<b>1</b>	<b>Overview</b>	1
1.1	Ways to Express Continuity	1
1.2	Categorical Concepts	4
1.3	Enriched Functional Analysis	11
<b>2</b>	<b>General Preparation</b>	17
2.1	About Sets	17
2.1.1	Axioms for Sets	18
2.1.2	Set Building	19
2.2	Functions	20
2.2.1	Anatomy of Functions	20
2.2.2	Function Related Concepts	21
2.3	Indexed Set Building	24
2.3.1	Constructions with Indexed Families of Sets	24
2.3.2	Images and Preimages of Families	26
2.4	Relations	27
2.4.1	Relation Concept	27
2.4.2	Ordered and Preordered Sets	27
2.4.3	Ordinals and Transfinite Induction	29
2.5	The Class of All Sets	31
2.5.1	Getting Around Russell's Paradox	31
2.5.2	The Class $S$ of Functions Between Sets	32
2.5.3	Factorizations of Functions	34
2.6	Basic Algebraic Structures	36
2.6.1	Monoid Related Structures	36
2.6.2	Number Fields	39
2.7	Vector Spaces and Linear Mappings	41
2.7.1	Vector Space Concept	41
2.7.2	Linear Mapping Concept	45
2.7.3	Factorization of Linear Mappings	46
2.7.4	Quotient Vector Spaces	46

2.7.5	Cartesian Products of Vector Spaces.....	47
2.7.6	Vector Spaces of Linear Mappings .....	48
2.7.7	Interdependence of Real and Complex Linear Functionals .....	48
2.7.8	Free Vector Spaces .....	49
<b>3</b>	<b>Continuity Enabling Structures.....</b>	<b>53</b>
3.1	Real Intervals .....	53
3.1.1	Convergent Sequences in Real Intervals.....	53
3.1.2	Filters.....	55
3.1.3	Filter Convergence in $\mathbb{R}$ .....	57
3.1.4	Completeness of the Real Line.....	59
3.1.5	Continuous Mappings Between Real Intervals.....	60
3.2	Metric Spaces.....	63
3.2.1	Normed Spaces .....	63
3.2.2	Metric Space Concept .....	64
3.2.3	Auxiliary Concepts for Metric Spaces.....	65
3.2.4	Convergence in Metric Spaces .....	66
3.2.5	Complete Metric Spaces .....	67
3.2.6	Continuous Mappings Between Metric Spaces .....	70
3.2.7	Cartesian Products of Metric Spaces .....	71
3.2.8	Modulated Continuous Mappings .....	72
3.3	Topological Spaces .....	75
3.3.1	Topological Space Concept .....	75
3.3.2	Closed Sets, Closure and Interior .....	76
3.3.3	Convergence in Topological Spaces .....	77
3.3.4	Continuous Mappings Between Topological Spaces .....	78
3.4	Convergence Spaces.....	81
3.4.1	Convergence Space Concept .....	81
3.4.2	Adherence and Closure.....	85
3.4.3	Assembling Functions and Assembled Filters .....	86
3.4.4	Open Sets in a Convergence Space .....	86
3.4.5	Continuous Mappings Between Convergence Spaces .....	87
<b>4</b>	<b>Construction of New Spaces .....</b>	<b>93</b>
4.1	New Spaces via Initial Lifts .....	93
4.1.1	$\mathbf{C}$ -Product Spaces.....	93
4.1.2	Initial $\mathbf{C}$ -Sources.....	95
4.1.3	Subspaces, Embeddings, and Factorizations .....	97
4.1.4	Application to Topological Spaces .....	98
4.1.5	$\mathbf{T}$ -Initial Implies $\mathbf{C}$ -Initial .....	99
4.1.6	Fibers of Structures .....	99
4.2	New Spaces via Final Lifts .....	102
4.2.1	$\mathbf{C}$ -Coproducts .....	102
4.2.2	Final $\mathbf{C}$ -Sinks .....	103

4.2.3	Quotient Mappings and Factorizations .....	105
4.2.4	T-Coproducts and Quotients .....	106
4.3	Topological Reflection of a Convergence Space .....	108
4.3.1	Topological Convergence Revisited .....	108
4.3.2	T-Reflection Theorem .....	109
4.3.3	Reflective Subclasses .....	110
4.4	Power Spaces .....	112
4.4.1	Continuous Convergence .....	112
4.4.2	Cartesian Monoidal Laws .....	114
4.4.3	Cartesian Exponential Laws .....	114
4.5	Pseudopowers and Cubes .....	117
4.5.1	Simple Convergence and Pseudopowers .....	117
4.5.2	Cubes .....	117
4.5.3	Uniform Convergence .....	118
<b>5</b>	<b>Various Kinds of Spaces .....</b>	<b>121</b>
5.1	Binz Spaces .....	121
5.1.1	Regular Convergence .....	122
5.1.2	Hausdorff Convergence .....	123
5.1.3	Ultrafilters .....	124
5.1.4	Choquet Space Concept .....	125
5.1.5	Binz Space Concept .....	127
5.1.6	Pivot-Embedded C-Space Concept .....	128
5.2	Tychonoff Spaces .....	131
5.2.1	Tychonoff Space Concept .....	131
5.2.2	Zero-Sets and Cozero-Sets .....	132
5.2.3	Factorization of Tychonoff Mappings .....	133
5.3	Compactness .....	135
5.3.1	Compactness Concept .....	135
5.3.2	Compactness via Coverings .....	136
5.3.3	Basic Properties of Compact Spaces .....	137
5.3.4	Continuous Mappings on Compact Domains .....	138
5.3.5	Compact Spaces and Real Intervals .....	139
5.3.6	Finite Dimensional Compact Spaces .....	140
5.3.7	Attainment of Supremum .....	140
5.3.8	Mapping Spaces with Compact Domain .....	141
5.3.9	Stone-Weierstrass Approximation .....	142
5.4	Normality .....	145
5.4.1	Normal Space Concept .....	146
5.4.2	Normality Implies Urysohn Separation .....	146
5.4.3	Urysohn Separation Implies Tietze Extension .....	147
5.4.4	Tietze Extension Implies Normality .....	149
5.4.5	Finite Partitions of Unity .....	149
5.4.6	Normality of Compact Spaces .....	149

5.5	Local Compactness.....	150
5.5.1	Locally Compact Concept.....	150
5.5.2	Compact-Open Topology .....	151
5.5.3	Compactwise Uniform Convergence .....	152
5.5.4	Locally Compact Topological Spaces .....	152
5.5.5	Locally Compact Coreflection .....	153
5.5.6	Countability and Compactness.....	154
5.5.7	Compactly Layered Spaces .....	154
5.5.8	Topological Spaces of Ordinals .....	155
5.6	Connectedness.....	158
5.6.1	Connected and Disconnected Spaces .....	158
5.6.2	Sufficient Conditions .....	159
5.6.3	Monotonic Homeomorphisms .....	160
5.6.4	Connected Components .....	161
5.6.5	Totally Disconnected Spaces.....	161
5.7	Zero-Dimensional Spaces.....	162
5.7.1	Zero-Dimensional Space Concept .....	162
5.7.2	$\mathbb{B}$ -Regular Spaces .....	163
5.7.3	Cantor Representation of the Cube $\mathbf{S}(\mathbb{N}, \mathbb{B})$ .....	163
5.8	Baire Spaces .....	166
5.8.1	Baire Space Concept .....	166
5.8.2	Compact Spaces Are Baire .....	167
5.8.3	Locally Compact T-Spaces Are Baire .....	167
5.8.4	Complete Metric Spaces Are Baire .....	168
5.9	$T_0$ -Spaces .....	168
5.9.1	$T_0$ -Space Concept .....	169
5.9.2	Front Topology .....	170
5.9.3	Front Dense Mappings .....	171
5.9.4	Front Closed Embeddings.....	171
5.9.5	Sober Spaces.....	172
<b>6</b>	<b>Fundamentals of Linear Continuity .....</b>	<b>175</b>
6.1	Gauged Spaces .....	175
6.1.1	Variable Scalar Field .....	175
6.1.2	Seminorms .....	176
6.1.3	Gauged Spaces and Mappings .....	176
6.1.4	Gauged Spaces via Initial Lifts .....	178
6.1.5	Gauged Spaces via Final Lifts .....	179
6.1.6	Gauged Quotient Mappings .....	179
6.2	Hahn-Banach Extension and Separation .....	181
6.2.1	Convex Sets and Semiballs.....	181
6.2.2	Heminorms and Hemiballs.....	183
6.2.3	Dominated Linear Extensions.....	184
6.2.4	Convex Separation.....	186

6.3	Gauged Spaces as Topological Vector Spaces .....	188
6.3.1	Topological Vector Spaces .....	188
6.3.2	Continuity Criteria for Seminorms .....	188
6.3.3	Semiballs and Hubbed Spaces .....	189
6.3.4	GV-Functionals: Extension and Separation .....	191
6.3.5	Weakly Gauged Spaces .....	192
6.3.6	Separated Gauged Spaces .....	193
6.3.7	Translation-Invariant Metrics .....	193
6.3.8	Fréchet Space Concept .....	195
6.3.9	Metrizable Inversion Theorem .....	197
6.4	Normed Spaces Revisited .....	198
6.4.1	Normed Spaces as TV-Spaces .....	198
6.4.2	Linear Continuous Mappings Between Normed Spaces .....	199
6.4.3	Banach Spaces .....	199
6.4.4	Absolutely Convergent Series .....	200
6.4.5	Linear Homeomorphism Not Isolated .....	201
6.4.6	Normed Dual Spaces .....	202
6.4.7	Normed Bidual Spaces .....	203
6.5	CV-Spaces and CV-Mappings .....	206
6.5.1	Convergence Vector Spaces .....	206
6.5.2	CV-Subspaces .....	208
6.5.3	CV-Mappings .....	208
6.5.4	Locally Convex CV-Spaces .....	208
6.6	Parapowers, Paraduals and Cubes .....	209
6.6.1	Parapowers $\mathbf{C}[X, F]$ and Cubes $\mathbf{S}[J, F]$ .....	209
6.6.2	CV-Powers, CV-Duals, and Paraduals .....	210
6.6.3	Preliminaries About Standard CV Constructions .....	212
6.6.4	eCV-Space Concept .....	214
6.6.5	Finite Dimensional CV-Spaces .....	214
6.6.6	Completeness for CV-Spaces .....	215
6.7	Equicontinuity and Compactness .....	217
6.7.1	Equicontinuous Subsets .....	217
6.7.2	Equicontinuity and Simple Convergence .....	218
6.7.3	Compact Subspaces of Paraduals .....	219
6.7.4	Equicontinuous Subsets of Parapowers .....	219
6.7.5	Bounded Sets in CV-Spaces .....	220
6.7.6	Which Gauged Spaces Are Locally Compact? .....	221
6.7.7	CV-Duals of Gauged Spaces .....	222
6.7.8	Polar Sets in a DGV-Space .....	222
6.7.9	Representation of Separated and Complete GV-Spaces ..	224
6.7.10	Extreme Subsets and Extreme Points .....	225
6.7.11	Krein-Milman Theorem .....	226
6.8	Riesz-Radon Representation .....	228
6.8.1	Mosaics .....	229

6.8.2	Measures .....	230
6.8.3	Bounded Measures and Jordan Decomposition .....	231
6.8.4	Radon Measures .....	233
6.8.5	Radon Integrals .....	235
6.8.6	Measures via Premeasures .....	237
6.8.7	Decomposition of $\mathbb{R}$ -Valued Linear Functionals .....	238
6.8.8	Measures Determined by Nonnegative CV-Functionals ..	240
6.8.9	Measures Determined by CV-Functionals .....	241
6.8.10	Two Riesz-Radon Representations .....	243
6.8.11	Approximation by Elementary Functionals .....	244
<b>7</b>	<b>Basic Categorical Concepts</b> .....	<b>251</b>
7.1	Categories .....	251
7.1.1	Category Concept .....	251
7.1.2	Examples of Categories .....	252
7.1.3	Subcategories .....	253
7.1.4	Opposite Categories .....	254
7.2	Functors .....	255
7.2.1	Functor Concept .....	255
7.2.2	Functors Induced by Objects .....	257
7.2.3	Opposite Functors .....	258
7.2.4	Bifunctors .....	259
7.3	Kinds of Arrows .....	260
7.3.1	Epis .....	260
7.3.2	Monos .....	261
7.3.3	Duality Principle .....	262
7.3.4	Isomorphisms .....	263
7.3.5	Retractions and Sections .....	263
7.3.6	Sources and Sinks .....	265
7.3.7	Epis via Coseparators .....	265
7.4	Natural Transformations .....	267
7.4.1	Natural Transformation Concept .....	267
7.4.2	Algebraic Operations as Natural Transformations .....	268
7.4.3	Reincarnation Transformation .....	269
7.4.4	Functors of Several Variables .....	270
7.4.5	Monoidal Laws in $\mathbf{S}$ .....	270
7.4.6	Evaluation as Natural Transformation .....	271
7.4.7	Exponential Laws for $\mathbf{S}$ .....	272
7.5	Adjoint Functors .....	274
7.5.1	Adjoint Functor Concept .....	274
7.5.2	Adjunctions Associated with $\mathbf{S}$ -Powers .....	277
7.5.3	A Right (and Left) Adjoint Underlying Functor .....	278
7.5.4	Free Vector Space Functor as Left Adjoint .....	278
7.5.5	Cube Functor as Right Adjoint .....	278
7.5.6	Adjoint Functor Properties .....	279

7.5.7	Reflective Subcategories .....	281
7.5.8	Coreflective Subcategories .....	281
7.5.9	Yoneda Lemma .....	282
7.5.10	Equivalence Functors and Equivalent Categories .....	283
7.6	Limit Sources .....	287
7.6.1	Limit Sources for Functors .....	287
7.6.2	Cartesian Products in $\mathbf{S}$ .....	289
7.6.3	Cartesian Product of Arrows .....	289
7.6.4	Equalizers as Limit Sources .....	290
7.6.5	Regular Monos .....	291
7.6.6	Pullbacks in $\mathbf{S}$ .....	292
7.6.7	Limits for Nonsmall Intersection Functors .....	293
7.6.8	Well-Powered and Cowell-Powered Categories .....	294
7.6.9	Limit Source Properties .....	295
7.6.10	Categorical Completeness Criterion .....	296
7.6.11	Associated Down-Directed Functors .....	297
7.6.12	Right Adjoints Preserve Limit Sources .....	298
7.6.13	Limit Sources That Preserve Monos .....	299
7.7	Colimit Sinks .....	301
7.7.1	Colimit Sinks for Functors .....	301
7.7.2	Coequalizers in $\mathbf{S}$ .....	302
7.7.3	Coproducts in $\mathbf{S}$ .....	303
7.7.4	Pushouts in $\mathbf{S}$ .....	303
7.7.5	Colimit Sink Properties .....	304
7.8	Concrete Categories and Lifting Categories .....	306
7.8.1	The Concept Concrete Category .....	306
7.8.2	Initial Sources and Final Sinks in Concrete Categories .....	307
7.8.3	Initial Lifts Exist Iff Final Lifts Exist .....	308
7.8.4	Lifting Categories .....	309
7.8.5	Lifting Functors Are Right Adjoint .....	310
7.8.6	Further Lifting Properties .....	310
7.8.7	Preservation of Initial Monosources .....	311
7.8.8	Preservation of Final Episinks .....	312
7.9	Dicomplete Categories .....	315
7.9.1	Dicompleteness Concept .....	315
7.9.2	Dicompleteness of Lifting Categories .....	316
7.9.3	Reflective Subcategories Inherit Dicompleteness .....	316
7.9.4	Coreflective Subcategories Inherit Dicompleteness .....	318
7.10	Factorization in Dicomplete Categories .....	319
7.10.1	Epi-Determined Monos .....	319
7.10.2	Canonical Factorizations .....	321
7.10.3	Preservation of $\mathbf{X}_{\text{epi}}$ and $\mathbf{D}_{\text{mono}}$ .....	323
7.10.4	The Classes $\mathbf{Epi}$ and $\mathbf{Dmono}$ in $\mathbb{RC}$ .....	324

<b>8</b>	<b>The Category <math>\mathbf{C}</math></b>	327
8.1	Foundational Categories	327
8.1.1	Foundational Category Concept	327
8.1.2	Cartesian Monoidal Laws	328
8.1.3	Cartesian Exponential Laws	330
8.1.4	Adjunctions Implied by Exponential Laws	331
8.1.5	Extended Exponential Laws	332
8.1.6	Enriched Categories and Functors	332
8.1.7	Enriched Adjunctions and Powered Subcategories	332
<b>9</b>	<b>Reflective Subcategories of <math>\mathbf{C}</math></b>	337
9.1	Tools for Creating Epireflective Subcategories	337
9.1.1	Epireflection Via Adjunction	338
9.1.2	Enriched Epireflection Via Adjunction	339
9.2	Categories of Pivot-Regular Spaces	340
9.2.1	Pivot-Regular Space Concept	340
9.2.2	Pivot-Regular Properties	340
9.2.3	Particular Pivot-Regular Categories	341
9.2.4	Extremal Monosources	342
9.3	Categories of Pivot-Biregular Spaces	344
9.3.1	Pivot-Biregular Spaces	344
9.3.2	Particular Pivot-Biregular Categories	345
9.4	Categories of Pivot-Embedded Spaces	346
9.4.1	Pivot-Embedded Space Concept	346
9.4.2	Properties of $\mathbb{P}\mathbf{C}$	347
9.4.3	Epis in Pivot-Embedded Subcategories	347
9.4.4	The Class $\mathbf{Dmono}(\mathbb{P}\mathbf{C})$	348
9.4.5	Particular Pivot-Embedded Categories	348
<b>10</b>	<b>Enriched Dualities</b>	351
10.1	Categories of Continuously Algebraic Theory	351
10.1.1	Convergence Vector Space Concept Revisited	352
10.1.2	$\mathbf{CV}$ -Mappings	352
10.1.3	$\mathbf{CV}$ as Two-fold Concrete Category	353
10.1.4	Creation of Parapowers	354
10.1.5	Convergence Rings and Convergence Algebras	354
10.1.6	Paradual Adjunctions	356
10.2	The Binz Duality	359
10.2.1	Enriched Duality via $\mathbb{R}$	359
10.2.2	Reincarnation Mapping of a Binz Space	362
10.2.3	Enriched Duality via $\mathbb{C}$	363
10.2.4	Convergence Probes	363
10.2.5	Enriched Duality via $\mathbb{H}$	365

10.3	Further Enriched Dualities .....	366
10.3.1	Enriched Duality via $\mathbb{B}$ .....	366
10.3.2	The Category of Convergence Lattices .....	366
10.3.3	Enriched Duality via $\mathbb{S}$ .....	367
<b>11</b>	<b>The Category <math>\mathbf{CV}</math></b> .....	369
11.1	Dicompleteness of $\mathbf{CV}$ .....	369
11.1.1	Limit Sources in $\mathbf{CV}$ .....	369
11.1.2	$\mathbf{CV}$ Lifting over $\mathbf{V}$ .....	371
11.1.3	Coequalizers and Quotients in $\mathbf{CV}$ .....	372
11.1.4	Finite Coproducts in $\mathbf{CV}$ .....	373
11.1.5	An Up-Directed Colimit of Finite Products .....	374
11.1.6	General Coproducts in $\mathbf{CV}$ .....	376
11.1.7	Final Episinks and Colimits .....	376
11.1.8	$\mathbf{CV}$ Is Docomplete .....	376
11.2	$\mathbf{CV}$ -Powers and Parapowers .....	377
11.2.1	Parapower Functors into $\mathbf{CV}$ .....	378
11.2.2	$\mathbf{CV}$ -Power Functor .....	378
11.2.3	$\mathbf{CV}$ Enriched Adjunctions .....	380
11.2.4	$\mathbf{CV}$ -Enriched Epireflection .....	380
11.2.5	The $\mathbf{CV}$ -Dual Functor .....	381
11.3	Paratensor Products .....	382
11.3.1	Paratensor Product Spaces .....	382
11.3.2	The Paratensor Functor .....	383
11.3.3	Adjunctions via Paratensors .....	385
11.3.4	The Free $\mathbf{CV}$ -Space Functor .....	386
11.4	Tensor Products .....	387
11.4.1	Multilinear Mappings .....	387
11.4.2	Tensor Product Spaces .....	388
11.4.3	Tensor Product Functors .....	389
11.4.4	Tensor Exponential Law .....	390
11.4.5	Overview of $\mathbf{CV}$ as Category .....	391
<b>12</b>	<b>Reflective Subcategories of <math>\mathbf{CV}</math></b> .....	393
12.1	Categories of Gauged Spaces .....	393
12.1.1	$\mathbf{GV}$ Rigidly Reflective in $\mathbf{CV}$ .....	393
12.1.2	$\mathbf{sGV}$ Quotient Reflective in $\mathbf{GV}$ .....	394
12.2	The Category $\mathbf{eCV}$ .....	394
12.2.1	Characterization of $\mathbf{eCV}$ -Space .....	394
12.2.2	$\mathbf{eCV}$ Enriched Epireflective .....	395
12.2.3	Exponential Laws in $\mathbf{eCV}$ .....	396
12.2.4	Free $\mathbf{eCV}$ -Spaces .....	396
12.2.5	Tensor Products in $\mathbf{eCV}$ .....	397
12.2.6	Initial Lifts over $\mathbf{V}$ Exist for Monosources .....	397
12.2.7	$\mathbf{sGV}$ Rigidly Reflective in $\mathbf{eCV}$ .....	398

12.2.8	eCV-Hyperplanes .....	398
12.2.9	Rmono, Epi, and Dmono in eCV and sGV .....	399
12.3	The Category oCV .....	400
12.3.1	oCV-Spaces .....	400
12.3.2	Exponential Laws in oCV .....	401
12.3.3	Completeness of oCV-Spaces .....	401
12.3.4	Free oCV-Spaces .....	402
<b>13</b>	<b>Linear Continuous Representations .....</b>	<b>403</b>
13.1	Gauged Reflection of Paraduals .....	403
13.1.1	Bounded Mappings in Paraduals .....	403
13.1.2	When the Exponent Space Is Compact .....	404
13.1.3	The Carrier of a Continuous Seminorm .....	404
13.1.4	Representation of $\Delta C X$ as a Union .....	407
13.1.5	Gauged Reflection of a Paradual .....	408
13.2	Reflexive Spaces .....	408
13.2.1	Reflexiveness Concept .....	408
13.2.2	Paraduals Are Reflexive .....	409
13.2.3	Subspaces That Inherit Reflexiveness .....	411
13.2.4	cGV Epireflective in sGV and oCV .....	412
13.2.5	Extended Riesz-Radon Representation .....	412
<b>14</b>	<b>Smooth Continuity .....</b>	<b>417</b>
14.1	Averaging Mappings .....	418
14.1.1	Averaging Mapping Concept .....	418
14.1.2	AV-Mappings for $\mathbb{R}$ -Valued Curves .....	419
14.1.3	$\mathbb{R}$ -Valued Curves and Paths .....	422
14.1.4	Primary and Active Paths .....	424
14.2	The Fundamental Isomorphism .....	426
14.2.1	Spaces of AV-Mappings .....	426
14.2.2	Join of AV-Mappings .....	427
14.2.3	Affine and Piecewise Affine Mappings .....	429
14.2.4	Piecewise Simple AV-Mappings .....	431
14.2.5	Establishment of the Fundamental Isomorphism .....	432
14.2.6	$E$ -Valued Curves and Paths .....	433
14.2.7	Path Spaces .....	434
14.3	Calculus of Vector-to-Vector Mappings .....	438
14.3.1	Tangential Subspaces .....	438
14.3.2	$C^1$ -Mappings on Vector Domains .....	439
14.3.3	Quasiprimary Mappings .....	441
14.3.4	Difference Factorizers .....	442
14.3.5	Vector to Vector $C^n$ -Mappings .....	443
