

Contents

1	Introduction	1
1.1	Threat Level in Cyberspace	1
1.2	New Challenges for Cybersecurity	2
1.3	Integration of Economic Aspects	5
1.4	Outlook to the Following Chapters	5
2	Foundations of Cybersecurity	7
2.1	History	7
2.2	Cybersecurity Principles	9
2.2.1	Basic Cybersecurity Principles	10
2.2.2	Extended Cybersecurity Principles	13
2.3	Protection Level	21
2.4	Protection Scope	21
2.4.1	Network Segmentation	24
2.4.2	Point-to-Point Encryption	25
2.4.3	Tokenization	26
2.4.4	Outsourcing	27
2.5	Stakeholders of Cybersecurity	29
3	Cybersecurity Safeguards	35
3.1	Distinction of Cybersecurity Safeguards	35
3.2	Common Cybersecurity Safeguards	37
3.2.1	Policies and Procedures	37
3.2.2	Need to Know	39
3.2.3	Separation of Duties	39
3.2.4	Awareness and Training	40
3.2.5	Background Checks	42
3.2.6	Data Classification	43
3.2.7	Revision Control	43
3.2.8	Outsourcing	45
3.2.9	Incident Management	45
3.2.10	Testing	47

3.2.11	Supervising	49
3.2.12	Job Rotation and Vacation	50
3.2.13	Reporting	51
3.2.14	Business Continuity Management.	53
3.2.15	Software Escrow	54
3.2.16	Incident Response	55
3.2.17	Insurances	56
3.2.18	Access Control Systems	57
3.2.19	Application Control	59
3.2.20	Network Security	60
3.2.21	Hardening	62
3.2.22	Secure Software Development	63
3.2.23	Encryption	64
3.2.24	Data Leakage Prevention.	66
3.2.25	Technical Resilience.	67
3.2.26	Malware Protection	68
3.2.27	Intrusion Detection Systems	70
3.2.28	File Integrity Monitoring.	71
3.2.29	Audit Trails.	72
3.2.30	Patch Management.	74
3.2.31	Disaster Recovery	75
3.2.32	Backups	76
3.2.33	Journaling File System	77
4	Economic Aspects	79
4.1	Financial Indicators	79
4.1.1	Static Indicators	82
4.1.2	Dynamic Indicators	88
4.2	Asset Appraisalment	96
4.3	Risk Evaluation	100
4.3.1	Risk Definition	100
4.3.2	Risk Response	102
4.3.3	Risk Management Frameworks	103
4.3.4	Risk Indicators.	123
4.4	Cybersecurity Costs	126
4.4.1	Safeguard Costs	130
4.4.2	Breach Costs	135
4.5	Cybersecurity Benefits	140
5	Foundations of Decision Making.	143
5.1	Motives	143
5.2	Simple Additive Weighting	144
5.3	Analytic Hierarchy Process	146

5.4	Decision Difficulties	149
5.4.1	Cost Aspects	149
5.4.2	Time Aspects	150
5.4.3	Quality Aspects	153
5.4.4	Interdependencies	156
6	Lifecycle of Cybersecurity Investments	159
6.1	Overview of Lifecycle Steps	159
6.2	Initiation	164
6.3	Sponsoring	168
6.4	Decision Problem Identification	171
6.4.1	Strategy Determination	173
6.4.2	Scope Determination	184
6.4.3	Asset Value Measurement	192
6.4.4	Risk Analysis	194
6.4.5	Protection Requirements	198
6.4.6	Adequacy of the Decision Making Technique	200
6.4.7	Involvement of Stakeholders	201
6.5	Attribute Identification	204
6.6	Attribute Evaluation	212
6.7	Alternative Identification	217
6.8	Alternative Evaluation	223
6.8.1	Exclusion Attributes Analysis	225
6.8.2	Comparison Attributes Analysis	227
6.8.3	Sensitivity Analysis	236
6.9	Selection of the Best Alternative	238
6.10	Approval	240
6.11	Planning	246
6.12	Implementation	251
6.13	Closing	256
6.14	Operation	258
6.15	Maintenance	259
6.16	Termination	262
7	Summary	265
7.1	Prerequisite Knowledge	265
7.2	Decision Making Knowledge	270
7.3	Checklist	273
	References	275
	Index	279

Cybersecurity Investments

Decision Support Under Economic Aspects

Beissel, S.

2016, IX, 281 p. 58 illus. in color., Hardcover

ISBN: 978-3-319-30458-8
