1	Investment in Generation and Transmission Facilities	1
1.1	Long-Term Decision Making Under Uncertainty	1
1.2	Electricity Markets	4
1.3	Transmission Expansion Planning	7
1.4	Generation Investment	9
1.5	Generation and Transmission Expansion Planning	12
1.6	Investment Valuation and Timing	14
1.7	What We Do and What We Do Not Do	15
1.8	End-of-Chapter Exercises	16
	References	17
2	Transmission Expansion Planning	21
2.1	Introduction	21
2.2	Deterministic Approach	24
2.2.1	Notation	25
2.2.2	MINLP Model Formulation	26
2.2.3	Linearization of Products of Binary and Continuous Variables	32
2.2.4	MILP Model Formulation	32
2.3	Robust Approach	38
2.3.1	Adaptive Robust Optimization Formulation	39
2.3.2	Definition of Uncertainty Sets	40
2.3.3	Feasibility of Operating Decision Variables	41
2.3.4	Detailed Formulation	41
2.3.5	Solution Procedure	43
2.4	Summary	53
2.5	End-of-Chapter Exercises	53
2.6	GAMS Code	56
	References	58

3	Generation Expansion Planning	61
3.1	Introduction	61
3.2	Problem Description	63
3.2.1	Notation	63
3.2.2	Aim and Assumptions	65
3.2.3	Time Framework	65
3.2.4	Operating Conditions	67
3.2.5	Uncertainty Characterization	68
3.2.6	Modeling of the Transmission Network	69
3.2.7	Complementarity Model	69
3.3	Deterministic Single-Node Static GEP	70
3.3.1	Complementarity Model	71
3.3.2	Equivalent NLP Formulation	74
3.3.3	Equivalent MILP Formulation	76
3.3.4	Meaning of Dual Variables λ_o	79
3.4	Deterministic Single-Node Dynamic GEP	80
3.5	Deterministic Network-Constrained Static GEP	83
3.5.1	Complementarity Model	84
3.5.2	Equivalent MILP Formulation	87
3.5.3	Meaning of Dual Variables λ_{no}	91
3.6	Stochastic Single-Node GEP	91
3.6.1	Static Model Formulation	92
3.6.2	Dynamic Model Formulation	96
3.7	Summary and Conclusions	106
3.8	End-of-Chapter Exercises	106
3.9	GAMS Codes	108
	References	113
4	Generation and Transmission Expansion Planning	115
4.1	Introduction	115
4.2	Problem Description	117
4.2.1	Notation	117
4.2.2	Approach	119
4.2.3	Risk Management	119
4.3	Deterministic Static G&TEP	120
4.3.1	MINLP Formulation	120
4.3.2	MILP Formulation	124
4.4	Deterministic Dynamic G&TEP	125
4.5	Stochastic G&TEP	131
4.5.1	Static Approach	132
4.5.2	Dynamic Approach	137
4.6	Stochastic Dynamic Risk-Constrained G&TEP	152
4.6.1	Formulation	153
4.7	Summary and Conclusions	161

4.8	End-of-Chapter Exercises	162
4.9	GAMS Code	164
	References	166
5	Investment in Production Capacity	169
5.1	Introduction	169
5.1.1	Electricity Pool	170
5.1.2	Network Representation	170
5.1.3	Static and Dynamic Investment Models	171
5.1.4	Operating Conditions: Demand Level and Stochastic Production	171
5.1.5	Uncertainty	172
5.1.6	Bilevel Model	173
5.1.7	Alternative Solution Approaches	174
5.2	Static Production Capacity Investment Model	174
5.3	Dynamic Production Capacity Investment Model	190
5.4	Direct Solution Approach	198
5.4.1	MPEC	198
5.4.2	MPEC Linearization	202
5.4.3	Numerical Results	205
5.5	Benders Solution Approach	209
5.5.1	Complicating Variables	209
5.5.2	Convexity Analysis	211
5.5.3	Functioning of Benders Decomposition	212
5.5.4	The Benders Algorithm	213
5.6	Summary	216
5.7	End-of-Chapter Exercises	217
5.8	GAMS Code	220
	References	226
6	Investment Equilibria	229
6.1	Introduction	229
6.2	Solution Approach	230
6.3	Modeling Features and Assumptions	232
6.4	Single-Producer Problem	233
6.4.1	MPEC	240
6.5	Multiple-Producer Problem: EPEC	245
6.5.1	EPEC Solution	245
6.5.2	Searching for Multiple Solutions	250
6.5.3	Ex-Post Algorithm for Detecting Nash Equilibria	251
6.5.4	Numerical Results	252
6.6	Summary	253
6.7	End-of-Chapter Exercises	255
6.8	GAMS Code	255
	References	266
