# Contents

**1 The Fight Against Corporate Autism in Industrial Companies** ..... 1
A Company's 'How-to-Do' and 'What-to-Do' ..... 3
A Company's Vision and Industrial Marketing ..... 3
Market Paradigms ..... 5
Business Assumptions ..... 7

**2 Misinterpreting Customer Orientation** ..... 11
Introduction ..... 11
Understanding Customer Orientation ..... 16
When Excellence Doesn't Get Past the Hygienic Base ..... 19
When Good Intentions Become Strategic ..... 21
The COP Paradigm: Customer Orientation Through the Product ..... 22
The Customer/Product Relationship ..... 24
Customer Orientation Through the Product (COP) Is Different from the Concept of After-Sale ..... 25
What Does Industrial COP Need in Order To Be Successful? ..... 26
The First Steps to Instituting COP Culture ..... 28

**3 A Conceptual Framework for Understanding Technical Products** ..... 33
Introduction ..... 33
Technical Products: Hidden, Autonomous, Functional ..... 34
When It Comes to Technical Products, Professionalization Is Inevitable ..... 34
The Physical Nature of a Technical Product: Building Awareness in Order to Design a Winner Business Strategy (I) ..... 35
The Ingredient Product ..... 35
The Component Product ..... 36
The Finished Product ..... 37
The Conceptual Nature of a Technical Product: Building Awareness in Order to Design a Winner Business Strategy (II) ..... 39
Understanding How a Product Is Made ..... 39
Understanding What a Product Is ..... 40
Understanding What a Product Does and How It Does It ..... 40

Understanding What a Product Provides for an End-User ..... 41
Understanding What a Product Provides for the Ultimate Customer in the Industrial Chain ..... 41
Commodity Marketing: Strategic Options for Ingredient Product Manufacturer ..... 42
The CCC, or the Chemically Complex Commodity ..... 43
The PTC, or the Periodic Table Commodity ..... 43
The Concept of Technical Product Functionality ..... 45
Product Functionality ..... 45
Technical Product Attributes ..... 49
Intermediation Attributes ..... 50
Usability Attributes ..... 50
Attributes in Case of Externalities ..... 50
Cost Reduction Attributes ..... 51
Performance Enhancing Attributes ..... 51
Self-Protection Attributes ..... 51
Market Applications for Technical Products ..... 52
The Industrial Product and the Technical Standards That Regulate Its Availability and Use ..... 53
A Technical Product's Impact on a Customer's Business ..... 54
Abstract Thinking and the Path to Successful Decommoditization ..... 56
Technical Product Performance ..... 58
The Concept Behind Industrial Product Categories ..... 59
A Technical Product's Life Cycle: Riding on the Back of a Phantom ..... 61

**4 Exploring Industrial Markets** ..... 63
Introduction ..... 63
What Not to Do During Industrial Market Research ..... 67
The Concept Behind Ongoing Market Exploration ..... 69
The Race Against Imitators ..... 69
Identifying Industrial Customers' Needs ..... 71
The Industrial Market Research Process: Getting the Big Picture ..... 74
Customer Needs and Ideas for Solutions ..... 74
Operational Needs ..... 77
Development Needs ..... 78
Organizing Different Customer Needs According to Their Different Applications ..... 79
Environmental Conditions and Product Performance ..... 79
Metrics for Customer Needs ..... 80
The Industrial Chain and Downstream Market Trends ..... 80
The Substitute, or Competitors on the Prowl ..... 81
The Discovery Team: A Multidisciplinary Method for Exploring Industrial Markets ..... 82
What a Discovery Team Is Not ..... 85
How to Manage a Discovery Team ..... 85
The Organizational Structure of a Discovery Team ..... 86

What Does a Discovery Team Do? ..... 86
Stage N°1 on the Discovery Team Road Map. Planning Visits ..... 88
Stating the Objectives of a Visit ..... 88
Out of All the Customers on the Industrial Chain, Which Ones Should a Company Visit? ..... 89
Who Should the Discovery Team Meet with When They Go to the Customer's Facilities? ..... 91
Requesting a Visit ..... 92
Partnering with Other Suppliers on Customer Visits ..... 93
Stage N°2. The Discovery Team in the Field ..... 93
The Interview ..... 94
Questions and Issues to Consider During an Interview ..... 96
Creating a Discussion Guide for Customer Interviews ..... 97
Introduction ..... 97
Assessing Opportunities in a Product's Application ..... 97
Analysis of the Technology-in-Use ..... 98
Metric Assessment ..... 98
Summarizing and Closing the Interview ..... 99
On-Site Observation ..... 99
What Is the DT Looking for During On-Site Observation? ..... 100
What Stage or Process in the Industrial Chain Should Be Observed? ..... 102
How Should the DT Conduct Its Observation and Record Its Findings? ..... 104
Who Should Participate in Field Observation? ..... 105
Debriefing After Each Discovery Team Visit ..... 106
A Discovery Team's Briefing with Company Executives ..... 110
Stage N°3. The Metrics and Technical Specifications of Customer Needs ..... 111
The Economic Benefits to the Customer Metric ..... 113
The Product Performance Metric ..... 115
The Product Design Metric ..... 116
A Discovery Team's Second Briefing with Company Executives. Final Prioritization of Findings ..... 117
Stage N°4. The Discovery Team's Role in New Product Development ..... 118
Stage N°5. The Discovery Team's Role in New Product Introduction ..... 119
Stage N°6. The Discovery Team and Future Product Improvements ..... 120

**5 Industrial Market Segmentation** ..... 123
Introduction ..... 123
Why Should Industrial Companies Segment Their Customers? ..... 125
Segmenting Industrial Markets Based on Product/Service Application ..... 126
Industrial Market Segmentation Based on Customer Purchasing Behavior ..... 130
The Overall Process of Industrial Market Segmentation ..... 131

Stage N°1. Exploring Product Applications at the End-User Level ..... 132
Step One: Choose a Specific Product to Start the Segmentation Program ..... 132
Identify and Diagram a Product's Industrial Chain from Manufacturer to End-User ..... 133
Identify and Characterize a Product's End-User ..... 134
Stage N°2. Analyzing Product Applications ..... 135
Identify a Product's Application ..... 135
Describe Product Applications ..... 136
Stage N°3. What's Required of a Product? Assessing a Product's Functionalities and Attributes ..... 137
Products That Provide Multiple Functionalities Per Application ..... 138
Determine a Product's Functionality and Attribute Metrics ..... 140
Stage N°4. Targeting Market Applications ..... 142
Criteria a Company Needs to Consider When Targeting Market Applications ..... 143
Targeting Market Applications When a Company Has Several Related Product Lines ..... 144
Stage N°5. Adapting a Product to Specific Applications ..... 146
Using Lead-User Research to Inspire Technological Innovation ..... 146
Product Diversification via Related Functionalities and Attributes ..... 148
The Link Between Applications and Standard Industrial Classification ..... 149
Stage N°6. Segmenting Markets According to Customer Purchasing Behavior ..... 149
A New Product Versus a Mature Product ..... 149
The Final Cut: Industrial Customers and Their Individual Circumstances ..... 150

**6 Industrial Product Design and Development** ..... 153
Introduction ..... 153
An Empty Shell: What Happens When a Company Doesn't Develop Products ..... 154
What Does a Company Need in Order to Do Good Product Development? ..... 156
Turning Customer Needs into Product/Service Development ..... 157
Where Needs Arise: The Marketplace Versus the Laboratory ..... 158
A Product Development Program ..... 160
Stage N°1. The Discovery Team's Specification of Application Needs ..... 162
Stage N°2. Planning a Product Development Project ..... 162
The Development Project's Mission Statement ..... 162
The Structure and Organization of a Development Team (New Product Development Team NPDT) ..... 163
Scheduling Interdependent Development Activities ..... 166
The Development Project Budget ..... 168

Stage N°3. Developing, Selecting, and Testing Product Concepts ..... 168
The Stages of Product Concept Development ..... 169
Analyze, Understand and Represent the Needs of Target Application Customers ..... 169
Identify Generic Subsystems or Technological Components in the Product Design ..... 170
Research Existing Solutions for Each Subsystem ..... 171
Organize Sub-systems into Related Groups ..... 171
Concept Selection ..... 172
Concept Testing ..... 174
Stage N°4. Analyzing the Feasibility and Potential Success of a New Product ..... 175
Commercial Feasibility. The First Checkpoint in the Development Process ..... 175
Size and Scope of the Potential Product's Target Application ..... 175
The Economic Benefits to the Customer Metric (EBM) ..... 176
The New Product's Annual Sales Forecast ..... 176
The Structure of the Downstream Industrial Chain and Potential Commercial 'Bottlenecks' That Could Affect the New Product ..... 179
The Ease with Which a Product Can Be Imitated by Competitors ..... 180
The Final Report on Commercial Feasibility. Checkpoint for Deciding Whether to Continue a Project ..... 180
Technological and Production Feasibility: The Second Checkpoint in the Development Process ..... 181
What Raw Materials, Components, and Suppliers Are Needed in Order to Manufacture the New Product? ..... 182
Assessing the Reliability, Performance, Cost, and Volume Availability of the Technologies Needed to Develop a Product ..... 183
Collaborating with Other Businesses on Technology Transfer ..... 183
Necessary Conditions for Production ..... 183
The Final Report on Technological Feasibility. Checkpoint for Deciding Whether to Continue a Project ..... 184
Regulatory Feasibility. Checkpoint for Deciding Whether to Continue a Project ..... 184
Identify Any and All Standards Pertaining to the Product and the Product's Supply Chain ..... 185
Review Any Market-Specific Product Standards ..... 185
Checkpoint for Identifying Any Conflicts Between Product Design and Current Standards ..... 186
Regulatory Feasibility Analysis ..... 186
The Final Report on Regulatory Feasibility. Checkpoint for Deciding Whether to Continue a Project ..... 186
Logistics and Distribution Feasibility ..... 186
Checkpoint for Determining Customers' Logistics Needs ..... 187
Types of Product Distribution to End-Users ..... 188

The Final Report on Logistics and Distribution Feasibility. Checkpoint for Deciding Whether to Continue a Project ..... 189
Economic Feasibility ..... 190
Stage N°5. Determining Product Architecture..... 192
Stage N°6. Things to Consider in the Design for Manufacturability and Serviceability..... 194
Stage N°7. Detailed Design ..... 196
Stage N°8. Prototyping, Tests, and Perfecting the Product..... 197
Stage N°9. Production Planning and Scaling-Up ..... 200

**7 Organizing an Industrial Company's Marketing and Sales Department**..... 203
Introduction..... 203
The Driving Force Behind a Sales Department's Organizational Structure: Specialization ..... 205
A Company's Strategy Statement: An Outline of Where the Company Is Headed ..... 205
Gathering Information from the Field (E.g. Discovery Team©) ..... 206
Designing the Organizational Structure for an Industrial Marketing and Sales Department..... 211
Cross-Selling Technical Products ..... 212
The Sales Engineer ..... 214
The Technical Sales Representative..... 215
The Application Manager ..... 215
The Product Manager..... 216
The Functionality Manager..... 216
The Organizational Structure of an Industrial Sales Force ..... 218
Case 1. Limited Number of Customers, a Small Number of Products, and One or Two Market Applications..... 219
Case 2. Organic Growth Strategy: A Small Number of Products, One or Two Target Applications, and a Growing Number of Customers ..... 220
Case 3. A Growing Number of Products for a Fixed Number of Customers, and a Small Number of Market Applications..... 221
Case 4. A Small Number of Products for a Growing Number of Customers and Applications..... 224
Case 5. A Large Number of Products and Customers, and One or Two Market Applications ..... 225
Case 6. A Large Number of Applications, Customers and Products..... 227
Determining the Right Number of Sales Personnel..... 228
The Organizational Structure of an Industrial Marketing Department..... 231

**8 The Industrial Sales Force** ..... 235
Introduction..... 235
The Purpose of an Industrial Sales Force..... 236
The Industrial Purchasing Process from Beginning to End..... 237

The Industrial Selling Process from Beginning to End ..... 244
The Sales Engineer's Role in After-Sales Management ..... 251
After-Sales Services Implemented by the Sales Engineer ..... 251
After-Sales Services Used as a Profit Center ..... 254
When Companies Misunderstand After-Sales: Doing Business Behind the Customer's Back ..... 256
Consultative Sales Management for Capital Industrial Projects (Capex) ..... 257
Complex Markets ..... 260
Consultative Sales Force Activities That Take Place During The Project Development ..... 263
Detection and Identification of Capex Projects ..... 263
Assessment and Selection of Capex Projects ..... 264
Creation of a Project Map ..... 265
The Importance of the Project Map for Production Planning ..... 265
The Importance of the Project Map for Financial Planning ..... 265
The Importance of the Project Map for Logistics Planning ..... 267
The Importance of the Project Map for the Proposal Department ..... 267
The Importance of the Project Map for Managing a Company's Industrial Marketing ..... 268
The Importance of the Project Map for Providing Activity Forecasts to Senior Management ..... 268
The Importance of the Project Map for Providing Informational Feedback to a Company's Databases ..... 268
The Importance of the Project Map for Managing and Overseeing the Sales Force ..... 269
The Importance of the Project Map for Other Areas Within the Supplier Company ..... 269
The Purchasing Process for Maintenance, Repair, and Operations: Going from a Project Map to a Contract Map (Opex Projects) ..... 269
Joint Customer-Sales Activities That Take Place During Project Development ..... 270
How Many Projects Can a Sales Engineer Manage at Once? ..... 271
The Bidding Stage in a Business Project ..... 271
The Essential Characteristics of Consultative Sales Force Personnel ..... 275
Industrial Sales Force Compensation ..... 276

**9 The Distribution of Technical Products** ..... 281
Introduction ..... 281
It's Costly for Manufacturers to Distribute Their Own Goods ..... 283
The Need to Provide Replacements and Repairs to Users for Whom the Product Is a Crucial Part of Their Operations ..... 283
The Need to Provide a Sales Force and to Communicate with End-User Companies ..... 285

Some Distinguishing Features of Industrial Distribution ..... 285
Evolving from a Conflictive Relationship into a Partnership ..... 286
The Manufacturer's Responsibility to the Distributor ..... 287
The Distributor's Responsibility to the Manufacturer ..... 288
Types of Industrial Distribution ..... 289
A Product Specialist Distributor ..... 289
A Technology Specialist Distributor ..... 292
An Application Specialist Distributor ..... 295
A Generalist Distributor ..... 298
Exclusive Industrial Distribution ..... 301
Multi-Channel Industrial Distribution ..... 304
Parallel Industrial Distribution ..... 306
Selling and Distributing Technical Products Over the Internet ..... 310
Direct Distribution Through Company-Owned Distribution Centers ..... 313
Distributing Industrial Products/Services Through Franchises ..... 315
Important Things to Consider When Designing an Industrial Distribution Channel ..... 318

**10 Industrial Branding** ..... 323
Introduction ..... 323
Different Types of Industrial Brands ..... 326
Industry Brands ..... 327
Corporate Brands ..... 328
Generic Product Brands ..... 329
Product Brands ..... 329
Product Category Brands ..... 331
Distributor Brands ..... 333
Country of Origin (COO) Brands ..... 335
Four Types of Downstream Industrial Chains That Affect Industrial Branding ..... 336
Industrial Branding for Industrial Chains with Fragmented Intermediaries ..... 338
Industrial Branding for Supply Chains with Fragmented End-Users ..... 339
Industrial Branding for Supply Chains with No Downstream Market Fragmentation ..... 343
Industrial Branding for Dual Supply Chains: What to Do When the Same Brand Reaches Both Companies and Individual Consumers ..... 344
The Eight Laws of Industrial Branding ..... 345

**11 Pricing Technical Products** ..... 347
Introduction ..... 347
Common Mistakes in Industrial Price Management ..... 348
Cost-Based Pricing ..... 349
Cost-Based and Competitor-Based Pricing ..... 349

Prices Based on Customers' Purchasing Behavior ..... 350
Prices That Ignore Differences in Product Applications ..... 350
Manipulating Prices in Order to Increase Sales ..... 351
Using the Price as a Tool to Capitalize on Production Capacity (in Markets with Steady Inflation) ..... 351
Companies That Lower Their Prices Even When Their Product/Service Provides Outstanding Performance for a Specific Application ..... 353
A General Model of Price Determination for Technical Products ..... 354
In Search of a Reference Price ..... 355
Common Mistakes in Value-Based Pricing ..... 359
The Limits of Value-Based Pricing ..... 361
Using the Reference Price to Create a Price Band ..... 362
Volume Discounts ..... 365
The Price List for Industrial Products and Services ..... 366
The Price of a Product and the Cost of Its Service Life ..... 368

**12 Introducing New Technical Products into the Market** ..... 371
Introduction ..... 371
Things to Consider Before and During the New Product Introduction Program ..... 373
The Adoption Process: The Stages Leading Up to the Purchase of New Technology ..... 379
The Awareness and Interest Stage ..... 380
The Evaluation and Trial stage ..... 382
Variables That Affect the Success of a New Product Introduction Program ..... 383
An Adaptable Protocol for Difficult or Risky Introduction Scenarios ..... 383
Three Fundamental Stages in a New Product Introduction Program ..... 385
Stage N°1. Pre-Introduction ..... 386
Stage N°2. D-day ..... 418
Stage N°3. Introduction ..... 419
