

Contents

1	The Importance of Interdisciplinary Research and Teaching	1
	Defining Interdisciplinarity	1
	Integration	5
	Defining Transdisciplinarity	7
	Defining Multidisciplinarity	8
	Defining Disciplines	9
	The Increased Importance of Interdisciplinary Scholarship	12
	Undiscovered Public Knowledge	14
	Insights from History of Science	15
	Undiscovered Public Knowledge and Literature	
	Based Discovery	16
	Serendipity and Epistemology	17
	Interdisciplinarity and Information Science	18
	Relationship of Interdisciplinarity to Other Discourses	20
	Philosophical Grounding of Interdisciplinarity	22
	Social Context for Interdisciplinarity	23
	Evaluation of Interdisciplinary Research	25
	The León Manifesto	26
	A Brief Note on Digitization	27
	The Rest of the Book	28
	Key Points	28
	References	29
2	The Needs of Interdisciplinary Research	35
	Identifying Interdisciplinary Needs	35
	Needs Justification	35
	Extensions and Clarifications	39
	Classifying by Phenomena	40

Classifying by Relationships Among Phenomena	43
The Present Situation	44
Web of Relations	46
Types of Relationship	47
Summing Up	49
A Typical Example	50
Classifying by Theory Applied	51
Present Practice in General Classifications	52
Summing Up	53
An Example That Adds a Wrinkle	53
Classifying by Method Applied	54
Clarifying Concepts	56
Disciplinary Perspective	58
What About Disciplinarians?	59
Key Points	61
References	62
3 The Nature of Knowledge Organization Systems to Serve	
Interdisciplinarity	65
Knowledge Organization Systems	65
Comprehensive Classification and Domain Analysis	69
Clarifying the Nature of Domain Analysis	70
Linking Domain Analysis to Comprehensive Classification	71
The Need for Both Induction and Deduction	73
Linking Any Two Concepts	76
Capturing the Unique Contributions of a Work	77
Transparent Rules for Computer-Based Searching	80
Shelving Issues	83
Adapt or Innovate?	84
Thesauri	85
Ontologies	86
Key Points	88
References	88
4 Phenomenon Versus Discipline-Based Classification	93
Disciplinary Libraries	93
Previous Attempts at Classifying by Phenomena	96
Why Not Before?	100
The Integrative Levels Classification Project	101
A Comparison Test	104
The Basic Concepts Classification	106
Key Points	108
References	109

5	The Feasibility of Developing Such Knowledge Organization Systems	111
	The Digital Revolution and the Historical Moment	111
	Classifying Comprehensively with Respect to Phenomena	112
	The Feasibility of Classifying Relationships	114
	Classifying with Respect to Theory Applied	116
	Classifying with Respect to Method Applied	120
	Classifying Authorial Perspective	121
	A Hybrid KOS?	123
	Comprehensive Thesaurus	124
	Ontologies	126
	Key Points	126
	References	127
6	Domain Oriented Interdisciplinarity	131
	Challenges in Classifying Interdisciplines	131
	Domain Analysis of Interdisciplines	133
	The Bibliometric Approach	133
	The Terminological Approach	134
	Analysis of Actual KOSs	137
	Concept Mapping	139
	Some Conclusions Regarding the Internal Subject Composition of Interdisciplines	139
	Interdisciplinary Terminological Dynamics	140
	Examining Information Science and Gender Studies	141
	Some Conclusions Regarding Interdisciplinary Terminology	145
	Naming the Categories for Interdisciplinary KOSs	146
	Gender Studies and the Internet	146
	Possibilities of Connecting Interdisciplinary Knowledge to Comprehensive KOSs	147
	Key Points	149
	References	149
7	How to Develop a KOS to Serve Interdisciplinarity	151
	How to Cope with Ambiguity	151
	Phenomena as KOS Units	154
	Principles for Helpful Sequence	156
	Levels of Reality	157
	Emergence and Existential Dependence	158
	General Systems Theory	160
	Facet Analysis	161
	Some Guidelines for Classifying Phenomena	162
	An Example: Economic Phenomena	162
	A Note on Properties	163

Classifying Relationships	164
Classifying Theories, Methods, and Perspectives	167
Key Points	167
References	169
8 Benefits of a Comprehensive Phenomenon-Based	
Classification	171
Advantages for KO and for Interdisciplinary Users	171
Coping with Information Overload	173
Seizing Digital Opportunities	177
Overcoming Classificatory Inertia	182
Key Points	183
References	183
9 Responding to Potential Theoretical Critiques	187
Concepts Can Only Be Comprehended	
Within Disciplines	187
Philosophical Concept Theory	188
The Concept of Democracy	190
Disciplines and Concepts	191
Concepts Can Only Be Appreciated	
Within Theories	192
A Comprehensive Phenomenon-Based KOS Ignores	
the Skeptical Outlook of Our Time	194
It Is Impractical to Shelve All Works on a Particular	
Phenomenon Together	197
Ambiguity Has Its Uses	198
There Are Profound Difficulties in Classifying	
Phenomena	202
There Are Multiple Ways of Subdividing	
Phenomena	203
Possible Conflict Between a Comprehensive KOS	
and Respect for Diversity	205
Key Points	206
References	206
10 Concluding Remarks and the Next Steps	209
Conclusions from Previous Chapters	209
Further Developing Phenomenon-Based	
Classifications	213
A Complementary Thesaurus	215
Revisiting the Empirical Question	215
Classifying Things and Ideas	217
Applying the New Approach Digitally	218

Revisiting Information Retrieval	219
Advocacy	220
Tasks for Scholars of Interdisciplinarity	221
The Wider Implications	221
References	222
Index	223

Interdisciplinary Knowledge Organization

Szostak, R.; Gnoli, C.; López-Huertas, M.

2016, XVII, 227 p. 6 illus., 5 illus. in color., Hardcover

ISBN: 978-3-319-30147-1
