Foreword	v
Preface	vii
Acknowledgements	xi
About the Editor	xiii
Contributors	xv
Part I Profit-Driven Environmental Responsibility in Supply Chains: Motives	
1 Consumer Markets in Closed-Loop Supply Chains	3
James D. Abbey and V. Daniel R. Guide Jr.	
1.1 Introduction to Closed-Loop Supply Chains for Consumer Products	4
1.1.1 Closed-Loop Supply Chain Processes and Flows....	4
1.1.2 Understanding Remanufactured Product Markets ..	5
1.1.3 Putting the Process and Market Together	6
1.2 State of Research in Closed-Loop Supply Chains	6
1.2.1 Product Reacquisition and the Marginal Value of Time	7
1.2.2 Returns Management	7
1.2.3 Design for Reuse and Remanufacturing	8
1.2.4 The Market for Remanufactured Consumer Products.....	9
1.2.5 Matching Supply and Consumer Demand in Closed-Loop Supply Chains	10

1.3	Delving Deeper: Understanding the Fundamental Drivers of Remanufactured Products Preferences	10
1.3.1	Fundamental Studies into Remanufactured Product Perceptions	10
1.3.2	Combining Theory and Fundamental Studies	12
1.3.3	Advancing the Experimental Design: Combining Effects to Isolate Consumer Segments	14
1.4	Continuing Needs for Research and the Environment	15
1.5	Concluding Remarks	16
	References	16
2	Market Behavior Towards Remanufactured Products	19
	Necati Tereyağöglu	
2.1	Introduction	19
2.2	Unobservable Remanufacturing Processes	21
2.3	Factors Influencing the Valuation of Remanufactured Products	22
2.4	Buyer Safeguards Influencing Market Behavior Toward Remanufactured Products	24
2.5	Impact of Remanufactured Products on New Product Valuations	25
2.6	Conclusions	27
	References	28
3	Assessing Consumers' Valuations of Socially Responsible Products with Controlled Experiments	29
	Yanchong Zheng, Tim Kraft, and León Valdés	
3.1	Introduction	29
3.2	Marketing and Economic Studies on Consumers' Valuations of Sustainability	30
3.3	Supply Chain Transparency and Social Responsibility: A Controlled Laboratory Experiment	33
3.3.1	Experimental Design	35
3.3.2	Experimental Results	38
3.3.3	Managerial Implications	43
3.4	Future Directions	44
3.5	Conclusion	48
	References	48
 Part II Profit-Driven Environmental Responsibility in Supply Chains: Opportunities		
4	By-Product Synergy: Productively Using Waste in Joint Production Operations	53
	Deishin Lee	
4.1	Introduction	53
4.2	Waste	54

4.3	By-Product Synergy	56
4.3.1	By-Product Synergy in a Manufacturing Setting . . .	59
4.3.2	By-Product Synergy in a Service Setting	61
4.3.3	By-Product Synergy in a Retail Setting	62
4.4	Rethinking the Way We Make Things	64
4.5	Conclusion	68
	References	69
5	Responsible Sourcing	71
	Vishal V. Agrawal and Deishin Lee	
5.1	Introduction	71
5.2	Challenges of Responsible Sourcing	74
5.2.1	Multidimensional Sourcing Criteria	74
5.2.2	Multilateral Coordination	75
5.2.3	Contracting Issues	76
5.2.4	Additional Stakeholders	76
5.3	Mechanisms for Responsible Sourcing	76
5.3.1	Multidimensional Sourcing Criteria	77
5.3.2	Multilateral Coordination	78
5.3.3	Contracting Issues	80
5.3.4	Additional Stakeholders	83
5.4	Conclusion	84
	References	85
6	The Impact of Supply Chain Structures on Corporate Social Responsibility	87
	Paolo Letizia	
6.1	Introduction	87
6.2	The Theory of Property Rights (PR)	89
6.3	The Model	91
6.3.1	A Simple Example	92
6.4	Business Applications	95
6.4.1	Horizontal Alliances: The Case of Poultry Farmers in the Netherlands	96
6.4.2	Forward Integration: The Case of FrieslandCampina	99
6.4.3	Backward Integration: The Case of Starbucks Corporation	102
6.5	Conclusions	105
	Appendix	106
	The Use of the Shapley Value in Cooperative Game Theory	106
	References	106

7	Servicizing in Supply Chains and Environmental Implications	109
	Vishal V. Agrawal and Ioannis Bellos	
7.1	Introduction	110
7.2	Operational Taxonomy of Servicizing Business Models	112
7.3	The Green Potential of Servicizing(?)	115
7.3.1	Pay-per-Use Pricing	116
7.3.2	Resource Pooling	117
7.3.3	Product Design	117
7.3.4	Product Stewardship	118
7.3.5	Rebound Effect	119
7.4	The Challenges of Servicizing the Supply Chain	120
7.5	Conclusions	122
	References	123

Part III Profit-Driven Environmental Responsibility in Supply Chains: Operational Perspectives

8	Bike-Share Systems	127
	Ashish Kabra, Elena Belavina, and Karan Girotra	
8.1	Introduction	128
8.2	Model	130
8.2.1	Single-Station Analysis	133
8.3	Empirical Analysis	133
8.3.1	Data Description	134
8.3.2	Empirical Model	135
8.3.3	Results	137
8.4	Implications	137
8.4.1	Effect of Demand Asymmetry	137
8.4.2	Effect of Travel Time Between Stations	138
8.4.3	Effect of Uncertainty of Demand	139
8.4.4	Number of Docks	139
8.4.5	Station Locations	140
8.4.6	Bike Availability	140
8.4.7	Balancing the Demands of Accessibility and Availability	141
8.5	Conclusion and Future Directions	142
	References	142
9	Biofuel Supply Chain Network Design and Operations	143
	Michael K. Lim and Yanfeng Ouyang	
9.1	Introduction	143
9.2	Biofuel Supply Chain	146
9.2.1	Stages of Biofuel Supply Chain	147
9.2.2	Logistics	149
9.2.3	Supply and Demand	150

9.3	Models of Biofuel Network Design and Operations	151
9.3.1	Logistics Network	151
9.3.2	Transportation and Inventory Management	153
9.3.3	Uncertainties	154
9.3.4	Land Use Change and Competition	155
9.3.5	Environmental and Social Impacts	157
9.3.6	Governmental Policies	158
9.4	Conclusion	158
	References	159
10	Capacity Investment Decisions in Renewable Energy Technologies	163
	Mark E. Ferguson, Shanshan Hu, Gilvan C. Souza, and Wenbin Wang	
10.1	Introduction	164
10.2	Investment Decision of a Nonrenewable Energy Producing Technology	165
10.2.1	Conversion to a Single-Period Problem	167
10.2.2	Example Application: Decision of Generator Capacity at a Bank Branch	169
10.3	Investment of Energy-Producing Renewable Technology	171
10.3.1	Conversion to a Single-Period Problem	172
10.3.2	Application 2: Solar Photovoltaic (PV) System in a Bank Branch	172
10.4	Conclusions	175
	References	176
 Part IV Regulation-Driven Environmental Responsibility in Supply Chains: Motives and Opportunities		
11	Owls, Sheep and Dodos: Coping with Environmental Legislation	179
	Atalay Atasü, Luk N. Van Wassenhove, and Douglas Webber	
11.1	Introduction	179
11.2	The Times they are A-Changing: Trends in Environmental and e-Waste Legislation	181
11.3	A Strong Wind or a Perfect Storm? How Exposure to Environmental Legislation Risks Varies	184
11.4	Owls, Sheep, and Dodos: Some Firms are Politically More Competent than Others	186
11.4.1	Dodos	187
11.4.2	Sheep	188
11.4.3	Owls	190
11.5	What Makes a Firm an Owl?	191
11.6	Conclusions	195
	References	196

12 Ignore, Avoid, Abandon, and Embrace: What Drives Firm Responses to Environmental Regulation?	199
David F. Drake and Robin L. Just	
12.1 Introduction	199
12.2 Production Technology and Environmental Impact	200
12.3 Regulatory Dimensions: Expected Cost of Noncompliance and Asymmetry	203
12.3.1 Expected Cost of Noncompliance	203
12.3.2 Regulatory Asymmetry	204
12.4 Examples of Environmental Regulation Outcomes	206
12.4.1 Expected Cost of Noncompliance is Too Low	206
12.4.2 Expected Cost of Noncompliance is Too High	209
12.4.3 Expected Cost of Noncompliance is On-Target	211
12.5 Decision Framework: Ignore, Avoid, Abandon, and Embrace	214
12.5.1 Decisions Under Compliance-Based Regulation	215
12.5.2 Decisions Under “Pay-to-Pollute” Regulation	216
12.6 Conclusion	217
References	218
13 Strategic Disclosure of Social and Environmental Impacts in a Supply Chain	223
Basak Kalkanci, Erjie Ang, and Erica L. Plambeck	
13.1 Introduction	224
13.2 The Rationale for Mandatory Disclosure	225
13.3 Model Formulation	227
13.4 Experimental Results	228
13.4.1 Greenhouse Gas Emissions	228
13.4.2 Conflict Materials	229
13.5 Analytical Results	231
13.6 Conclusion	234
Appendix	236
Firms’ Consumer Trust Ratings Under Different Scenarios	236
Surveys for GHG Emissions and Conflict Minerals	237
References	238
14 The Effect of EPR on the Markets for Waste	241
Gökçe Esenduran and Atalay Atasü	
14.1 Introduction	241
14.2 Waste Markets Dynamics	243
14.3 Waste Markets	245
14.4 Challenges in EPR Implementations	247
14.4.1 Competition Against Local Recyclers	248
14.4.2 Global Competition for Waste	250

14.4.3	Competition Against Third-Parties and Secondary Markets	252
14.5	Conclusions	254
	References	255

Part V Regulation-Driven Environmental Responsibility in Supply Chains: Operational Perspectives

15	Emissions Allocation Problems in Climate Change Policies	261
	Nur Sunar	
15.1	Overview of the Chapter	261
15.2	Background on Climate Change Policies in the World and Social Cost of Carbon	262
15.2.1	State of the Climate Change Policies in the World	262
15.2.2	Measuring the Social Impact of Emissions: Social Cost of Carbon	265
15.3	Emissions Allocation in Co-production Systems	266
15.4	Emission Allocation Among Supply Chain Players	270
15.5	Emission Allowance Allocation in Cap-and-Trade Markets ..	272
15.5.1	Free Allowance Allocation in the EU ETS	273
15.5.2	Why is Free Allowance Allocation Important?	274
15.6	Emissions Allocation in the Context of Voluntary Actions to Improve Environmental Impact	276
15.7	Summary and Concluding Remarks	280
	References	281
16	Variability in Emissions Cost: Implications for Facility Location, Production and Shipping	283
	Özge İşlegen, Erica L. Plambeck, and Terry A. Taylor	
16.1	Introduction	284
16.2	Model Formulation	287
16.3	Analytical Results	288
16.3.1	The Impact of Instituting a Climate Policy	290
16.3.2	The Impact of Variability in Emissions Cost	292
16.4	Numerical Analysis for the U.S. Southwest Cement Industry	294
16.5	Conclusion	296
	Appendix	297
	References	310
17	Managing the Chemicals and Substances in Products and Supply Chains	313
	Tim Kraft, Özgen Karaer, and Kathryn Sharpe	
17.1	Introduction	313

- 17.2 Challenges to Chemicals Management in Supply Chains 315
- 17.3 A Review of the Relevant Literature 317
- 17.4 GreenBlue and Material IQ 319
 - 17.4.1 Model Overview 320
 - 17.4.2 Buyer’s Perspective 322
 - 17.4.3 GreenBlue’s Perspective 327
 - 17.4.4 Model Summary 330
- 17.5 Future Research Directions 331
- 17.6 Conclusion 333
- References 334

- 18 Design Implications of Extended Producer Responsibility**
- Legislation** 339
- Luyi Gui, Ximin (Natalie) Huang, Atalay Atasu,
and L. Beril Toktay
- 18.1 Introduction 339
- 18.2 An Overview of EPR Implementations 342
- 18.3 A Benchmark Case 344
- 18.4 Trade-offs Between Design Alternatives 345
- 18.5 Design Incentives Under Collective EPR Implementations:
The Impact of Market Competition 347
- 18.6 Design Incentives Under Collective EPR Implementations:
Cost Allocation and Network Effects 352
- 18.7 Conclusion 356
