

Contents

Part I Elliptical t Distribution Theory

Advances and Challenges in Inferences for Elliptically Contoured t Distributions	3
Brajendra C. Sutradhar	
Longitudinal Mixed Models with t Random Effects for Repeated Count and Binary Data	41
R. Prabhakar Rao, Brajendra C. Sutradhar, and V.N. Pandit	

Part II Spatial and/or Time Series Volatility Models with Applications

Zero-Inflated Spatial Models: Application and Interpretation	75
L.M. Ainsworth, C.B. Dean, and R. Joy	
Inferences in Stochastic Volatility Models: A New Simpler Way	97
Vickneswary Tagore, Nan Zheng, and Brajendra C. Sutradhar	

Part III Longitudinal Multinomial Models in Parametric and Semi-parametric Setups

A Generalization of the Familial Longitudinal Binary Model to the Multinomial Setup	135
Brajendra C. Sutradhar, Roman Viveros-Aguilera, and Taslim S. Mallick	
Dynamic Models for Longitudinal Ordinal Non-stationary Categorical Data	169
Brajendra C. Sutradhar and Nairanjana Dasgupta	
Semi-parametric Models for Longitudinal Count, Binary and Multinomial Data	199
Brajendra C. Sutradhar	

**Part IV An Extension of the GQL Estimation Approach for
Longitudinal Data Analysis**

**Penalized Generalized Quasi-Likelihood Based Variable
Selection for Longitudinal Data 233**
Tharshanna Nadarajah, Asokan Mulayath Variyath,
and J. Concepción Loredó-Ostí

Index 251

Advances and Challenges in Parametric and
Semi-parametric Analysis for Correlated Data
Proceedings of the 2015 International Symposium in
Statistics

Sutradhar, B.C. (Ed.)

2016, XIX, 256 p. 12 illus., 6 illus. in color., Softcover

ISBN: 978-3-319-31258-3
