

# Contents

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Short Historic Overview</b>  | <b>1</b>  |
| <b>2</b> | <b>Primary Antibodies</b>   | <b>3</b>  |
| 2.1      | Summary   | 8         |
| 2.2      | Quiz  | 9         |
| <b>3</b> | <b>Choosing Commercial Suppliers of Primary Antibodies</b>                          | <b>11</b> |
| 3.1      | Summary   | 13        |
| 3.2      | Quiz  | 14        |
| <b>4</b> | <b>Detection and Visualization of Antigens</b>                                      | <b>15</b> |
| 4.1      | Secondary Antibodies  | 16        |
| 4.2      | Summary   | 18        |
| 4.3      | Quiz  | 19        |
| 4.4      | How to Choose Secondary Antibodies for IHC?   | 19        |
| 4.5      | Summary   | 21        |
| 4.6      | Quiz  | 21        |
| 4.7      | Fluorescent Probes  | 22        |
| 4.8      | Enzyme Conjugates and Their Chromogenic Substrates                                  | 25        |
| 4.9      | Advantages and Disadvantages of Fluorescence<br>and Enzymatic Chromogenic Detection | 26        |
| 4.10     | Summary   | 28        |
| 4.11     | Quiz  | 28        |
| <b>5</b> | <b>Ancillary Reagents for IHC</b>   | <b>29</b> |
| 5.1      | IHC Buffers   | 29        |
| 5.2      | Mounting Media  | 34        |
| 5.3      | Summary   | 35        |
| 5.4      | Quiz  | 36        |

|          |   |           |
|----------|---|-----------|
| <b>6</b> | <b>Preparing Tissues for IHC Staining</b>   | <b>37</b> |
| 6.1      | Tissue Fixation   | 37        |
| 6.1.1    | Cross-Linking Fixatives   | 38        |
| 6.1.2    | Precipitating Fixatives   | 39        |
| 6.1.3    | Perfusion Fixation  | 40        |
| 6.1.4    | Immersion Fixation  | 40        |
| 6.2      | Cutting Tissue Sections   | 41        |
| 6.2.1    | Frozen Tissue Sections  | 43        |
| 6.2.2    | Paraffin-Embedded Tissue Sections   | 45        |
| 6.3      | Summary   | 47        |
| 6.4      | Quiz  | 47        |
| <b>7</b> | <b>Staining Protocols</b>   | <b>49</b> |
| 7.1      | Fluorescence Protocols  | 50        |
| 7.1.1    | Direct Fluorescence Detection   | 50        |
| 7.1.2    | Indirect Fluorescent Detection  | 51        |
| 7.1.3    | Multi-Color Fluorescence Detection  | 51        |
| 7.1.4    | Fluorescent Counterstaining   | 52        |
| 7.2      | Chromogenic Protocols   | 53        |
| 7.2.1    | LSAB Detection  | 53        |
| 7.2.2    | ABC Detection   | 54        |
| 7.2.3    | Non-Biotin-Based Detection  | 55        |
| 7.2.4    | Counterstaining in Chromogenic Detection  | 55        |
| 7.3      | IHC Controls  | 56        |
| 7.3.1    | Tissue Antigen Controls   | 56        |
| 7.3.2    | Endogenous Tissue Condition Controls  | 57        |
| 7.3.3    | Reagents Controls   | 58        |
| 7.4      | Selection and Optimizaion of Primary Antibodies                                       | 59        |
| 7.5      | Summary   | 60        |
| 7.6      | Quiz  | 61        |
| <b>8</b> | <b>Microscopy Examination and Collection of Digital Images and Their Presentation</b> | <b>63</b> |
| 8.1      | Operating a Bright-Field Microscope and Collecting IHC Images                         | 63        |
| 8.2      | Operating Fluorescence Microscope and Collecting IHC Images                           | 68        |
| 8.3      | Presenting Immunohistochemistry Data  | 70        |
| 8.4      | Summary   | 73        |
| 8.5      | Quiz  | 73        |

|                                       |           |
