Part I Nuclear Physics and Radioactivity

1 The Building Blocks of Matter	3
1.1 The Atom and Its Constituents	3
1.1.1 Insight: Viewing the Atoms	5
1.2 The Nucleus	7
1.3 The Periodic Table of the Elements	9
1.4 Nuclear Size and Density	11
1.4.1 Insight: Measuring the Nuclear Radius	12
1.5 The Nuclear Force and the Diagram of Nuclei	15
1.6 Nuclear Masses and Mass Defect	17
1.7 The Mass-Energy Equivalence	19
1.8 Nuclear Binding Energy	22
1.9 The Nuclear Valley of Stability	29
1.10 Nuclear Reactions	30
1.11 Nuclear Abundance	34
References	38
2 Radioactivity and Penetrating Power of Nuclear Radiation	39
2.1 Nuclear Decay	39
2.1.1 α -Decay	40
2.1.2 β^- -Decay	42
2.1.3 β^+ -Decay	43
2.1.4 Electron Capture	44
2.1.5 γ -Decay	45
2.1.6 Internal Conversion	46
2.1.7 Nucleon Emission	46
2.1.8 Spontaneous Fission	46
2.1.9 Summary	47
2.2 The Radioactive Decay Law	47
2.2.1 Activity	49
2.3 Radioactive Families	52

2.4	Sequential Decays.	54
2.5	Accumulation of Decay Products in a Series of Decays	57
2.5.1	Approximate Method for Short Accumulation Times . . .	58
2.6	Penetrating Power of Nuclear Radiation	61
2.7	Dosimetry	64
2.8	Natural and Artificial Radioactivity	68
2.8.1	Natural Radioactivity	68
2.8.2	Artificial Radioactivity	69
2.9	Average Annual Radiation Dose	70
2.10	Biological Effects of Radiation	74
2.11	Applications of Ionising Radiation in Medicine, Research and Industry	76
2.11.1	Medical Applications	76
2.11.2	Research Applications	78
2.11.3	Industrial Applications	79
2.11.4	Radioactive Dating	80
	References	86
3	Nuclear Reactions and Fission	89
3.1	Nuclear Collisions	89
3.2	Cross Section	92
3.2.1	A Convenient Unit for Target Thickness	94
3.3	The Fission Process	96
3.4	Fission Products	99
3.4.1	Energy Released by Nuclear Fission	100
3.5	Fission Induced by Neutron Capture	104
3.5.1	Uranium Fission Cross Section	106
3.6	The Chain Reaction	113
3.7	The Slowing Down of Neutrons	115
3.8	The Thermal Nuclear Reactor	122
3.8.1	The Fuel	122
3.8.2	The Moderator	123
3.8.3	The Absorber	123
3.8.4	The Coolant	123
3.9	The Physics of a Thermal Nuclear Reactor	125
3.10	Reactor Control and Delayed Neutron Emission	128
3.10.1	Reactivity	130
3.11	Fast Reactors	131
3.11.1	Doubling Time	133
3.12	Fuel Burnup	134
3.12.1	Transmutation	135
3.12.2	Plutonium Isotope Production	136
3.12.3	Fission Fragments	137
	References	143

Part II Energy from Nuclear Fission

4	Nuclear Reactors	147
4.1	Classification of Nuclear Reactors	147
4.2	Nuclear Power Plants	148
4.3	Comparison of Various Electricity Generating Technologies	154
4.4	Nuclear Reactor Technologies and Types	156
4.4.1	Light-Water Reactors (LWR)	158
4.4.2	Pressurised Water Reactors (PWR)	158
4.4.3	Boiling Water Reactors (BWR)	159
4.4.4	Pressurised Heavy-Water Reactors (PHWR)	160
4.4.5	Light-Water Graphite-moderated Reactors (LWGR)	161
4.4.6	Gas-Cooled Reactors (GCR)	163
4.4.7	Fast Neutron Reactors (FNR)	164
4.5	Generations of Nuclear Reactors	167
4.6	The Nuclear Fuel Cycle	170
4.6.1	Uranium Mining	171
4.6.2	Uranium Milling	171
4.6.3	Conversion	171
4.6.4	Enrichment	171
4.6.5	Fuel Fabrication	172
4.6.6	Electricity Generation	173
4.6.7	Spent Fuel Storage	174
4.6.8	Reprocessing	174
4.6.9	Spent Fuel and High-level Waste Disposal	174
4.7	Main Fuel Cycles: Open Cycle Versus Closed Fuel Cycle	177
4.8	World Reserves of Nuclear Fuel	179
4.8.1	Uranium Resources	179
4.8.2	Thorium Resources	181
4.8.3	Uranium Demand	182
	References	187
5	Nuclear Safety and Security	189
5.1	Nuclear Safety Regulations	189
5.2	Safety and Radiation Protection Objectives	191
5.3	The Concept of Defence-in-Depth	193
5.4	Reactor Safety	196
5.4.1	Control of the Reactor	196
5.4.2	Removal of Heat Generated in the Core	197
5.4.3	Containing the Radioactivity	198
5.5	Safety in the Design, Operation and Decommissioning	199
5.6	Responsibility for Safety and Regulation	202
5.7	Types of Nuclear Accidents and Accident Management	203
5.8	Previous Experience and Safety Record	203
5.8.1	The International Nuclear Event Scale (INES)	205

5.9	The Nuclear Accidents	209
5.9.1	Kyshtym (1957), Russia	209
5.9.2	Windscale Pile (1957), UK	210
5.9.3	Three Mile Island (1979), USA	210
5.9.4	Saint-Laurent (1980), France	212
5.9.5	Chernobyl (1986), Ukraine	212
5.9.6	Vandellòs (1989), Spain	214
5.9.7	Tokai-Mura (1999), Japan	215
5.9.8	Davis-Besse (2002), USA	215
5.9.9	Paks (2003), Hungary	215
5.9.10	Fukushima Daiichi (2011), Japan	215
5.10	Safety Relative to Other Energy Sources	220
5.11	Nuclear Security and Safeguards	222
	References.	227
6	Management of Radioactive Waste	229
6.1	Types of Radioactive Waste	229
6.1.1	Very Low-Level Waste (VLLW).	231
6.1.2	Low-Level Waste (LLW)	231
6.1.3	Intermediate-Level Waste (ILW).	232
6.1.4	High-Level Waste (HLW).	233
6.2	Composition of Spent Fuel	233
6.3	Amounts of Radioactive Waste Generated by Nuclear Power Plants.	236
6.4	Radioactive Waste Disposal	242
6.5	The Oklo Natural Fission Reactors.	246
6.6	Research on Partitioning and Transmutation.	248
6.6.1	Fast Reactors and Subcritical Reactors Driven by Particle Accelerators.	250
6.6.2	Impact of Partitioning and Transmutation on Geological Disposal	251
	References.	255
	Erratum to: Energy from Nuclear Fission	E1
	Glossary.	257

Energy from Nuclear Fission

An Introduction

De Sanctis, E.; Monti, S.; Ripani, M.

2016, XV, 278 p. 55 illus., Hardcover

ISBN: 978-3-319-30649-0
