSS Control.	323
14.5	Conclusion.	325
	References.	326
15	State-Dependent Riccati Equation-Based Tracking Control of a Hydraulic Seismic Isolator Test Rig	327
	Stefano Pagano, Riccardo Russo, Salvatore Strano and Mario Terzo	
15.1	Introduction	327
15.2	Test Rig Description	328
15.3	Mathematical Model	329
15.4	Controller Design	331

15.5	Real-Time Experiments	333
15.6	Conclusions	334
	References.	335
16	Multi-Robot Navigation Using Market-Based Optimization.	337
	Rainer Palm, Abdelbaki Bouguerra and Muhammad Abdullah	
16.1	Introduction	337
16.2	Navigation, Modeling, and Obstacle Avoidance	339
16.2.1	Navigation Principles.	339
16.2.2	Modeling of the System.	340
16.2.3	Obstacle Avoidance Using Artificial Force Fields	342
16.2.4	“Deformation” of Potential Fields Using Fuzzy Rules	344
16.3	MB Approach.	345
16.4	MB optimization of obstacle avoidance	348
16.4.1	MBO Between Active Mobile Platforms	348
16.5	Simulation Results	349
16.5.1	Software Framework and Packages	349
16.5.2	Experimental Setup	350
16.5.3	Results.	352
16.5.4	Results Summary	360
16.6	Conclusion.	365
	References.	366
17	Fault Tolerant Estimation of UAV Dynamics via Robust Adaptive Kalman Filter	369
