1	Introduction	1
1.1	Motivation	2
1.2	Approach	3
1.3	Problems Description	3
1.4	Document Structure	4
	References	4
2	Literature Review	5
2.1	Value Investing	5
2.1.1	Fundamental Analysis.	6
2.1.2	Financial Statements.	6
2.1.3	Fundamental Indicators to Use in Ratio Analysis	9
2.1.4	Economic Indicators.	10
2.1.5	Categories of Companies.	11
2.1.6	Warren Buffett Method.	12
2.1.7	Approaches to Equity Valuation.	14
2.2	Technical Analysis.	16
2.2.1	Trends in the Market	16
2.2.2	Strategies to Invest.	17
2.2.3	Types of Markets.	17
2.2.4	Designing a Strategy to Invest.	18
2.3	Introduction to Multi-objective Optimization	21
2.3.1	Multi-objective Description	21
2.4	Evolutionary Computation.	22
2.4.1	Memory Module	23
2.4.2	Selection Module	23
2.4.3	Reproduction Model.	23
2.5	Evolutionary Algorithms.	24
2.5.1	Representation	25
2.5.2	Population.	25
2.5.3	Quality Indicator	25

2.5.4	Selection	25
2.5.5	Variation or Reproduction Operations	25
2.5.6	Algorithm Design Issues	26
2.5.7	State-of-the-Art Multi-objective Evolutionary Algorithms	27
2.6	Portfolio Optimization	28
2.6.1	Diversification and Risk of Portfolios	28
2.6.2	Mean-Variance Model	29
2.6.3	The Mean-Variance Cardinality Constrained Portfolio Optimization Model (MVCCPO).	30
2.7	State of the Art of Portfolio Optimization	31
2.8	Conclusion	36
	References	36
3	System Architecture	39
3.1	Algorithm Architecture	39
3.1.1	Architecture of the Evolutionary Algorithms	40
3.2	Obtaining the Financial Data	42
3.3	Financial Statement Analysis	42
3.3.1	The Income Statement	42
3.3.2	Balance Sheet Statement	44
3.3.3	Cash Flow Statement	45
3.4	Financial Ratios	46
3.4.1	Debt Ratio	46
3.4.2	Return on Equity	47
3.4.3	Profit Margin	49
3.4.4	Price Earnings Ratio	49
3.4.5	Revenue Growth Rate (RG).	51
3.4.6	Rate of Change in Common Stock Outstanding	52
3.4.7	Net Income Growth Rate	53
3.5	Technical Analysis	54
3.5.1	Moving Average	54
3.6	Conclusions	55
