Part I Foreword 1 + Photo

1	The Megadiverse Rupestrian Grassland	3
	G. Wilson Fernandes	
1.1	The Harsh and Unique Rupestrian Grassland	3
1.2	Synergism Among Drivers and Environmental Filters Leading to Biodiversity	7
1.3	The Human Dimension in the Rupestrian Grasslands	10
1.4	Book Sections.	11
	References.	12
2	The Physical Environment of Rupestrian Grasslands (Campos Rupestres) in Brazil: Geological, Geomorphological and Pedological Characteristics, and Interplays	15
	Carlos E.G.R. Schaefer, Guilherme R. Corrêa, Hugo G. Candido, Daniel M. Arruda, Jaquelina A. Nunes, Raphael W. Araujo, Priscyla M.S. Rodrigues, Elpídio I. Fernandes Filho, Aianã F.S. Pereira, Pedro Christo Brandão and Andreza V. Neri	
2.1	The Geological Control	17
2.2	Landforms and Geomorphological Control	21
2.3	Soils, Landforms and Rupestrian Grassland Vegetation on Different Lithologies in Brazil	23
2.3.1	Ferruginous Rupestrian Grasslands	23
2.4	Canga: A Definition	25
2.5	Case Study 1—Island of Ferruginous Rupestrian Physiognomy in the Midst of the Amazonia Forest: A Sequence of Carajás Plateau, Brazilian Eastern Amazonia.	27
2.5.1	Study Site	28
2.5.2	Open Rupestrian Grassland.	28

2.5.3	Shrubby Rupestrian Grassland.	29
2.5.4	“Capão” Forest	30
2.6	Case Study 2—Canga Soils of the Iron Quadrangle, Serra Da Moeda, Minas Gerais, Brazil	30
2.7	General Aspects of Canga Soils—A Discussion	33
2.8	Case Study 3—Rupestrian Grassland on Metarenites and Metapellites from Serra Geral State Park, North Minas Gerais	37
2.8.1	High Top with Open Rupestrian Grassland on Metapellites	38
2.8.2	Slope and Crests with Open Rupestrian Grassland with <i>Vellozia</i> on Rocky Outcrops	40
2.8.3	Rupestrian Savanna (Cerrado Rupestre) on Escarpments	40
2.9	Case Study 4—A Soil Sequence of Quartzite and Micaceous Quartzite from the Espinhaço Range in the Sempre-Vivas State Park, Minas Gerais States	41
2.9.1	Study Area	41
2.9.2	Open Rupestrian Grassland with <i>Vellozia</i> on Litholic Neosols	42
2.9.3	Open and Shrubby Rupestrian Savanna on Cambisols	43
2.9.4	Savanna (Cerrado Sensu Stricto) on Latosols and Cambisols	43
2.9.5	Dwarf Forest on Quartzarenic Neosols or Medium-Texture Latosols	43
2.10	Final Remarks	44
	Appendix 1	45
	References	49
3	Soils Associated with Rupestrian Grasslands	55
	Carlos E. Schaefer, Hugo G. Cândido, Guilherme Resende Corrêa, Jaqueline A. Nunes and Daniel M. Arruda	
3.1	Introduction	56
3.1.1	Landscape Overview	56
3.1.2	Scope	58
3.2	Soil Sampling and Characterization	59
3.3	Soils Associated with Rock Outcrops	60
3.3.1	Soils Overview	60
3.3.2	Chemical Status of Rupestrian Grasslands Soils	63
3.3.3	Soil and Vegetation Relationships	66
3.3.4	Similarity and Differences Between RG Soils	67
	References	68

4	Thermic and Hydric Dynamics of Ironstone (Canga) and Quartzite Rupestrian Grasslands in the Quadrilátero Ferrífero: The Ecological Importance of Water	71
	Lucas Teixeira Ferrari, Carlos Ernesto Gonçalves Reynaud Schaefer, Raphael Bragança Alves Fernandes, Bruno Araújo Furtado Mendonça, Davi Feital Gjorup, Guilherme Resende Corrêa and Eduardo Osório Senra	
4.1	Introduction	72
4.2	Monitoring Sites Location	73
4.3	Soil Characterization	73
4.4	Soil Climate Aspects and Vegetation Implications	77
4.4.1	Soil Moisture	77
4.4.2	Soil Temperature	80
4.5	Conclusions	84
	References	84
5	Water Resources in the Rupestrian Grasslands of the Espinhaço Mountains	87
	Marcos Callisto, José Francisco Gonçalves and Raphael Ligeiro	
5.1	The Headwater Streams of the Espinhaço Mountains	88
5.2	River Basin Beta Diversity and Trends in the Distribution of Aquatic Invertebrates in the Headwater Streams of the Parque Nacional da Serra do Cipó	89
5.2.1	Beta Diversity in River Basins	89
5.2.2	Assessing Key Spatial Scales	90
5.2.3	Implications of β Diversity for Ecosystem Management and Conservation	93
5.3	Leaf Breakdown and Organic Matter Dynamics	93
5.4	The Conservation of Benthic Invertebrates and Their Use as Bioindicators in a Global Perspective	97
5.5	Anthropogenic Disturbances, Threats to Headwaters, Future Perspectives and Global Climate Change	98
	References	99

Part II Foreword 2 + Photo

6	Rupestrian Grassland Vegetation, Diversity, and Origin	105
	Abel A. Conceição, Alessandro Rapini, Flávio F. do Carmo, Juliana C. Brito, Gabriela A. Silva, Sâmia P.S. Neves and Claudia M. Jacobi	
6.1	General Characterization	106
6.1.1	Vegetation Overview	106
6.1.2	Scope	108
6.1.3	Methodological Summary	109

6.2	Chapada Diamantina and Quadrilátero Ferrífero	
	Plant Communities	110
6.2.1	Habitats, Plant Families, Life-Forms, and Dispersal Syndromes	110
6.2.2	Diversity and Endemism	112
6.2.3	Floristic and Structural Patterns	113
6.3	Origins and Diversification of Rupestrian Grasslands	119
6.3.1	The Traditional Pleistocene “Pump” Hypothesis	119
6.3.2	Old Stable Landscapes	120
6.4	Conservation	122
	References	124
7	Archipelago of Montane Forests Surrounded by Rupestrian Grasslands: New Insights and Perspectives	129
	Marcel S. Coelho, G. Wilson Fernandes, Priscila Pacheco, Victor Diniz, Alline Meireles, Rubens M. dos Santos, Felipe A. Carvalho and Daniel Negreiros	
7.1	Atlantic Forest Islands Associated with the Espinhaço Range	130
7.2	The Cipó Mountains in a Landscape Context	132
7.3	Structure and Floristic Composition	135
7.4	Reproductive and Phenological Characteristics	148
7.5	Soils of the <i>Atlantic Forest Islands</i>	150
7.6	Ecological Dynamics	151
7.7	Threats to Conservation	152
7.8	Conclusion	153
	References	153
8	Arbuscular Mycorrhiza and Endophytic Fungi in Rupestrian Grasslands	157
	Yumi Oki, Bruno Tomio Goto, Khadija Jobim, Luiz Henrique Rosa, Mariana Costa Ferreira, Etienne Silva Coutinho, João Henrique de Azevedo Xavier, Fernanda Carvalho, Fatima Maria de Souza Moreira, Francisco Adriano de Souza, Ricardo Luís Louro Berbara and G. Wilson Fernandes	
8.1	Introduction	158
8.2	Distribution and Diversity of Endophytic Fungi and Arbuscular Mycorrhizal Fungi in Rupestrian Grasslands	159
8.2.1	Endophytic Fungi	160
8.2.2	Arbuscular Mycorrhizal Fungi	165
8.3	The Influence of Environmental Factors on Endophytic Fungi and Arbuscular Mycorrhizal Fungi	170
8.3.1	Endophytic Fungi	170
8.3.2	Arbuscular Mycorrhizal Fungi	171

8.4	Bioprospecting for Endophytic Fungi and AMF from Rupestrian Grasslands	172
	References.	175
9	Succession on the Rocky Outcrop Vegetation: A Rupestrian Grassland Scheme.	181
	Abel A. Conceição and José R. Pirani	
9.1	Succession on Rocky Outcrops	182
9.2	Habitats	183
9.3	Methodological Summary.	189
9.4	Spatial Patterns	190
	9.4.1 Isolated Species on the Rock	190
	9.4.2 Habitat Gradient	190
9.5	Spatial Patterns Explaining Temporal Changes	195
	9.5.1 Overview of Successional Scheme.	195
	9.5.2 Successional Scheme	197
	References.	203
10	Seed Germination Ecology in Rupestrian Grasslands	207
	Flávia Peres Nunes, Roberta L.C. Dayrell, Fernando A.O. Silveira, Daniel Negreiros, Denise Garcia de Santana, Fabio Janoni Carvalho, Queila Souza Garcia and G. Wilson Fernandes	
10.1	Introduction	208
10.2	Environmental Control of Seed Germination.	209
	10.2.1 Water.	209
	10.2.2 Light	210
	10.2.3 Temperature	210
10.3	Intrinsic Factors of Seed Germination	213
	10.3.1 Seed Viability.	213
	10.3.2 Seed Dormancy.	215
10.4	Soil Seed Bank and Seasonal Cyclical Dormancy	216
10.5	Ecological and Evolutionary Aspects	218
	10.5.1 Ecological Breadth and Geographical Range.	218
	10.5.2 Environmental Filters of Seedling Recruitment	219
10.6	Conclusions	220
	References.	221
11	Ecophysiology of <i>Campos Rupestres</i> Plants	227
	Rafael S. Oliveira, Anna Abrahão, Caio Pereira, Grazielle S. Teodoro, Mauro Brum, Suzana Alcantara and Hans Lambers	
11.1	Introduction	228
11.2	Carbon and Water Relations of <i>Campos Rupestres</i> Plants.	229
	11.2.1 Water-Acquisition Mechanisms	229
	11.2.2 Photosynthesis and Water Relations.	234

11.3	Plant Mineral Nutrition in <i>Campos Rupestres</i>	239
11.3.1	Pedogenesis, Sources of N and P	239
11.3.2	Nutrient-Acquisition Strategies	242
11.3.3	Fluoroacetate-Bearing Plant Species	254
11.4	Fire	255
11.5	Trait Evolution and Adaptive Radiation in <i>Campos Rupestres</i>	259
11.6	Summary	260
	References	262

Part III Foreword 3 + Photo

12	Phenology Patterns Across a Rupestrian Grassland Altitudinal Gradient	275
	Nathália Miranda Walter Bretas Rocha, Daniel Wisbech Carstensen, G. Wilson Fernandes, Soizig Le Stradic, Elise Buisson and Leonor Patrícia Cerdeira Morellato	
12.1	Introduction	276
12.2	The Serra do Cipó	278
12.3	The Altitudinal Gradient of Rupestrian Grasslands	279
12.4	Plant Sampling and Phenological Observations	281
12.5	Changes in Species Richness Across the Altitudinal Gradient	282
12.6	Phenological Patterns Across the Altitudinal Gradient	283
12.7	Future Directions for Phenology Research in Rupestrian Grasslands	285
	References	286
13	Mutualistic Interactions Among Free-Living Species in Rupestrian Grasslands	291
	Tadeu J. Guerra, Daniel W. Carstensen, Leonor Patricia Cerdeira Morellato, Fernando A.O. Silveira and Fernanda V. Costa	
13.1	Introduction	292
13.2	Scope	295
13.3	Linking Plants to Their Pollinators	295
13.4	Frugivory and Seed Dispersal	299
13.5	Mutualistic Interactions Between Birds and Mistletoes	302
13.6	Linking Ant Bodyguards to Their Plant and Animal Partners	303
13.7	Concluding Remarks	308
	References	310

14	Antagonistic Interactions in the Rupestrian Grasslands: New Insights and Perspectives	315
	Frederico S. Neves, Tatiana Cornelissen, Marcel S. Coelho, Milton Barbosa, Marco Antônio A. Carneiro, Sérgio P. Ribeiro and G. Wilson Fernandes	
14.1	Antagonistic Interactions in Rupestrian Grasslands	317
14.2	Herbivory in the Rupestrian Grasslands	317
14.3	Plant Dioecy and Its Effects on Herbivory	321
14.4	Plant Taxon Size and Herbivory	322
14.5	Fluctuating Asymmetry and Herbivory	324
14.6	Plant Defence and Selection by Herbivores	325
14.7	Mistletoe Interactions	328
14.8	The Genus <i>Baccharis</i> as a Model for Multitrophic Interactions in the Rupestrian Grasslands	330
14.9	Final Remarks	335
	References	336
15	Cerrado to Rupestrian Grasslands: Patterns of Species Distribution and the Forces Shaping Them Along an Altitudinal Gradient	345
	G. Wilson Fernandes, Hernani A. Almeida, Cássio A. Nunes, João Henrique A. Xavier, Neil S. Cobb, Marco Antônio A. Carneiro, Tatiana Cornelissen, Frederico S. Neves, Sérgio P. Ribeiro, Yule Roberta F. Nunes, Ana Carolina V. Pires and Marina V. Beirão	
15.1	Species Diversity Along Altitudinal Gradients	347
15.2	Mountains, Altitudinal Gradients and Species Geography	347
15.3	Sample Design	349
15.4	Variation of Abiotic Factors Along the Altitudinal Gradient	351
	15.4.1 Climate	351
	15.4.2 Soils	354
15.5	Understanding Distribution of Species Along the Altitudinal Gradient	354
	15.5.1 Vegetation	356
	15.5.2 Distribution of Species from a Climatic-Vegetation Axis	357
	15.5.3 Termites	358
	15.5.4 Dung Beetles	359
	15.5.5 Ants	360
	15.5.6 Butterflies	361
	15.5.7 Arbuscular Mycorrhizal Fungi	362
	15.5.8 Insect Herbivores	364
	15.5.9 Birds	367
15.6	Synthesis	369
	References	371

16	Termite Role in Soil Nutrient Cycling in Ironstone Rupestrian Grasslands (<i>Canga</i>) in Carajás, Brazilian Amazonia	379
	Carlos Ernesto G.R. Schaefer, Alessandra Marins, Guilherme Resende Corrêa, Og deSouza and Jaquelina Alves Nunes	
16.1	Termites and Soil	380
16.2	Sampling Termites	381
16.3	Trends in Species Richness and Distribution	381
16.4	Termite Community Variation Among Habitat	383
16.5	Soil Characterization	383
	16.5.1 Characterization of Termite Mounds and Adjacent Soil	383
	16.5.2 Similarity Between Soil Variables	384
	16.5.3 Similarity Between Environments	385
	16.5.4 Termite Mounds and Adjacent Soils	387
16.6	Conclusions	390
	References	390
 Part IV Foreword 4 + Photo		
17	Afforestation in the Rupestrian Grasslands: The Augmenting Pressure of <i>Eucalyptus</i>	395
	Rodrigo Pinheiro Ribas, Rogério Machado Caetano, Bernardo Machado Gontijo and João Henrique de Azevedo Xavier	
17.1	Introduction	396
17.2	Losing Connectivity and Diversity	398
17.3	Scale Approach: Cartography of the <i>Eucalyptus</i> Versus Native Vegetation in Minas Gerais	402
17.4	Persisting Dilemmas—Multiple Determinations, Interests and Visions	410
17.5	Final Considerations	412
	References	413
18	Fire in Rupestrian Grasslands: Plant Response and Management	415
	José Eugênio Côrtes Figueira, Katia Torres Ribeiro, Marilene Cardoso Ribeiro, Claudia Maria Jacobi, Helena França, Ana Carolina de Oliveira Neves, Abel Augusto Conceição, Fabiana Alves Mourão, Jumara Marques Souza and Carlos Abraham de Knegt Miranda	
18.1	The Rupestrian Grassland Environment	417
18.2	The Burning Regimes—Past and Present	418
18.3	Plant Response to Fire	425
18.4	Fire and Management	436

18.5	Suggested Directions for Fire Management in Rupestrian Grasslands	440
	References.	443
19	Challenges in the Restoration of Quartzitic and Ironstone Rupestrian Grasslands	449
	G. Wilson Fernandes, Tiago Shizen Pacheco Toma, Patrícia Angrisano and Gerhard Overbeck	
19.1	Introduction	450
19.2	Why Restore Rupestrian Grasslands?	451
19.3	Sound Scientific Knowledge for the Development of Restoration Know-How	452
	19.3.1 Reference Ecosystem	453
	19.3.2 Background Knowledge on Plant Species Propagation	454
	19.3.3 Nutritional Requirements and Site Preparation.	457
	19.3.4 Scientific Pilot Restoration Experiments	458
19.4	Potential Techniques for the Ecological Restoration of Rupestrian Grasslands	463
	19.4.1 Soil Preparation: Soil Fertility and the Use of Topsoil	463
	19.4.2 Seeding and Seedling Planting Techniques	464
	19.4.3 Species Translocation.	464
19.5	Potential Indicators of Restoration Progress	466
	19.5.1 Soil Conditions	467
	19.5.2 Plant Development and Performance	467
	19.5.3 Succession and Plant Cover	467
	19.5.4 Associated Organisms: Biodiversity	468
	19.5.5 Ecosystem Functions and Services.	469
19.6	The Threat of Invasive Plants to Rupestrian Grassland Restoration	469
19.7	Summary of Current Gaps in Knowledge and Challenges for the Restoration of Rupestrian Grasslands.	470
	References.	472
20	The People of the Mountains: The Biocultural Heritage of the Espinhaço Range in Minas Gerais State, Brazil	479
	Emmanuel Duarte Almada, Felisa Cançado Anaya and Fernanda Testa Monteiro	
20.1	Introduction	480
20.2	Environmental history of the Espinhaço and its People	483
20.3	The Management of Rocky Fields.	485
20.4	A Biocultural Diversity Hotspot	492

20.5	Territorial Environmental Conflicts in the Espinhaço of Minas	494
20.6	The Espinhaço as Biocultural Heritage of Humanity	496
	References.	497
21	The Human Dimension in the Espinhaço Mountains: Land Conversion and Ecosystem Services	501
	Ana Carolina de Oliveira Neves, Alisson Flávio Barbieri, André Aroeira Pacheco, Fernando de Moura Resende, Rodrigo Fagundes Braga, Alexsander Araujo Azevedo and G. Wilson Fernandes	
21.1	Introduction	502
21.2	Natural Heritage of the Espinhaço Mountains	506
21.3	Ecosystem Services Delivered by the Espinhaço Mountains	508
	21.3.1 Plant Diversity Storage Service	509
	21.3.2 Trade of Dried Ornamental Plants	510
	21.3.3 Tourism in Serra do Cipó National Park.	512
	21.3.4 Ecosystem Services Associated with Water.	513
21.4	Industry and Ecosystem Services: A Conflict of Interests	517
	21.4.1 Conflicts Over Water Use.	517
	21.4.2 Social Impacts of Mining on the Region of Conceição do Mato Dentro.	521
	21.4.3 Environmental Losses in the Iron Quadrangle	522
21.5	Resource Generation by Mining and Investment in Natural Capital	523
	References.	526
22	Rupestrian Grassland: Past, Present and Future Distribution	531
	Newton P.U. Barbosa and G. Wilson Fernandes	
22.1	Introduction	532
22.2	The Last Glacial Maximum in the Espinhaço Mountain Range	532
22.3	The Actual Distribution of the Rupestrian Grassland	536
	22.3.1 Isolated Mountains with Rupestrian Grasslands	538
22.4	Historically Stable Areas of the Rupestrian Grassland	539
22.5	The Future of the Rupestrian Grassland	539
	References.	541
23	The Shady Future of the Rupestrian Grassland: Major Threats to Conservation and Challenges in the Anthropocene	545
