

Contents

1	More than the Modeling of Emotions: A Foreword	1
	Leopoldina Fortunati	
	References.	6
2	Modeling Emotions in Robotic Socially Believable Behaving Systems	9
	Anna Esposito and Lakhmi C. Jain	
2.1	Introduction	10
2.2	Content of the Book	11
2.3	Conclusions	12
	References.	12
3	The Role of Intention in Cognitive Robotics	15
	D. Vernon, S. Thill and T. Ziemke	
3.1	Introduction	15
3.2	The Prospective and Intentional Nature of Action	16
3.3	Social Cognition and Social Interaction	17
	3.3.1 The Basis of Social Cognition	17
	3.3.2 Helping and Collaboration	18
	3.3.3 The Central Role of Intention in Mutual Interaction. . .	19
	3.3.4 Joint Action	20
	3.3.5 Shared Intentions	22
	3.3.6 Joint Attention	22
3.4	Reading Intentions and Theory of Mind.	23
3.5	Conclusions	25
	References.	25
4	Engagement Perception and Generation for Social Robots and Virtual Agents	29
	Lee J. Corrigan, Christopher Peters, Dennis Küster and Ginevra Castellano	
4.1	Introduction	30

4.2	Theory	30
4.2.1	Fundamentals	30
4.2.2	Concepts	33
4.2.3	Experimental Considerations	34
4.3	Practice	37
4.3.1	Case Study 1: Engagement in Social Robotics	37
4.3.2	Case Study 2: Engagement with Virtual Agents	46
	References	50
5	Social Development of Artificial Cognition	53
	Tony Belpaeme, Samantha Adams, Joachim de Greeff, Alessandro di Nuovo, Anthony Morse and Angelo Cangelosi	
5.1	Introduction	53
5.2	Why Embodiment Matters	55
5.2.1	The Origins of Abstract Concepts and Number: A Detailed Study	56
5.3	Learning Through Social Interaction	61
5.4	Powering Artificial Cognition with Spiking Neural Networks	65
5.5	Conclusion and Outlook	68
	References	69
6	Going Further in Affective Computing: How Emotion Recognition Can Improve Adaptive User Interaction	73
	Sascha Meudt, Miriam Schmidt-Wack, Frank Honold, Felix Schüssel, Michael Weber, Friedhelm Schwenker and Günther Palm	
6.1	Introduction	74
6.2	How to Classify Emotional States	76
6.2.1	Psychological Emotion Models Leading to Labels	76
6.2.2	Emotional Data Sets and Their Attributes	78
6.2.3	Different Feature Types and Further Processing	79
6.2.4	Different Concepts for Classification	83
6.3	Concept of Emotion-Adaptive <i>Companion</i> -Systems	88
6.3.1	System Architecture	88
6.3.2	Identifying the Cause of Emotions for Proper Reactions	89
6.4	Examples of Emotion-Based System Behavior	93
6.4.1	Physical Interaction Layer: Automatic Volume Control	93
6.4.2	Automatic Modality Selection on the Logical Interaction Layer	94
6.4.3	Multiple Layers: The Announcement of Traffic Warnings	95
6.4.4	Interaction Input Layer: Navigation Misunderstanding	96

6.4.5	Interaction Input Layer: Seat Belt Reminder	
	False Positive	96
6.4.6	Interaction Input Layer: Media Control	
	False Negative	97
6.5	Discussion and Future Work	98
	References.	99
7	Physical and Moral Disgust in Socially Believable Behaving Systems in Different Cultures	105
	Barbara Lewandowska-Tomaszczyk and Paul A. Wilson	
7.1	Introduction	106
7.1.1	Role of Emotions in Social Robotics	106
7.1.2	Typology of Disgust	106
7.1.3	Overview of Present Study.	110
7.2	Materials and Methods	112
7.2.1	Online Emotions Sorting Methodology	112
7.2.2	GRID	113
7.2.3	Language Corpus Data.	114
7.3	Results	115
7.3.1	Online Emotions Sorting Results.	115
7.3.2	GRID Results.	119
7.3.3	Corpus Results	121
7.4	Conclusions	129
	References.	130
8	Speaker's Hand Gestures Can Modulate Receiver's Negative Reactions to a Disagreeable Verbal Message.	133
	Fridanna Maricchiolo, Augusto Gnisci, Mariangela Cerasuolo, Gianluca Ficca and Marino Bonaiuto	
8.1	Introduction	134
8.2	Method	136
8.2.1	Results.	139
8.3	Time Course of Physiological Variables in Real-Time Measurement	140
8.4	Change of Physiological Measures in Response to Gestures and Arguments' Different Strength	141
8.5	Discussion	142
8.6	Conclusions	144
	References.	145
9	Laughter Research: A Review of the ILHAIRE Project	147
	Stéphane Dupont, Hüseyin Çakmak, Will Curran, Thierry Dutoit, Jennifer Hofmann, Gary McKeown, Olivier Pietquin, Tracey Platt, Willibald Ruch and Jérôme Urbain	
9.1	Introduction	147
9.2	Roles and Functions	149

9.3	Characteristics, Perception and Effect	151
9.3.1	Perception of Facial Features	152
9.3.2	Perception of Acoustic Features	153
9.3.3	Perception of Bodily Portrayals.	155
9.3.4	Perception of Multimodal Portrayals	156
9.4	Naturalistic Databases	157
9.4.1	Existing Databases	157
9.4.2	Hilarious Laughter Collection	158
9.4.3	Conversational Laughter Collection	159
9.4.4	Annotation	160
9.5	Automatic Detection, Recognition and Characterization	160
9.5.1	Acoustic	161
9.5.2	Facial Expressions.	163
9.5.3	Body Movement and Gestures	163
9.5.4	Respiration and Muscular Activity.	164
9.5.5	Multimodal Fusion	165
9.6	Automatic Generation and Synthesis	166
9.6.1	Acoustic Synthesis	166
9.6.2	Visual Synthesis	167
9.7	Interaction Modeling	168
9.8	Application Perspectives	170
9.9	Research Perspectives	172
9.10	Conclusions	173
	References.	174
10	Prosody Enhances Cognitive Infocommunication: Materials from the HuComTech Corpus	183
	Laszlo Hunyadi, István Szekrényes and Hermina Kiss	
10.1	Introduction	184
10.2	Material.	185
10.2.1	Facial Expressions.	186
10.2.2	Syntactic Completeness/Incompleteness	186
10.2.3	Prosody: Pitch Movement (Intonation).	187
10.3	Methods	191
10.4	Discussion	193
10.4.1	Facial Expressions.	193
10.4.2	Syntactic Completeness/Incompleteness	197
10.5	Conclusions	203
	References.	204
11	Analysis of Emotional Speech—A Review	205
	P. Gangamohan, Sudarsana Reddy Kadiri and B. Yegnanarayana	
11.1	Introduction	205
11.2	Data Collection of Emotional Speech	206
11.3	Emotional Speech Analysis	207

11.3.1	Prosody Features.	209
11.3.2	Voice Quality Features	209
11.3.3	Spectral Features.	210
11.3.4	Emotions as Points in Continuous Dimensional Space	211
11.3.5	Studies on Emotion Recognition	211
11.3.6	Limitations of the Studies	212
11.4	Studies on Some Specific Research Issues	215
11.4.1	Analysis-by-Synthesis to Explore Relative Contribution of Different Components of Emotional Speech.	215
11.4.2	Identification of Emotion-Specific Regions of Speech—Neutral Versus Non Neutral Speech	218
11.4.3	Significance of Excitation Source Features in Emotional Speech	219
11.4.4	Emotion Recognition System Based on Excitation Source Features	222
11.4.5	Discrimination of Anger and Happiness.	223
11.4.6	Discrimination Between High Arousal and Falsetto Voices	228
11.5	Research Challenges in Emotional Speech Analysis.	231
	References.	232
