

Contents

1	Introduction: Bio-inspired Systems	1
1.1	Biological Systems	1
1.2	Network Systems	2
1.3	Mapping Biological Systems to Network Systems	3
1.4	Motivation	4
1.5	Organization of Book	7
	References	9
2	Computer Networks	11
2.1	Introduction	11
2.2	Network Topologies, Types, and Design Strategies	12
	2.2.1 Network Topologies	12
	2.2.2 Network Types	14
	2.2.3 Design Strategies for Communications	16
2.3	Wireless Networking	18
2.4	Usage of Networking	20
2.5	Challenges and Issues of Networking	21
	2.5.1 Quality of Service	21
	2.5.2 Connectivity, Manageability, and Scalability	22
	2.5.3 Network Security	23
	2.5.4 Network Congestion	23
2.6	Future of Networking	24
2.7	Summary	24
	References	25
3	Inceptive Findings	27
3.1	Introduction	27
3.2	Structural Composition	28
3.3	Highly Optimized Tolerance (HOT) Model	30
3.4	Biological Evolution	31
3.5	Natural Computing	32

3.6	Feedback Loops for Kidney-Blood Pressure.	33
3.7	Summary.	34
	References	35
4	Swarm Intelligence and Social Insects	37
4.1	Ant Colony Optimization.	37
4.2	Bird Colony Optimization	39
4.3	Bee Colony Optimization	41
4.4	Firefly Synchronization	42
4.5	Bacterial Foraging Optimization	43
4.6	Cuckoo Search.	47
4.7	Other Inspirations.	48
4.8	Summary.	49
	References	49
5	Immunology and Immune System	51
5.1	Human Immune System	51
5.2	Primary Versus Secondary Response.	55
5.3	Artificial Immune Systems.	56
5.3.1	Negative Selection	56
5.3.2	Clonal Selection	58
5.3.3	Artificial Immune Systems.	59
5.3.4	Pattern Recognition.	61
5.4	Summary.	63
	References	63
6	Information Epidemics and Social Networking	67
6.1	Epidemic Spreading	67
6.2	A System for Building Immunity in Social Networks	72
6.3	Bio-inspired Solutions for Social Networks	74
6.4	Summary.	76
	References	77
7	Artificial Neural Network	79
7.1	Introduction.	79
7.2	Biological Neural Network	80
7.3	Artificial Neural Network	81
7.3.1	Learning Rules in ANN.	83
7.3.2	Types of ANN	86
7.4	Applications of Artificial Neural Networks.	93
7.4.1	Pattern Classification	93
7.4.2	Clustering	93
7.4.3	Optimization	93
7.4.4	Prediction and Forecasting	94
7.5	Summary.	94
	References	94

8	Genetic Algorithms	97
8.1	Introduction	97
8.2	Genetic Algorithms	99
8.3	Encoding	101
8.4	Genetic Algorithm Operators	101
8.4.1	Selection	102
8.4.2	Crossover	103
8.4.3	Mutation	104
8.5	Applications of Genetic Algorithms	104
8.6	Summary	106
	References	106
9	Bio-inspired Software-Defined Networking	107
9.1	Software-Defined Networking	107
9.2	Wireless Software-Defined Networking	109
9.3	Security in Software-Defined Networking	110
9.4	Bio-inspired Solutions for Software-Defined Networking	111
9.4.1	Self-organization and Stability in Software-Defined Networks	111
9.4.2	Fault Management in Software-Defined Networking	112
9.4.3	Cognition: A Tool for Reinforcing Security in Software-Defined Network	112
9.4.4	Control Loops for Autonomic Systems	113
9.4.5	Self-governance and Self-organization in Autonomic Networks	113
9.5	Summary	114
	References	115
10	Case Study: A Review of Security Challenges, Attacks and Trust and Reputation Models in Wireless Sensor Networks	117
10.1	Introduction	117
10.2	Constraints on Wireless Sensor Networks	118
10.3	Threat Model	118
10.4	Security Requirements for Wireless Sensor Networks	119
10.5	Focus and Contents	119
10.6	Attacks in Wireless Sensor Networks	120
10.6.1	Attacks on Data	120
10.6.2	Attacks on Infrastructure	123
10.7	Key Management in Wireless Sensor Networks	126
10.8	Trust and Reputation Model	128
10.8.1	Methods to Calculate Trust	129
10.8.2	Methodologies to Model Trust	130
10.8.3	Comparative Analysis	142

10.9	Bio-inspired Security Model for Wireless Sensor Networks . . .	144
10.9.1	Machine Learning Model	145
10.9.2	Immune Model	151
10.9.3	Experiments and Results	156
10.10	Intelligent Water Drops	162
10.10.1	IWD in Wireless Sensor Networks	162
10.10.2	Algorithm	164
10.11	Summary	171
	References	172
11	Bio-inspired Approaches in Various Engineering Domain	177
11.1	Bio-inspired Energy Systems	177
11.1.1	Bio-inspired Solar Energy Program at CIFAR (Canadian Institute for Advance Research)	177
11.1.2	Bio-inspired Optimization of Sustainable Energy Systems	178
11.1.3	Biomimicry Innovations for Energy Sustainability	178
11.1.4	Bio-inspired Artificial Light-Harvesting Antennas for Enhancement of Solar Energy	179
11.2	Bio-inspired Agriculture Systems	180
11.2.1	CO-CH Project	180
11.2.2	Bio-inspired Sensing for Agriculture Robots	181
11.2.3	Bio-inspired Special Wettability	181
11.2.4	Biorefinery: A Bio-inspired Process to Bulk Chemicals	182
11.3	Bio-inspired Aerospace Systems	182
11.3.1	Biomorphic Explorers	183
11.3.2	Bio-inspired Design of Aerospace Composite Joints for Improved Damage Tolerance	184
11.3.3	Pneumatic Artificial Muscles	184
11.4	Bio-inspired Electrical Systems	185
11.4.1	Biologically Inspired Electrically Small Antenna Arrays with Enhanced Directional Sensitivity	185
11.4.2	Biologically Inspired At-scale Robotic Insect	185
11.4.3	Biomimetic and Bio-inspired Robotics in Electric Fish Research	186
11.4.4	Future Power Grid Inspired from Brain	186
11.5	Bio-inspired Mechatronics Systems	187
11.5.1	Bio-inspired Mechatronics	187
11.5.2	Bio-inspired Actuation	187
11.5.3	Bio-inspired Control	188
11.5.4	Future of Bio-inspired Mechatronics	188

11.6	Bio-inspired Civil Engineering	189
11.6.1	Corrosion Protection via Application of Bacteria and Bio-polymers	189
11.6.2	Nondestructive Evaluation of Civil Infrastructures.	190
11.6.3	Designing Model Systems for Enhanced Adhesion	190
11.6.4	Artificial Neural Networks in Urban Runoff Forecast.	190
11.7	Future: Bio-inspired Computation.	191
