1	Introduction	1
	References	5
2	Photovoltaic Technologies	7
2.1	Cells: Types and Efficiency	10
2.2	The Performance Under Real Operation Conditions	17
2.3	Scarce Materials for Photovoltaic Generation	22
	References	33
3	Short History and Recent Facts of Photovoltaic Generation	37
3.1	First Steps	37
3.2	Recent Stages: Growth, Crisis and Recovery	42
3.2.1	Capacity and Prices	52
3.2.2	The Role of Different Countries in Module Manufacturing and Capacity Additions	62
	References	66
4	Economics of Solar Photovoltaic Generation	71
4.1	The Value Chain of the Photovoltaic Sector	71
4.2	A Model on Costs and Prices	87
4.2.1	Analysis of the Manufacturing Costs of Modules	87
4.2.2	The Trade-off Between Costs and Efficiency	94
4.2.3	Installation Costs	100
4.2.4	Parities and Comparisons	109
4.3	The Social Value of the Photovoltaic Electricity	113
4.3.1	Values of Photovoltaic Electricity	113
4.3.2	Components of the Market Value	124
	References	154
5	Principles for the Public Promotion of Photovoltaic Generation	161
5.1	Main Elements in Public Policy Assessments	161
5.1.1	Relating Goals, Targets, Policies and Criteria	161
5.1.2	Assessment Criteria	165

5.1.3	Goals, Targets and Policies in the European Union Context. The Role of Photovoltaics	175
5.2	Justifying the Public Promotion of Photovoltaic Generation: Market Failures, Systemic Failures and Other Barriers	187
5.3	Combinations of Support Instruments: Demand Pull and Supply Push	190
	References	192
6	Support for Research, Development and Demonstration	199
6.1	The Sources of Innovation: Some Insights from the Literature.	199
6.1.1	Main Concepts	199
6.1.2	Relating Deployment and RD&D	208
6.1.3	Learning Effects and the Learning Curve Model	211
6.1.4	Other Models	219
6.2	The Sources of Innovation and the Sources of Cost Reductions for Solar Photovoltaic Technology.	225
6.3	Possibilities for Innovation in Solar Photovoltaic Technologies.	226
6.4	Public RD&D Instruments	227
6.5	Data on RD&D Support for Photovoltaic Technologies	233
	References	236
7	Photovoltaic Demand-Side Generation	243
7.1	Types of PV-DSG and Their Main Economic Features.	244
7.1.1	Basic Economic Features of PV-DSG	248
7.1.2	Forms of Financing	251
7.1.3	Exchange Prices and Additional Economic Conditions.	255
7.2	Developing the Economics of PV-DSG	258
7.2.1	Regulation Before Retail Grid Parity	259
7.2.2	Reaching the Retail Grid Parity.	262
	References	269
8	Public Support Schemes for the Deployment of Commercial Plants.	273
8.1	Deployment Instruments. An Economic Description of the Alternatives: Instruments and Common Design Elements.	274
8.2	Feed-in Tariffs.	277
8.2.1	Design Elements of FITs	278
8.2.2	The Double Dynamics	285
8.2.3	Financing FITs	291
8.2.4	Dynamic Problems with FITs	292
8.3	Feed-in Premiums	295
8.4	Quotas with Tradable Green Certificates.	299
8.5	Auctions.	303

8.6	Solar PV Instruments in the Real World: An Economic Analysis	307
8.6.1	USA	308
8.6.2	Japan	309
8.6.3	Germany	310
8.6.4	Spain	316
8.6.5	Italy	320
8.6.6	France	322
8.6.7	UK	323
8.6.8	China	326
8.7	Using Assessment Criteria and Indicators to Assess Solar PV Support Schemes	329
8.7.1	Effectiveness	329
8.7.2	Efficiency	331
8.7.3	Support Costs	332
8.7.4	Synthesis	336
	References	337
9	Summing-Up	343

The Economics and Policy of Solar Photovoltaic
Generation

Mir-Artigues, P.; del Rio, P.

2016, XX, 346 p. 56 illus. in color., Hardcover

ISBN: 978-3-319-29651-7
