

Contents

1	Introduction	1
1.1	Subgradient Projection Method	1
1.2	The Mirror Descent Method	4
1.3	Proximal Point Method	6
1.4	Variational Inequalities	8
2	Subgradient Projection Algorithm	11
2.1	Preliminaries	11
2.2	A Convex Minimization Problem	13
2.3	The Main Lemma	17
2.4	Proof of Theorem 2.4	19
2.5	Subgradient Algorithm on Unbounded Sets	20
2.6	Proof of Theorem 2.8	22
2.7	Zero-Sum Games with Two-Players	25
2.8	Proof of Proposition 2.9	29
2.9	Subgradient Algorithm for Zero-Sum Games	35
2.10	Proof of Theorem 2.11	39
3	The Mirror Descent Algorithm	41
3.1	Optimization on Bounded Sets	41
3.2	The Main Lemma	44
3.3	Proof of Theorem 3.1	47
3.4	Optimization on Unbounded Sets	48
3.5	Proof of Theorem 3.3	49
3.6	Zero-Sum Games	53
4	Gradient Algorithm with a Smooth Objective Function	59
4.1	Optimization on Bounded Sets	59
4.2	An Auxiliary Result and the Proof of Proposition 4.1	61
4.3	The Main Lemma	62
4.4	Proof of Theorem 4.2	66
4.5	Optimization on Unbounded Sets	68

5	An Extension of the Gradient Algorithm	73
5.1	Preliminaries and the Main Result	73
5.2	Auxiliary Results	75
5.3	The Main Lemma	78
5.4	Proof of Theorem 5.1	82
6	Weiszfeld's Method	85
6.1	The Description of the Problem	85
6.2	Preliminaries	87
6.3	The Basic Lemma	91
6.4	The Main Result	94
6.5	Proof of Theorem 6.10	98
7	The Extragradient Method for Convex Optimization	105
7.1	Preliminaries and the Main Results	105
7.2	Auxiliary Results	109
7.3	Proof of Theorem 7.1	113
7.4	Proof of Theorem 7.3	115
8	A Projected Subgradient Method for Nonsmooth Problems	119
8.1	Preliminaries and Main Results	119
8.2	Auxiliary Results	122
8.3	Proof of Theorem 8.1	126
8.4	Proof of Theorem 8.2	131
9	Proximal Point Method in Hilbert Spaces	137
9.1	Preliminaries and the Main Results	137
9.2	Auxiliary Results	140
9.3	Proof of Theorem 9.1	144
9.4	Proof of Theorem 9.2	146
10	Proximal Point Methods in Metric Spaces	149
10.1	Preliminaries and the Main Results	149
10.2	Auxiliary Results	156
10.3	The Main Lemma	158
10.4	Proof of Theorem 10.1	160
10.5	An Auxiliary Result for Theorem 10.2	161
10.6	Proof of Theorem 10.2	163
10.7	Well-Posed Minimization Problems	164
10.8	An Example	167
11	Maximal Monotone Operators and the Proximal Point Algorithm	169
11.1	Preliminaries and the Main Results	169
11.2	Auxiliary Results	173
11.3	Proof of Theorem 11.1	175
11.4	Proofs of Theorems 11.3, 11.5, 11.6, and 11.7	176

12	The Extragradient Method for Solving Variational Inequalities	183
12.1	Preliminaries and the Main Results	183
12.2	Auxiliary Results	189
12.3	Proof of Theorem 12.2	193
12.4	The Finite-Dimensional Case	196
12.5	A Convergence Result	198
13	A Common Solution of a Family of Variational Inequalities	205
13.1	Preliminaries and the Main Result	205
13.2	Auxiliary Results	210
13.3	Proof of Theorem 13.1	212
13.4	Examples	221
14	Continuous Subgradient Method	225
14.1	Bochner Integrable Functions	225
14.2	Convergence Analysis for Continuous Subgradient Method	226
14.3	An Auxiliary Result	228
14.4	Proof of Theorem 14.1	229
14.5	Continuous Subgradient Projection Method	231
15	Penalty Methods	239
15.1	An Estimation of Exact Penalty in Constrained Optimization	239
15.2	Proof of Theorem 15.4	243
15.3	Infinite-Dimensional Inequality-Constrained Minimization Problems	246
15.4	Proofs of Auxiliary Results	253
15.5	Proof of Theorem 15.12	255
15.6	Proof of Theorem 15.15	258
15.7	An Application	260
16	Newton's Method	265
16.1	Pre-differentiable Mappings	265
16.2	Convergence of Newton's Method	269
16.3	Auxiliary Results	272
16.4	Proof of Theorem 16.3	274
16.5	Set-Valued Mappings	279
16.6	An Auxiliary Result	281
16.7	Proof of Theorem 16.8	285
16.8	Pre-differentiable Set-Valued Mappings	287
16.9	Newton's Method for Solving Inclusions	292
16.10	Auxiliary Results for Theorem 16.12	294
16.11	Proof of Theorem 16.12	296
