

Contents

1	Introduction	1
2	Bacterial Growth in Chemostat	3
2.1	What Is a Chemostat	3
2.2	Differential Equations	4
2.2.1	Linear Equations	5
2.2.2	Separation of Variables	6
2.2.3	Homogeneous Equations	7
2.2.4	Exact Equations	8
2.2.5	Integrating Factor	8
2.2.6	Existence of Solutions	10
2.2.7	Differential Inequalities	11
2.3	Equilibrium and Stability	12
2.4	Growth Models	13
2.5	Modeling the Chemostat	14
2.6	Numerical Simulations – Introduction to MATLAB	17
2.6.1	Scalar Calculations	17
2.6.2	Vector and Matrix Operations	19
2.6.3	Program Files	24
2.6.4	Numerical Algorithms for Solving Ordinary Differential Equations	24
3	System of Two Linear Differential Equations	29
3.1	Second Order Linear Differential Equations	29
3.2	Linear Systems	31
3.3	Equilibrium Points	34
3.4	Numerical Simulations	38
3.4.1	Solving a Second Order ODE	38
3.4.2	Plotting Figures	40

4	Systems of Two Differential Equations	43
4.1	Numerical Simulations	47
5	Predator–Prey Models	51
5.1	Numerical Simulations	59
5.1.1	Revisiting Euler Method for Solving ODE – Consistency and Convergence	60
6	Two Competing Populations	65
6.1	Numerical Simulations	71
6.1.1	Revisiting Euler Method for Solving ODE – Backward Euler Method	72
7	General Systems of Differential Equations	75
7.1	Numerical Simulations	81
7.1.1	Solving for the Steady States	81
7.1.2	Bisection Method	82
7.1.3	Newton’s Method	84
8	The Chemostat Model Revisited	87
8.1	Numerical Simulations	93
8.1.1	Finding the Steady States Using MATLAB	94
9	Spread of Disease	97
9.1	HIV	102
9.2	Numerical Simulations	103
10	Enzyme Dynamics	105
10.1	Numerical Simulations	114
11	Bifurcation Theory	117
11.1	Hopf Bifurcation	120
11.2	Neuronal Oscillations	123
11.3	Endangered Species	124
11.4	Numerical Simulations	126
12	Atherosclerosis: The Risk of High Cholesterol	129
12.1	Numerical Simulations	134
13	Cancer-Immune Interaction	137
13.1	Numerical Simulations	143
14	Cancer Therapy	147
14.0.1	VEGF Receptor Inhibitor	147
14.0.2	Virotherapy	153
14.1	Numerical Simulations	155

15 Tuberculosis	157
15.1 Numerical Simulations	162
Solutions	165
References	168
Index	171
