

# Contents

## Invited Paper

What Do We Know and How Well Do We Know It? Current Knowledge About Software Engineering Practices . . . . .	3
<i>David Budgen</i>	

## Software Paradigm Trends

Filtered Model-Driven Product Line Engineering with SuperMod: The Home Automation Case. . . . .	19
<i>Felix Schwägerl, Thomas Buchmann, and Bernhard Westfechtel</i>	
A Semantic Versioning Service Based on Formal Certification . . . . .	42
<i>Jean-Yves Vion-Dury and Nikolaos Lagos</i>	
An Eclipse IDE for Teaching Java-. . . . .	63
<i>Lorenzo Bettini and Pierluigi Crescenzi</i>	
Supporting Privacy Impact Assessments Using Problem-Based Privacy Analysis. . . . .	79
<i>Rene Meis and Maritta Heisel</i>	
Integrating Model Driven and Model Checking to Mine Design Patterns . . . .	99
<i>Mario L. Bernardi, Marta Cimitile, Giuseppe De Ruvo, Giuseppe A. Di Lucca, and Antonella Santone</i>	
R-UML: An UML Profile for Verification of Flexible Control Systems . . . . .	118
<i>Mohamed Oussama Ben Salem, Olfa Mosbahi, Mohamed Khalgui, and Georg Frey</i>	
Invariant Implementation for Domain Models Applying Incremental OCL Techniques. . . . .	137
<i>Alberto-Manuel Fernández-Álvarez, Daniel Fernández-Lanvin, and Manuel Quintela-Pumares</i>	
An Ontological Analysis of a Proposed Theory for Software Development. . .	155
<i>Diana Kirk and Stephen MacDonell</i>	

## Software Engineering and Applications

Specifying Business Process Outsourcing Requirements. . . . .	175
<i>Mouna Rekik, Khouloud Boukadi, and Hanene Ben-Abdallah</i>	

Supporting Deviations on Software Processes: A Literature Overview . . . . .	191
<i>Manel Smatti, Mourad Oussalah, and Mohamed Ahmed Nacer</i>	
Protection of Customers' and Suppliers' Knowledge in Software Development Projects with Fixed-Price Contract: Using Property Rights Theory. . . . .	210
<i>Cornelia Gaebert</i>	
GQM-Based Definition and Evaluation of Software Project Success Indicators. . . . .	228
<i>Luigi Lavazza, Enrico Frumento, and Riccardo Mazza</i>	
Dynamic Analysis Techniques to Reverse Engineer Mobile Applications . . . .	250
<i>Philippe Dugerdil and Roland Sako</i>	
Annotating Goals with Concerns in Goal-Oriented Requirements Engineering . . . . .	269
<i>Shinpei Hayashi, Wataru Inoue, Haruhiko Kaiya, and Motoshi Saeki</i>	
A Model-Based Approach for Integrating Executable Architectural Design Patterns in Space Flight Software Product Lines . . . . .	287
<i>Julie Street Fant, Hassan Goma'a, and Robert G. Pettit</i>	
Model Checking Feature Interactions. . . . .	307
<i>Thibaut Le Guilly, Petur Olsen, Thomas Pedersen, Anders P. Ravn, and Arne Skou</i>	
Deriving Tailored UML Interaction Models from Scenario-Based Runtime Tests . . . . .	326
<i>Thorsten Haendler, Stefan Sobernig, and Mark Strembeck</i>	
Documenting and Designing QVTo Model Transformations Through Mathematics . . . . .	349
<i>Ulyana Tikhonova and Tim Willemse</i>	
An Approach for the Automatic Adaptation of Domain-Specific Modeling Languages for Model-Driven Mobile Application Development . . . . .	365
<i>Xiaoping Jia and Christopher Jones</i>	
Automated Testing of Distributed and Heterogeneous Systems Based on UML Sequence Diagrams . . . . .	380
<i>Bruno Lima and João Pascoal Faria</i>	
Guiding Cloud Developers to Build Energy Aware Applications. . . . .	397
<i>Christophe Ponsard, Jean-Christophe Deprez, and Raphael Michel</i>	

SPACES: Subjective sPaces Architecture for Contextualizing hEterogeneous Sources . . . . .	415
<i>Daniela Micucci, Marco Mobilio, and Francesco Tisato</i>	
<b>Author Index</b> . . . . .	431

Software Technologies

10th International Joint Conference, ICSOFT 2015,  
Colmar, France, July 20-22, 2015, Revised Selected  
Papers

Lorenz, P.; Cardoso, J.; Maciaszek, L.A.; van Sinderen, M.  
(Eds.)

2016, XV, 431 p. 174 illus. in color., Softcover

ISBN: 978-3-319-30141-9
