

Contents

- 1 Sample Size, Mean, Standard Deviation, and Standard Error of the Mean 1**
 - 1.1 Mean 1
 - 1.2 Standard Deviation 2
 - 1.3 Standard Error of the Mean 3
 - 1.4 Sample Size, Mean, Standard Deviation, and Standard Error of the Mean 4
 - 1.4.1 Using the Fill/Series/Columns Commands 4
 - 1.4.2 Changing the Width of a Column 5
 - 1.4.3 Centering Information in a Range of Cells 6
 - 1.4.4 Naming a Range of Cells 8
 - 1.4.5 Finding the Sample Size Using the =COUNT Function 9
 - 1.4.6 Finding the Mean Score Using the =AVERAGE Function 9
 - 1.4.7 Finding the Standard Deviation Using the =STDEV Function 10
 - 1.4.8 Finding the Standard Error of the Mean 10
 - 1.5 Saving a Spreadsheet 12
 - 1.6 Printing a Spreadsheet 13
 - 1.7 Formatting Numbers in Currency Format (Two Decimal Places) 15
 - 1.8 Formatting Numbers in Number Format (Three Decimal Places) 17
 - 1.9 End-of-Chapter Practice Problems 17
 - References 20

2	Random Number Generator	21
2.1	Creating Frame Numbers for Generating Random Numbers	21
2.2	Creating Random Numbers in an Excel Worksheet	24
2.3	Sorting Frame Numbers into a Random Sequence	26
2.4	Printing an Excel File So That All of the Information Fits onto One Page	29
2.5	End-of-Chapter Practice Problems	33
3	Confidence Interval About the Mean Using the TINV Function and Hypothesis Testing	35
3.1	Confidence Interval About the Mean	35
3.1.1	How to Estimate the Population Mean	35
3.1.2	Estimating the Lower Limit and the Upper Limit of the 95 % Confidence Interval About the Mean	36
3.1.3	Estimating the Confidence Interval the Chevy Impala in Miles Per Gallon	37
3.1.4	Where Did the Number “1.96” Come From?	38
3.1.5	Finding the Value for t in the Confidence Interval Formula	39
3.1.6	Using Excel’s TINV Function to Find the Confidence Interval About the Mean	40
3.1.7	Using Excel to Find the 95 % Confidence Interval for a Car’s mpg Claim	40
3.2	Hypothesis Testing	46
3.2.1	Hypotheses Always Refer to the Population of Physical Properties That You Are Studying	47
3.2.2	The Null Hypothesis and the Research (Alternative) Hypothesis	47
3.2.3	The 7 Steps for Hypothesis-Testing Using the Confidence Interval About the Mean	51
3.3	Alternative Ways to Summarize the Result of a Hypothesis Test	57
3.3.1	Different Ways to Accept the Null Hypothesis	58
3.3.2	Different Ways to Reject the Null Hypothesis	58
3.4	End-of-Chapter Practice Problems	59
	References	62
4	One-Group t-Test for the Mean	63
4.1	The 7 STEPS for Hypothesis-Testing Using the One-Group t-Test	63
4.1.1	STEP 1: State the Null Hypothesis and the Research Hypothesis	64
4.1.2	STEP 2: Select the Appropriate Statistical Test	64

4.1.3	STEP 3: Decide on a Decision Rule for the One-Group t-Test	64
4.1.4	STEP 4: Calculate the Formula for the One-Group t-Test	65
4.1.5	STEP 5: Find the Critical Value of t in the t-Table in Appendix E	66
4.1.6	STEP 6: State the Result of Your Statistical Test	67
4.1.7	STEP 7: State the Conclusion of Your Statistical Test in Plain English!	67
4.2	One-Group t-Test for the Mean	68
4.3	Can You Use Either the 95 % Confidence Interval About the Mean OR the One-Group t-Test When Testing Hypotheses?	72
4.4	End-of-Chapter Practice Problems	72
	References	76
5	Two-Group t-Test of the Difference of the Means for Independent Groups	77
5.1	The 9 STEPS for Hypothesis-Testing Using the Two-Group t-Test	78
5.1.1	STEP 1: Name One Group, Group 1, and the Other Group, Group 2	78
5.1.2	STEP 2: Create a Table That Summarizes the Sample Size, Mean Score, and Standard Deviation of Each Group	79
5.1.3	STEP 3: State the Null Hypothesis and the Research Hypothesis for the Two-Group t-Test	80
5.1.4	STEP 4: Select the Appropriate Statistical Test	80
5.1.5	STEP 5: Decide on a Decision Rule for the Two-Group t-Test	80
5.1.6	STEP 6: Calculate the Formula for the Two-Group t-Test	81
5.1.7	STEP 7: Find the Critical Value of t in the t-Table in Appendix E	81
5.1.8	STEP 8: State the Result of Your Statistical Test	82
5.1.9	STEP 9: State the Conclusion of Your Statistical Test in Plain English!	82
5.2	Formula #1: Both Groups Have a Sample Size Greater Than 30	86
5.2.1	An Example of Formula #1 for the Two-Group t-Test	88
5.3	Formula #2: One or Both Groups Have a Sample Size Less Than 30	93
5.4	End-of-Chapter Practice Problems	100
