Contents

1 Methodological Aspects 1
1 Why Conduct This Research? 2
2 Methods and Assumptions 3

2 Population Behavior and Land Occupation Trends 5
1 The Ecoregional Approach 6
1.1 Andean Ecoregion 7
1.2 Amazon Ecoregion 7
1.3 Dry Chaco Ecoregion 8
1.4 Paraná-La Plata Ecoregion 9
1.5 Mexican Plateau Ecoregion 10
1.6 Central American Cordillera Ecoregion 10
2 Population Behavior, Land Occupation Trends, and Water in the Andean Ecoregion (Ecuador, Colombia, Venezuela, Peru, Bolivia, Chile, Part of Argentina) 10
3 Population Behavior, Land Occupation Trends, and Water in the Amazon Ecoregion (Mainly Brazil and Parts of Bolivia, Colombia, and Peru) 17
4 Population Behavior, Land Occupation Trends, and Water in the Dry Chaco Ecoregion (Mainly Paraguay and Parts of Bolivia and Argentina) 18
5 Population Behavior, Land Occupation Trends, and Water in the Paraná-La Plata Ecoregion (Mainly Uruguay and Parts of Argentina and Paraguay) 20
6 Central American Cordillera Ecoregion (Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panamá and Part of Mexico) 22
7 Mexican Plateau Ecoregion (Mexico) 27
8 Conclusions 30

3 The State of Water Sources 33
1 Water Availability in Latin America 34
2 Water Availability in Andean Ecoregion (Bolivia, Colombia, Ecuador, Peru, Chile, Venezuela, Parts of Argentina) 38
3 Water Availability in Amazon (Mainly Brazil), Dry Chaco (Mainly Paraguay), and Paraná-La Plata (Mainly Argentina and Uruguay) Ecoregions 39
4 Water Availability in Central American Cordillera (Mainly Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama) and Mexican Plateau Ecoregions (Mainly Mexico) 40
5 Per Capita Water Availability in Latin America 43
6 People and Water 44
7 Climate Change and Water 49
8 Virtual Water 55
9 Conclusions 56

4 Water Supply, Sanitation, Energy, and Industrial Constraints 59
1 Access to Urban and Rural Drinking Water and Sanitation in the Andean Ecoregion 61
1.1 Ecuador 61
1.2 Colombia 61
1.3 Venezuela 62
1.4 Peru 62
1.5 Bolivia 62
1.6 Chile 63
2 Access to Urban and Rural Drinking Water and Sanitation in Amazon Ecoregion 63
2.1 Brazil 63
3 Access to Urban and Rural Drinking Water and Sanitation in Dry Chaco and Paraná-La Plata Ecoregions 64
3.1 Paraguay 64
3.2 Argentina 65
3.3 Uruguay 66
4 Access to Urban and Rural Drinking Water and Sanitation in Central American Cordillera Ecoregion 66
4.1 Costa Rica 66
4.2 El Salvador 66
4.3 Nicaragua 67
4.4 Guatemala 68
4.5 Honduras 68
4.6 Panama 68
5 Access to Urban and Rural Drinking Water and Sanitation in Mexican Plateau Ecoregion 69
5.1 Mexico 69
6 Latin American Situation and Trends 69
7 Conclusions 85

5 Quality, Sustainability, and Investment Levels 89
1 Ecosystem Services and Their Role in Water Supply and Basin Management 91
2 Water Withdrawal, Income, and Consumption 95
3 Impact of Water Quality in Andean Ecoregion (Ecuador, Colombia, Venezuela, Peru, Bolivia, Chile, and Parts of Argentina) 99
4 Impact of Water Quality in Amazon Ecoregion (Brazil, Parts of Colombia, Peru, and Bolivia) 100
5 Impact of Water Quality in Dry Chaco Ecoregion (Paraguay, Parts of Bolivia, and Argentina) 100
6 Impact of Water Quality in Paraná-La Plata Ecoregion (Uruguay, Parts of Argentina, and Paraguay) 101
7 Impact of Water Quality in Central American Cordillera Ecoregion (Panama, El Salvador, Guatemala, Honduras, Nicaragua, Costa Rica, and Parts of Mexico) 102
8 Impact of Water Quality in the Mexican Altiplano Ecoregion (Mexico) 103
9 Quality of Services in Latin America 103
10 Sustainability of Services in Latin America 104
11 Investment in Basins, Water, and Sanitation 107
12 Costs of Water Supplies and Sanitation in Latin America 112
12.1 Mexico: Investment Costs of Supplying Water 112
12.2 Ecuador: Rural Water Supply Costs 112
12.3 Bolivia: Urban Water Supply Costs 114
12.4 Paraguay: Costs of Water Supplies and Sanitation in Rural Indigenous Areas 116
12.5 Honduras: Urban Informal Water Costs 117
13 Private Investment in Latin America 117
14 Investment Requirements in Latin America 118
15 Conclusions 119

6 Governance, Planning, Capacities, and Management Models 123
1 Key Water Management Models Conceptual Framework 123
2 Water Governance, Sector Planning, and Management Models in Latin America 125
3 Case: Las Amunas de Huarochirí: Recharging the Aquifers in the Andes 125
4 Case: The PDRS Project 126
5 Water and Sanitation Value Chain 126
6 Water Supply and Sanitation Capacity Management 127
7 Human Resource Weaknesses 128
8 Investment Dysfunctions 129
9 Regulation 130

10 Water Supply and Sanitation Management Models in Latin America 130
10.1 Corporate State Model 130
10.2 Corporate Municipal Model 130
10.3 Rural Community Model 131
10.4 Urban Community Model 131
10.5 Urban Informal Water Supply Provision 131
11 Basin, Water Supply, and Sanitation Governance in Latin America 131
12 Water Governance and Legislative Framework in Latin America 133
13 Water Management Roles in Latin America 140
14 Conclusions 143

7 Experiences with Water Supply and Sanitation 145
1 Social Control of Public Policies in Argentina: The Case of the Matanza Riachuelo Basin 145
2 Argentina: The Case of the Water Cooperatives 146
3 Argentina: Privatization of a Water Supply and Sanitation Enterprise 147
4 Bolivia: Chronicle of Privatization Failure Foretold 148
5 Bolivia: A Successful Cooperative Model 149
6 Brazil: The "One Million Rural Water Tanks" Program 150
7 Colombia: Social Programs for Water Supply Services 151
8 Ecuador: Successful Privatization of Drinking Water Services 152
9 Guatemala: Water Supply and Sanitation with a Basin Approach 153
10 Mexico: Water Governance at the Local Level: A Case Study of the Municipality of Zapotitlan de Vadillo, Jalisco 154
11 Peru: The "Water for All" Program 155
12 Peru: Water Supply and Sanitation in the Andes 155
13 Peru: Saving Urban Water Under Market Conditions 156
14 Peru: The Water Group 157
15 Peru: Rural water supply and sanitation with basins approach 158
16 Conclusions 159

8 Policy Recommendations and Project Proposals 161
1 A Policy Framework Proposal for Latin American Countries 162
2 Ensuring the Quality and Quantity of Water Sources 162
2.1 Political Aspects 162
2.2 Organizational Aspects 163
2.3 Physical Aspects 163
2.4 Environmental Aspects 164
2.5 Economic Aspects 165
2.6 Social Aspects 165

3 Providing Urban and Rural Drinking Water Supplies and Sanitation in a Fast and Sustainable Way 166
3.1 Political Aspects 170
3.2 Organizational Aspects 171
3.3 Physical Aspects 172
3.4 Environmental Aspects 172
3.5 Economic Aspects 172
3.6 Social Aspects 173
4 Project Options for Latin American Countries 174

Annexes 187
