

Contents

Keynote Talks

Optimization Problems in Infrastructure Security	3
<i>Evangelos Kranakis and Danny Krizanc</i>	
Secure Distributed Computation on Private Inputs	14
<i>Geoffroy Couteau, Thomas Peters, and David Pointcheval</i>	

RFID, Sensors and Secure Computation

Survey of Distance Bounding Protocols and Threats	29
<i>Agnès Brelurut, David Gerault, and Pascal Lafourcade</i>	
Inferring Touch from Motion in Real World Data	50
<i>Pascal Bissig, Philipp Brandes, Jonas Passerini, and Roger Wattenhofer</i>	
Point-Counting Method for Embarrassingly Parallel Evaluation in Secure Computation.	66
<i>Toomas Krips and Jan Willemson</i>	

Security Policies and Biometrics

Security Mechanisms Planning to Enforce Security Policies	85
<i>Anis Bkakria, Frédéric Cuppens, Nora Cuppens-Boulahia, and David Gross-Amblard</i>	
Runtime Enforcement with Partial Control	102
<i>Raphaël Khoury and Sylvain Hallé</i>	
Privacy-Preserving Fuzzy Commitment for Biometrics via Layered Error-Correcting Codes	117
<i>Masaya Yasuda, Takeshi Shimoyama, Narishige Abe, Shigefumi Yamada, Takashi Shinzaki, and Takeshi Koshiba</i>	

Evaluation of Protocols and Obfuscation Security

Performance Evaluations of Cryptographic Protocols Verification Tools Dealing with Algebraic Properties	137
<i>Pascal Lafourcade and Maxime Puy</i>	
AnBx: Automatic Generation and Verification of Security Protocols Implementations	156
<i>Paolo Modesti</i>	

Evaluating Obfuscation Security: A Quantitative Approach.	174
<i>Rabih Mohsen and Alexandre Miranda Pinto</i>	

Spam Emails, Botnets and Malware

Fast and Effective Clustering of Spam Emails Based on Structural Similarity.	195
<i>Mina Sheikhalishahi, Andrea Saracino, Mohamed Mejri, Nadia Tawbi, and Fabio Martinelli</i>	

A Closer Look at the HTTP and P2P Based Botnets from a Detector's Perspective.	212
<i>Fariba Haddadi and A. Nur Zincir-Heywood</i>	

Obfuscation Code Localization Based on CFG Generation of Malware	229
<i>Nguyen Minh Hai, Mizuhito Ogawa, and Quan Thanh Tho</i>	

Short Papers

Runtime Monitoring of Stream Logic Formulae	251
<i>Sylvain Hallé and Raphaël Khouiry</i>	

MIME: A Formal Approach to (Android) Emulation Malware Analysis.	259
<i>Fabio Bellini, Roberto Chiodi, and Isabella Mastroeni</i>	

Information Classification Enablers	268
<i>Erik Bergström and Rose-Mharie Åhlfeldt</i>	

Information Flow Control on a Multi-paradigm Web Application for SQL Injection Prevention.	277
<i>Meriam Ben-Ghorbel-Talbi, François Lesueur, and Gaetan Perrin</i>	

Searchable Encryption in Apache Cassandra.	286
<i>Tim Waage, Ramaninder Singh Jhaggi, and Lena Wiese</i>	

AndroSSL: A Platform to Test Android Applications Connection Security . . .	294
<i>François Gagnon, Marc-Antoine Ferland, Marc-Antoine Fortier, Simon Desloges, Jonathan Ouellet, and Catherine Boileau</i>	

Onion Routing in Deterministic Delay Tolerant Networks	303
<i>Adrian Antunez-Veas and Guillermo Navarro-Arribas</i>	

Security Enforcement by Rewriting: An Algebraic Approach	311
<i>Guangye Sui and Mohamed Mejri</i>	

Author Index	323
-------------------------------	-----

Foundations and Practice of Security
8th International Symposium, FPS 2015,
Clermont-Ferrand, France, October 26-28, 2015,
Revised Selected Papers
Garcia-Alfaro, J.; Kranakis, E.; Bonfante, G. (Eds.)
2016, XII, 323 p. 51 illus. in color., Softcover
ISBN: 978-3-319-30302-4
