

Contents

- 1 The Interval-Valued Least Square Solutions of Interval-Valued Cooperative Games** 1
 - 1.1 Introduction 1
 - 1.2 Cooperative Games and Their Solutions 3
 - 1.3 Interval-Valued Cooperative Games and Their Interval-Valued Least Square Solutions 7
 - 1.3.1 Interval Operations and Distances Between Intervals 7
 - 1.3.2 Interval-Valued Cooperative Games and the Interval-Valued Least Square Solutions 10
 - 1.4 Quadratic Programming Models and Methods for the Interval-Valued Least Square Solutions of Interval-Valued Cooperative Games 13
 - 1.4.1 The Interval-Valued Least Square Solution Without Considering the Efficiency 13
 - 1.4.2 The Interval-Valued Least Square Solution with Considering the Efficiency 23
 - 1.5 Analysis of Two Examples and Computational Result Comparison 30
 - 1.5.1 Computational Results Obtained by Different Methods and Analysis 31
 - 1.5.2 The Comparison Analysis and Conclusion 40
 - References 43
- 2 Satisfactory Interval-Valued Cores of Interval-Valued Cooperative Games** 45
 - 2.1 Introduction 45
 - 2.2 Interval Comparison Satisfactory Degrees and Satisfactory Crisp Equivalent Forms of Interval-Valued Inequalities 46

2.2.1	Satisfactory Degrees of Interval Comparison and Properties	47
2.2.2	Satisfactory Crisp Equivalent Forms of Interval-Valued Inequalities	51
2.3	Nonlinear Programming Models and Method for Interval-Valued Cores of Interval-Valued Cooperative Games	53
2.3.1	The Concept of Interval-Valued Cores of Interval-Valued Cooperative Games	54
2.3.2	Nonlinear Programming Models for Interval-Valued Cores of Interval-Valued Cooperative Games	56
2.3.3	Bisection Algorithm for Computing Interval-Valued Cores of Interval-Valued Cooperative Games	60
2.4	Real Example Analysis	62
2.4.1	Computational Results Obtained by the Nonlinear Programming Method	62
2.4.2	Computational Results Obtained by the Moore's Order Relation Between Intervals	65
	References	66
3	Several Interval-Valued Solutions of Interval-Valued Cooperative Games and Simplified Methods	69
3.1	Introduction	69
3.2	Interval-Valued Equal Division Values and Interval-Valued Equal Surplus Division Values of Interval-Valued Cooperative Games	70
3.2.1	Interval-Valued Equal Division Values of Interval-Valued Cooperative Games and Simplified Methods	71
3.2.2	Interval-Valued Equal Surplus Division Values of Interval-Valued Cooperative Games and Simplified Methods	76
3.3	Interval-Valued Egalitarian Shapley Values and Interval-Valued Discounted Shapley Values of Interval-Valued Cooperative Games	90
3.3.1	Interval-Valued Shapley Values of Interval-Valued Cooperative Games and Simplified Methods	91
3.3.2	Interval-Valued Egalitarian Shapley Values of Interval-Valued Cooperative Games and Properties	102
3.3.3	Interval-Valued Discounted Shapley Values of Interval-Valued Cooperative Games and Properties	105
3.4	Interval-Valued Solidarity Values and Generalized Solidarity Values of Interval-Valued Cooperative Games	112

- 3.4.1 Interval-Valued Solidarity Values of Interval-Valued Cooperative Games and Simplified Methods 115
- 3.4.2 Interval-Valued Generalized Solidarity Values of Interval-Valued Cooperative Games and Properties 125
- 3.5 Interval-Valued Banzhaf Values of Interval-Valued Cooperative Games 128
- References 136

Models and Methods for Interval-Valued Cooperative
Games in Economic Management

Li, D.-F.

2016, XVII, 137 p. 4 illus., 1 illus. in color., Hardcover

ISBN: 978-3-319-28996-0
