## Part I Preparation and Characterization of Metal Nanoparticles in Solutions

<b>1</b>	<b>Methods of the Nanoparticle Preparation in Solutions</b>	<b>3</b>
1.1	Introductory Remarks	3
1.2	Principles Used for the Choice of Methods	5
1.3	Chemical Synthesis with Traditional Reducing Agents	7
1.3.1	General Considerations	8
1.3.2	Synthesis in Water Solution	9
1.3.3	Synthesis in a Two-Phase System and in Non-aqueous Solutions	24
1.3.4	Synthesis in Reverse Micelles	34
1.4	Photo and Radiation-Chemical Synthesis	45
1.5	Electrochemical Synthesis	56
1.6	Biological Reduction in Water Solution	60
1.7	Summary	74
<b>2</b>	<b>Biochemical Synthesis of Metal Nanoparticles</b>	<b>79</b>
2.1	Prerequisites of the Method	79
2.1.1	General Information on the Properties of Flavonoids	80
2.1.2	AOT/Isooctane Reverse Micelles	82
2.2	General Scheme of the Synthesis	84
2.3	Peculiarities of the Experimental Procedure	84
2.3.1	Preparation of the Flavonoid Micellar Solution	85
2.3.2	Extinction Coefficient Determination for the Flavonoids in Micellar Solution	85
2.4	Examples of the Nanoparticle Synthesis	88
2.4.1	Silver Nanoparticles	89
2.4.2	Gold Nanoparticles	95
2.4.3	Copper Nanoparticles	103

<b>3 Development of the Biochemical Synthesis for Practical Applications.</b>	109
3.1 Determination of the Extinction Coefficient for Ag Nanoparticles	110
3.1.1 Extinction Coefficient of the Complex	111
3.1.2 Extinction Coefficient of the Nanoparticles	113
3.2 The Effect of $C_{Qr}/C_{Ag}$ Relation on the Formation Rate and Yield of Silver Nanoparticles	114
3.3 Preparation of Small Nanoparticles with Narrow Size Distribution.	117
<b>4 Preparation of Metal Nanoparticles in Water Solutions on the Basis of Biochemical Synthesis</b>	125
4.1 Preparation of Nanoparticles as Water Dispersions by the Transfer from Micellar Solution.	126
4.2 Properties of Silver and Gold Nanoparticles in Aqueous Solution	127
4.2.1 Silver Nanoparticles.	127
4.2.2 Gold Nanoparticles	130
4.3 Synthesis of Silver and Copper Nanoparticles in Water Solution with Natural Stabilizers	133
4.3.1 Silver Nanoparticles Stabilized with Starch	134
4.3.2 Silver Nanoparticles Stabilized with Cyclodextrin	137
4.3.3 Copper Nanoparticles Stabilized with Starch	142
4.3.4 Comparison with the Data Found in Literature	144
<b>5 Materials Modified with Metal Nanoparticles</b>	149
5.1 Creation of Liquid-Phase Materials with Metal Nanoparticles	151
5.2 Solid Materials with Ag and Cu Nanoparticles	154
<b>Part II Biological Effects of Metal Nanoparticles</b>	
<b>6 The Effect of Metal Nanoparticles on Biological Objects (Analysis of the Literature).</b>	163
6.1 General Information.	163
6.2 Metal Nanoparticles Effects Observed on Microorganisms.	168
6.2.1 Antimicrobial Activity of Ag Nanoparticles	178
6.2.2 Antimicrobial Activity of Cu, Au, and Metal Oxide Nanoparticles	194
6.3 On the Mechanism of Antimicrobial Activity of Metal Nanoparticles	202
6.4 Summary	215

<b>7 Antimicrobial Activity of Nanoparticles Stabilized with Synthetic Surfactant</b> . . . . .	219
7.1 Ag and Cu Nanoparticles in Liquid Medium . . . . .	220
7.1.1 Varnish-Paint Materials with Biocidal Properties . . . . .	220
7.1.2 Water Solutions of Ag Nanoparticles . . . . .	225
7.1.3 Solid Materials and Polymer Films with Ag Nanoparticles . . . . .	228
<b>8 The Effect of Silver Nanoparticles on Some Objects from the “Plants” and “Fungi” Kingdoms.</b> . . . . .	235
8.1 Plasmodium of the Acellular Slime Mold <i>Physarum polycephalum</i> . . . . .	237
8.2 Unicellular Alga <i>Chlorella vulgaris</i> . . . . .	245
8.3 Plant Seeds . . . . .	247
<b>9 The Effect of Silver Nanoparticles on Cultured Human Cells</b> . . . . .	249
9.1 Toxicity of Starch-Stabilized Ag Nanoparticles for HEF Cells . . . . .	250
9.2 Toxicity of AOT- and Cyclodextrin-Stabilized Ag Nanoparticles for UVE Cells . . . . .	252
9.3 Toxicity of AOT-Stabilized Ag Nanoparticles for HeLa and U937 Cells . . . . .	258
<b>Inferences from the Results of Our Studies</b> . . . . .	263
<b>Conclusion</b> . . . . .	267
<b>References</b> . . . . .	273

Biological Effects of Metal Nanoparticles
