Contents

1 Moving Robots from Industrial Sectors to Domestic Spheres: A Foreword 1
Leopoldina Fortunati
References 3

2 Modeling Social Signals and Contexts in Robotic Socially Believable Behaving Systems 5
Anna Esposito and Lakhmi C. Jain
2.1 Introduction 5
2.2 Content of the Book 8
2.3 Conclusions 9
References 10

3 Adaptive and Evolutive Algorithms: A Natural Logic for Artificial Mind 13
Mauro Maldonato and Silvia Dell'Orco
3.1 Introduction 13
3.2 Can a Machine Become Self-Aware? 14
3.3 Decision Making and Intuition Algorithms 18
3.4 Conclusions 19
References 20

4 Toward Conscious-Like Conversational Agents 23
Milan Gnjatović and Branislav Borovac
4.1 Introduction 24
4.2 Related Work 24
4.3 Where to Go from Here? 27
4.3.1 The Fundamental Features of Consciousness 28
4.4 Conceptual and Methodological Pitfalls 29
4.4.1 The Methodological Pitfall of Purely Statistical Approaches 29

4.4.2 The Conceptual Pitfall of Misinterpreting the Dialogue Structure 30
4.4.3 Addressing the Pitfalls 31
4.5 Unified Interpretation 32
4.6 Qualitativeness 37
4.7 Discussion: Ongoing and Future Work 40
4.7.1 Learning Through Interaction 40
4.7.2 Context-Dependent Perception 41
4.8 Conclusion 42
References 43

5 Communication Sequences and Survival Analysis 47
Carl Vogel
5.1 Introduction 47
5.2 Dialogue Symbol Sequences 48
5.3 Survival Analysis 53
5.3.1 General Method 54
5.3.2 An Example 55
5.3.3 Discussion 56
5.4 Conclusions 58
References 58

6 The Relevance of Context and Experience for the Operation of Historical Sound Change 61
Jonathan Harrington, Felicitas Kleber, Ulrich Reubold and Mary Stevens
6.1 The Phonetic Basis of Sound Change 63
6.2 Sound Change and Experience 73
6.3 Sound Change and First Language Acquisition 77
6.4 Sound Change and Imitation 80
6.5 Concluding Comments 84
References 85

7 Fostering User Engagement in Face-to-Face Human-Agent Interactions: A Survey 93
Chloé Clavel, Angelo Cafaro, Sabrina Campano and Catherine Pelachaud
7.1 Introduction 93
7.2 Designing Engaging Agents—State of the Art 94
7.2.1 Taking into account Socio-Emotional Behavior 95
7.2.2 Generation of Agent's Socio-Emotional Behavior 96
7.2.3 Socio-Emotional Interaction Strategies 99
7.2.4 Alignment-Related Processes 100
7.2.5 Impact on User's Impression 101

7.2.6 Methodologies for Evaluating User Engagement in Human-Agent Interactions . . . 103
7.2.7 Summary of the Key Points for the Design of Engaging Agent . . . 105
7.3 Overview of Studies Carried Out in GRETA and VIB . . . 105
7.3.1 Greta System and VIB Platform . . . 106
7.3.2 Modeling Dynamical Coupling . . . 108
7.3.3 Enhancing User Engagement through Verbal Alignment by the Agent . . . 109
7.3.4 Engaging Users in Multiparty Group Interaction with the Expression of Interpersonal Attitudes . . . 111
7.4 Conclusion and Perspectives . . . 112
References . . . 113

8 Virtual Coaches for Healthy Lifestyle . . . 121
H.J.A. op den Akker, R. Klaassen and A. Nijholt
8.1 Introduction . . . 122
8.2 Persuasive Communication and Persuasive Technology . . . 125
8.2.1 Persuasive Communication . . . 126
8.2.2 Persuasive Technology . . . 128
8.2.3 The Computer as Persuasive Social Actor . . . 129
8.3 The Persuasiveness of Virtual Humans . . . 130
8.3.1 Naturalness and Credibility . . . 131
8.3.2 Virtual Humans and Behavior Change Support Systems . . . 132
8.4 Kristina—Virtual Coach for Physical Activity . . . 134
8.4.1 Articulated Social Agent Platform . . . 135
8.5 Coaching by Means of Text Messages or by a Virtual Human . . . 136
8.5.1 Methodology . . . 137
8.5.2 Results . . . 138
8.5.3 Log Data . . . 143
8.5.4 Conclusion . . . 144
8.6 Guidelines for Use of Virtual Coaches . . . 145
References . . . 146

9 Social Perception in Machines: The Case of Personality and the Big-Five Traits . . . 151
Alessandro Vinciarelli
9.1 Introduction . . . 151
9.2 A Conceptual Model . . . 152
9.2.1 Psychological Level . . . 153
9.2.2 Technical Level . . . 153
9.3 The Personality Example . . . 154
9.3.1 Personality and Its Measurement . . . 154
9.3.2 Data Collection . . . 156

9.3.3 How Many Observers? How Much Agreement? 156
9.3.4 APP Experiments: Speech 157
9.3.5 APP Experiments: Faces 160
9.4 Discussion and Conclusions 162
References 163

10 Towards Modelling Multimodal and Multiparty Interaction in Educational Settings 165
Maria Koutsombogera, Miltos Deligiannis, Maria Giagkou and Harris Papageorgiou
10.1 Introduction 166
10.2 Experimental Design and Data Acquisition 167
10.2.1 Session Design 169
10.3 Annotation Process and Scheme 171
10.4 Data Analysis 175
10.4.1 Speech Duration 175
10.4.2 Turn Management 176
10.4.3 Feedback 178
10.4.4 Gaze Analysis 180
10.5 Discussion and Future Work 181
References 183

11 Detecting Abnormal Behavioral Patterns in Crowd Scenarios 185
Hossein Mousavi, Hamed Kiani Galoogahi, Alessandro Perina and Vittorio Murino
11.1 Introduction 186
11.2 Related Work 187
11.3 Histogram of Oriented Tracklets: A Compact Representation of Crowd Motions 189
11.3.1 Tracklet Extraction 190
11.3.2 HOT Computation 192
11.4 Abnormality Detection 194
11.5 Experimental Evaluation 195
11.5.1 Crowd Datasets 196
11.5.2 Tracklet Extraction 196
11.5.3 HOT Parameters and Setting 197
11.5.4 Detection Performance 200
11.6 Conclusions 202
References 203
