

Contents

1	Introduction to the Photorefractive Effect in Polymers	1
	Pierre-Alexandre Blanche and Brittany Lynn	
2	Charge Transport and Photogeneration in Organic Semiconductors: Photorefractives and Beyond	65
	Canek Fuentes-Hernandez	
3	Photorefractive Response: An Approach from the Photoconductive Properties	129
	Naoto Tsutsumi and Kenji Kinashi	
4	Photorefractive Properties of Polymer Composites Based on Carbon Nanotubes	157
	Anatoly V. Vannikov and Antonina D. Grishina	
5	Photorefractive Smectic Mesophases	187
	Roberto Termine and Attilio Golemme	
6	Inorganic–Organic Photorefractive Hybrids	223
	Dean R. Evans, Gary Cook, Victor Yu. Reshetnyak, Carl M. Liebig, Sergey A. Basun, and Partha P. Banerjee	
7	Wave Mixing in Photorefractive Polymers: Modeling and Selected Applications	249
	Partha P. Banerjee, Dean R. Evans, and Carl M. Liebig	
8	Photorefractives for Holographic Interferometry and Nondestructive Testing	283
	Marc Georges	
	Index	313

Photorefractive Organic Materials and Applications

Blanche, P.-A. (Ed.)

2016, X, 318 p. 162 illus., 62 illus. in color., Hardcover

ISBN: 978-3-319-29332-5
