

Contents

1	Disconnection, Synthons, Introductory Example	1
1.1	Introduction	1
1.2	General Aspects of Retrosynthetic Analysis	2
1.2.1	Disconnection Versus Interconversion of the Functional Group	3
1.3	Retrosynthesis and Asymmetric Synthesis, Introductory Example	5
1.3.1	Retrosynthetic Analysis of 1-(Pyridine-3-yl)propan-1-ol	5
1.3.2	Asymmetric Synthesis of (<i>S</i>)-1-(Pyridine-3-yl)propan-1-ol	9
1.4	Interconversion of Functional Groups and C–H Acidity	13
1.4.1	Interconversions of Oxygenated Functional Groups	13
1.4.2	Acidity of C–H Bond, Stabilization of Carbanions	14
1.5	Organic Synthesis and the Environment	15
	References	19
2	Retrosynthetic Analysis of the Compounds with One Functional Group	21
2.1	Introduction	21
2.2	Disconnection of Carbinols	21
2.3	Disconnection of Alkenes	28
2.3.1	Examples of the Wittig Reaction on the Industrial Scale	33
2.4	Disconnection of Ketones	37
2.4.1	Disconnection of Dialkyl Ketones	37
2.4.2	Disconnection of Alkyl Aryl Ketones and Diaryl Ketones	42

2.5	Interconversion of the Nitro Group, Nitroalkanes as Building Blocks	45
	References	50
3	Stereoisomers and Stereoselective Reactions—"Departure into Third Dimension"	51
3.1	Introduction	51
3.2	Retrosynthesis and Stereochemical Aspects of Synthetic Reactions	52
3.3	Basics of Stereoselective Reactions	53
3.4	Topological Relation and Stereoselectivity	54
3.5	Stereoselective Processes and Kinetic Control	56
3.6	Reaction Stereochemistry, More About Enantio- and Diastereoselectivity	57
3.7	Examples of Asymmetric Syntheses	59
3.7.1	Hydrogenation of the C=O Bond Catalyzed by Chiral Organometallic Complexes	59
3.7.2	Hydrogenation of the C=N Bond Catalyzed by Chiral Organometallic Complexes	61
3.7.3	Asymmetric Alkylation of Stabilized Carbanion	63
	References	66
4	Disconnection with Participation of Two Functional Groups	67
4.1	Introduction	67
4.2	Match and Mismatch of Charges in Bifunctional Molecules	68
4.3	1,3-Dioxygenated Pattern (1,3-CO)	69
4.3.1	1,3-Hydroxycarbonyl Compounds	69
4.3.2	1,3-Dicarbonyl Compounds	79
4.3.3	Concept of Hard and Soft Acids and Bases (HSAB)	81
4.4	1,5-Dicarbonyl Pattern (1,5-CO)	84
4.4.1	From Retrosynthesis to Robinson Annulation	87
4.4.2	Vinyl Ketones via the Mannich Reaction	90
	References	101
5	Illogical Disconnections with Participation of Two Groups	103
5.1	Introduction	103
5.2	1,2-Dioxygenated Pattern (1,2-CO)	104
5.2.1	Illogical Nucleophiles	104
5.2.2	Three-Membered Heterocyclic Rings, Illogical Electrophiles	114
5.2.3	1,2-Dihydroxy Pattern, Vicinal Diols	121
5.3	1,4-Dioxygenated Pattern (1,4-CO)	126
5.3.1	1,4-Dicarbonyl Compounds	126
5.3.2	1,4-Hydroxy Carbonyl Compounds	131
5.4	1,6-Dicarbonyl Pattern (1,6-CO)	133
	References	140

6	Specific Synthetic Methods	143
6.1	Introduction	143
6.2	Multicomponent Reactions	143
6.2.1	General Concept of Multicomponent Reactions	144
6.2.2	Ugi Multicomponent Reactions	145
6.3	Parallel Synthesis and Combinatorial Chemistry	147
6.4	Mechanochemistry in Organic Synthesis	149
6.5	Organic Synthesis Promoted by Microwave Radiation	150
6.6	Syntheses in Ionic Liquids	152
	References	154
7	Retrosynthetic Consideration of Heterocyclic Structures	155
7.1	Introduction	155
7.2	Retrosynthetic Considerations, Examples	156
7.3	Preferred Route to Non-aromatic Cyclic Molecules; the Baldwin Rules	164
	References	171
8	Rearrangements—Synthetic Reactions “Not Liable” to Retrosynthetic Analysis	173
8.1	Introduction	173
8.2	Beckmann Rearrangement	174
8.3	Hofmann Rearrangement	175
8.4	Arndt-Eistert Rearrangement	179
8.5	Favorskii Rearrangement	181
8.6	Pinacol Rearrangement	182
8.7	Baeyer-Villiger Rearrangement	184
	References	187
9	Retrosynthetic Considerations and Syntheses of Complex, Biologically Active Molecules	189
9.1	Introduction	189
9.2	Synthesis of Racemic and (–)- <i>Menthol</i>	190
9.3	Synthesis of Racemic and (1 <i>R</i> ,2 <i>R</i>)- <i>Chloramphenicol</i>	193
9.4	(+)- <i>Sertraline</i> , Interplay of Non-stereoselective and Asymmetric Syntheses	196
9.4.1	Non-stereoselective Synthesis of <i>Sertraline</i>	196
9.4.2	Stereoselective Routes to (+)- <i>Sertraline</i>	197
9.5	Lycoranes, a Goldmine of Pharmaceutical Candidates	201
9.5.1	Polycyclic Framework of Lycoranes	201
9.5.2	Stereoselective Synthesis of Racemic α - and β -Lycorane	202
9.5.3	Asymmetric Synthesis of (+)- γ -Lycorane	207
	References	210

Organic Chemistry from Retrosynthesis to Asymmetric
Synthesis

Šunjić, V.; Petrović Peroković, V.

2016, XIII, 211 p. 378 illus., Hardcover
