

# Table of Contents

---

	About the Authors .....	xiii
<b>1</b>	<b>Introduction</b> .....	1
1.1	Introductory Overview .....	2
1.2	History of Electrophysiology .....	4
	Exercises .....	9
	References .....	9
<b>2</b>	<b>Basics: Theory</b> .....	11
2.1	Electrical Characteristics of Biological Membranes .....	12
2.2	Ion Distribution at Biological Membranes .....	13
2.3	Donnan Distribution and Nernst Equation .....	14
2.3.1	Donnan Distribution .....	14
2.3.2	Nernst Equation .....	16
2.4	Goldman-Hodgkin-Katz Equation .....	17
	Exercises .....	20
	References .....	21
<b>3</b>	<b>Basics: Methods</b> .....	23
3.1	Recording Electrical Signals from the Body Surface .....	24
3.2	Example (ECG) .....	26
3.2.1	Electrophysiological Basics .....	26
3.2.2	Activation of the Heart Muscle .....	28
3.3	Recording Electrical Signals from Tissue .....	29
3.3.1	Intracardiac Electrograms .....	29
3.3.2	The Ussing Chamber .....	29
3.3.3	Recording from the Brain .....	30
3.3.4	Recording Extracellular Field Potentials with Multi-Electrode Arrays .....	31
3.4	Recording Electrical Signals from Single Cells .....	32
3.4.1	The Ag/AgCl Electrode .....	32
3.4.2	The Microelectrode .....	33
3.4.3	Ion-Selective Microelectrodes .....	33
3.4.4	The Carbon Fibre Technique .....	36
3.4.5	Basics of Voltage Clamp .....	38
3.4.6	Noise in Electrophysiological Measurements .....	42
3.5	Application of the Voltage-Clamp Technique .....	46
3.5.1	Different Versions of the Voltage-Clamp Technique .....	46
3.5.2	Analysing Current Fluctuations .....	49
3.5.3	Analysing Transient Charge Movements (Gating Currents) .....	51
3.6	The Patch-Clamp Technique .....	51
3.6.1	Different Versions of Patch Clamp (Patch Conformations) .....	52
3.6.2	Advantages of the Different Patch Conformations .....	53
3.6.3	The Single-Channel Current and Conductance .....	56
3.6.4	The Sniffer-Patch Method .....	59

	<b>Exercises</b> .....	60
	<b>References</b> .....	61
<b>4</b>	<b>Automated Electrophysiology</b> .....	63
4.1	<b>Automated Two-Electrode Voltage Clamp</b> .....	64
4.2	<b>Automated Patch Clamp</b> .....	66
	<b>Exercises</b> .....	67
	<b>References</b> .....	67
<b>5</b>	<b>Ion-Selective Channels</b> .....	69
5.1	<b>General Characteristics of Ion Channels</b> .....	70
5.1.1	Selectivity of Ion Channels .....	70
5.1.2	Discrete Movement of Ions through Pores .....	73
5.2	<b>Specific Ion Channels</b> .....	75
5.2.1	The Na <sup>+</sup> Channel (A Single-Ion Pore) .....	75
5.2.2	The K <sup>+</sup> Channel (A Multi-Ion Pore) .....	76
5.2.3	The Ca <sup>2+</sup> Channel (A Multi-Ion Pore) .....	78
5.2.4	Anion-Selective Channels .....	78
	<b>Exercises</b> .....	79
	<b>References</b> .....	79
<b>6</b>	<b>Theory of Excitability</b> .....	81
6.1	<b>The Hodgkin-Huxley Description of Excitation</b> .....	82
6.1.1	Experimental Basics .....	82
6.1.2	The Hodgkin-Huxley (HH) Description of Excitability .....	85
6.1.3	The Action Potential .....	89
6.2	<b>Continuous and Saltatory Conduction of Action Potentials</b> .....	91
6.2.1	The Electrotonic Potential .....	91
6.2.2	The Continuous Spread of an Action Potential .....	94
6.2.3	The Saltatory Spread of an Action Potential .....	95
6.3	<b>Generation and Transmission of Action Potentials</b> .....	96
6.3.1	Generation .....	96
6.3.2	Transmission .....	96
6.4	<b>Summary of Different Types of Potentials</b> .....	98
6.4.1	Surface Potential .....	98
6.5	<b>Action Potential in Non-Nerve Cells</b> .....	99
6.5.1	Skeletal Muscle .....	99
6.5.2	Smooth Muscle .....	99
6.5.3	Heart Muscle .....	100
6.5.4	Plant Cells .....	101
	<b>Exercises</b> .....	102
	<b>References</b> .....	102
<b>7</b>	<b>Carrier-Mediated Transport</b> .....	105
7.1	<b>General Characteristics of Carriers</b> .....	106
7.1.1	Distinction between Pores and Carriers .....	106
7.1.2	The Oocytes of <i>Xenopus</i> : A Model System .....	107

7.1.3 The Anion Exchanger ..... 109

7.1.4 The Sodium Pump ..... 111

7.1.5 The Neurotransmitter Transporter GAT1 ..... 114

7.2 Carriers Are Like Channels with Alternating Gates ..... 115

Exercises ..... 117

References ..... 117

  

**8 Examples of Applications of Electrophysiology ..... 119**

8.1 Structure-Function Relationships of Carrier Proteins ..... 120

8.1.1 The Na<sup>+</sup>,K<sup>+</sup>-ATPase ..... 120

8.1.2 The Na-Dependent GABA Transporter (GAT1) ..... 122

8.2 Structure-Function Relationships of Ion Channels ..... 123

8.2.1 Families of Various Ion Channels ..... 123

8.2.2 ATP-Gated Cation Channel (ACC) Family ..... 126

8.2.3 Experimental Results ..... 127

8.3 Viral Ion Channels ..... 130

8.3.1 The 3a Protein of the Coronavirus ..... 133

8.3.2 The Viral Protein Unit (Vpu) of HIV-1 ..... 135

8.3.3 The M2 (Matrix Protein 2) Protein of the Influenza A Virus ..... 136

Exercises ..... 138

References ..... 138

  

**9 Appendix ..... 139**

9.1 Graph Theory ..... 140

9.2 Influence of External Electrical and Magnetic Fields on Physiological Function ..... 141

9.2.1 Magnetostatic Fields ..... 142

9.2.2 Electrostatic Fields ..... 143

9.2.3 Electromagnetic Fields ..... 145

9.3 A Laboratory Course: Two-Electrode Voltage-Clamp (TEVC) ..... 146

9.3.1 Motivation ..... 146

9.3.2 Background ..... 147

9.3.3 Questions to be Answered for the Course ..... 150

9.3.4 Set-Up and Basic Instructions ..... 151

9.3.5 Experiments and Data Analysis ..... 152

References ..... 156

  

**Backmatter ..... 159**

Index ..... 160

Electrophysiology

Basics, Modern Approaches and Applications

Rettinger, J.; Schwarz, S.; Schwarz, W.

2016, XIII, 162 p. 158 illus. in color., Hardcover

ISBN: 978-3-319-30011-5
