2.1	EU Legislation	5
2.1.1	Introduction	5
2.1.2	Product Directives	6
2.1.3	Workplace Directives	7
2.1.4	Other Directives	8
2.2	Standards	9
2.2.1	Standards	9
2.2.2	Harmonised Standards	10
2.2.3	Eurocodes and Similar Building Codes	12
2.2.4	Semi-standards	13
2.2.5	Supplementary Comments	14
2.3	EU Legislation and Responsibilities	15
2.3.1	Product Directives (and Regulations)	15
2.3.2	Product Liability Directive 85/374	17
2.3.3	General Product Safety Directive 2001/95	18
2.3.4	Workplace Directives	18
2.4	New Legislative Framework (NLF)	19
2.4.1	Introduction	19
2.4.2	Background	19
2.4.3	Important New Aspects	20
2.4.4	Obligations of Economic Operators	21
2.4.5	Some General Conclusions	22
2.5	Producer Liability	23
2.5.1	Introduction	23
2.5.2	Liability According to Product Directives	24

2.5.3	Product Liability Directive 85/374	24
2.5.4	Liability Outside Contract—Subjective/Culpa Liability	26
2.6	Language Requirements	27
2.6.1	Introduction.	27
2.6.2	Machinery Directive 2006/42.	29
2.6.3	Explosive Atmosphere Directive 2014/34 (ATEX)	30
2.6.4	Low-Voltage Directive 2014/35 (LVD).	31
2.6.5	Electromagnetic Compatibility Directive 2014/30 (EMC)	31
3	Machinery Directive.	33
3.1	Machinery Directive.	33
3.1.1	Introduction.	33
3.1.2	Scope of the Machinery Directive	34
3.1.3	Preconditions for Placing Machinery on the Market/Putting It into Service	36
3.1.4	Preconditions for Placing Partly Completed Machinery on the Market	38
3.1.5	Essential Health and Safety Requirements (EHSR).	38
3.1.6	Technical File for Machinery.	39
3.1.7	Technical Documentation for Partly Completed Machinery.	41
3.1.8	Declaration of Conformity (Machinery).	42
3.1.9	Declaration of Incorporation (Partly Completed Machinery)	45
3.1.10	Marking and CE-Marking of Machinery	48
3.1.11	Instructions (Machinery).	49
3.1.12	Assembly Instructions (Partly Completed Machinery)	53
3.2	Machinery Risk Assessment	54
3.2.1	Introduction to Machinery Risk Assessment	54
3.2.2	Tackling the Risk Assessment Obligation	56
3.2.3	Basic Risk Assessment—The Three Core Elements	58
3.2.4	Risk Assessment Procedures and Methods.	63
3.2.5	LOPA (Layers of Protection Analysis)	67
3.2.6	Process Units and Interconnected Machines (Assemblies of Machinery)	82
3.3	Essential Health and Safety Requirements (EHSR).	83
3.3.1	Introduction.	83
3.3.2	Individual EHSR	84
3.4	Functional Safety	112
3.4.1	Introduction.	112
3.4.2	Functional Safety Related to EN 62061	115
3.4.3	Functional Safety Related to EN 13849-1	116

3.4.4	Safety Requirement Specification	124
3.4.5	Required Level (SIL or PL) of Functional Safety	125
3.4.6	Designing Your Own Matrix or Risk Graph for Required SIL Determination	133
3.5	Fire and Explosion Risks	134
3.5.1	Introductory Comments.	135
3.5.2	References	136
3.5.3	Approaching the Fire and Explosion Risks	137
3.5.4	Machinery Fire Risk Assessment	141
3.5.5	Fire Risk Assessment Guidelines	142
3.5.6	Machinery and ATEX Directive Relations.	145
3.5.7	ATEX Equipment Directive 2014/34 Risk Assessment	146
3.5.8	Workplace Fire Risk Assessment	150
3.5.9	Workplace Fire Risk Assessment Guidelines	153
3.6	Machinery Safety Standards	157
3.6.1	Machinery Directive Standards, Listed According to Content.	157
3.6.2	Equivalence Between EN and ISO Standards.	162
3.7	Machinery Workplace Directive.	163
3.7.1	Introduction.	163
3.7.2	Framework Directive	163
3.7.3	Use of Work Equipment.	165
4	EHSR in Focus	167
4.1	Guards	167
4.1.1	Introduction.	167
4.1.2	References	167
4.1.3	Guidelines.	168
4.2	Access	172
4.2.1	Scope	172
4.2.2	References	173
4.2.3	Guidelines.	173
4.3	Safety Signs	177
4.3.1	Scope	177
4.3.2	References	177
4.3.3	Guidelines.	178
4.3.4	EU Legislation on Safety Signs	179
4.3.5	Product Directive Provisions on Safety Signs.	179
4.3.6	Workplace Directive Provisions on Safety Signs	181
4.3.7	Key Standards	185
4.3.8	Other Standards	186
4.4	Noise	186
4.4.1	Introduction.	186
4.4.2	Scope	186

4.4.3	References	187
4.4.4	Guidelines.	187
4.4.5	Sound and Noise—Aspects and Terminology	190
4.5	Emergency Stop	192
4.5.1	Introduction.	192
4.5.2	References	192
4.5.3	Guidelines.	193
4.6	Hazardous Substances and Safety Data Sheets	198
4.6.1	Introduction.	198
4.6.2	References	198
4.6.3	Guidelines.	199
4.6.4	Acronyms and Designations	211
5	Risk Assessment and Risk Reduction Methodologies	213
5.1	Introduction.	213
5.2	Risk Assessment Steps	214
5.3	Step 1: Limits of the Machinery	216
5.4	Step 2: Hazard Identification Methods	217
5.4.1	Machinery Directive, Annex I	218
5.4.2	EN ISO 12100.	219
5.4.3	HAZOP (Hazard and Operability Study)	219
5.4.4	FMEA (Failure Mode and Effect Analysis)	222
5.4.5	FTA (Fault Tree Analysis)	222
5.5	Step 3: Risk Estimation Tools	223
5.5.1	Risk Matrix.	224
5.5.2	Risk Graph	225
5.5.3	Supplementing by Using Numerical Scoring	227
5.5.4	Risk Estimation Aspects	228
5.6	Risk Reduction Based on Functional Safety	229
5.6.1	PL and SIL Assignment Rooted in EN ISO 13849-1	231
5.7	Step 4: Risk Evaluation	231
5.8	Step 5: Risk Elimination/Minimisation	233
5.9	Risk Characterisation/Classification and Decision Making	234
5.9.1	Risk Definition and Specification	234
5.9.2	Some Danish Accident Numbers	234
5.9.3	When Is Risk Acceptable?	235
5.10	Acceptable Risk and the Level of Functional Safety (SIL).	237
5.11	Emergency Stop Decisions	240
6	Basic Knowledge on Fires and Explosions.	243
6.1	Introduction.	243
6.2	Definitions	243
6.3	Fires and Explosions	245
6.4	Deflagrations	246
6.5	Confined (Internal) Explosions.	248

6.6	Partly Confined Gas Explosions	249
6.7	Gas Explosions in Process Areas and Unconfined Areas	250
6.8	Flash Fires	251
A Few Facts About the Author		253
