

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background	1
1.2	Mineral Base Oil Processing	2
1.3	Lubricants Blending	4
1.4	Lubricants Types and Applications	5
1.5	Impact on Environment	8
1.6	Lubricants Handling	10
1.7	Disposal and Harmful Ingredients	11
1.8	Biodegradability and Toxicity	12
1.9	Lubricant Life Cycle	13
1.10	Conclusion	14
	References	15
<b>2</b>	<b>Lubricant Additive Impacts on Human Health and the Environment</b>	<b>17</b>
2.1	Introduction	17
2.2	Environmental Effects of Used Oil	18
2.3	Environmental Impacts	19
2.4	Effect of Used Oil on Soil	21
2.5	Future Development of Eco-friendly Lubricants	23
2.6	Chemistry of Lubricant Additives and Their Toxicology to Humans	23
2.7	Lubricant Additives and Their Hazards to the Environment	27
2.8	Ultimate Fate of Lubricant Additives	30
2.9	Biodegradation of Additives	32
2.10	Bio-concentration of Additives	33
2.11	The Future of Additive Technology	33
2.12	Conclusion	34
	References	34

<b>3</b>	<b>The Environment and Lubricant Related Emissions. ....</b>	<b>35</b>
3.1	Introduction .....	35
3.2	Extended Drain Interval .....	38
3.3	Fuel Economy Aspect. ....	38
3.4	Emissions Reduction Aspect .....	40
3.5	Contribution of Lubricant Properties to Diesel Exhaust Emissions .....	42
3.6	Lubricant Additives on Particulate Emissions .....	44
3.7	Conclusion .....	44
