

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Equations of Motion</b>	<b>9</b>
2.1	Incompressible Flow	9
2.1.1	Problem	11
2.2	The Boussinesq Approximation	12
2.2.1	Problems	15
2.3	Coordinate System	17
<b>3</b>	<b>Stability and Transition</b>	<b>19</b>
3.1	Stability Analysis	19
3.2	Kelvin–Helmholtz Instability	20
3.3	Stability of a One-Dimensional Flow	28
3.3.1	Tollmien–Schlichting Instability	33
3.3.2	Rayleigh Stability Criterion	35
3.4	Routes to Chaos	38
3.4.1	The Logistic Map	38
3.4.2	The Lorenz Equations	43
3.4.3	Transition in Pipe Flow	48
<b>4</b>	<b>The Characteristics of Turbulence</b>	<b>55</b>
4.1	The Burgers Equation	55
4.2	Phenomenology	60
4.3	Experimental and Numerical Methods	66
<b>5</b>	<b>Statistical Description of Turbulence</b>	<b>75</b>
5.1	Statistics	75
5.2	Stationarity and Homogeneity	78
5.3	The Reynolds Equations	80
5.4	Kinetic Theory of Momentum Transfer	83

<b>6</b>	<b>Turbulent Flows</b>	87
6.1	Channel Flow	87
6.2	Mean Velocity Profile	89
6.3	Scaling of Turbulent Wall Flows	95
6.4	Wall Roughness	101
6.5	Pressure Gradient	104
6.6	Free Turbulent Flows	107
6.7	The Free Jet	113
<b>7</b>	<b>Kinetic Energy</b>	125
7.1	Kinetic Energy of the Mean Flow	125
7.2	Kinetic Energy of Turbulence	128
7.3	Prandtl's One-Equation Model	132
7.4	Energy Equation per Component	134
7.5	Convective Turbulence	138
7.6	The Convective Boundary Layer	145
<b>8</b>	<b>Vorticity</b>	151
8.1	Vorticity Equation	152
8.2	Coherent Structures	156
8.3	Enstrophy	161
8.4	The $k$ - $\epsilon$ ( $\epsilon$ - $\epsilon$ ) Model	165
8.5	Second-Order Closure and Algebraic Stress Models	170
8.6	Large Eddy Simulation of Turbulence	176
<b>9</b>	<b>Correlation Function and Spectrum</b>	183
9.1	Time Correlations	183
9.2	The Spectrum	186
9.3	Spatial Correlations and Spectra	188
9.4	The Taylor Hypothesis	194
9.5	Scaling of Turbulence Spectra	197
9.6	Isotropic Turbulence	203
<b>10</b>	<b>Turbulent Diffusion</b>	215
10.1	Statistical Approach	215
10.2	The Diffusion Equation	219
10.3	Inertial Transport	224
	<b>Erratum to: Turbulence</b>	E1
	<b>Appendix A: Equations of Motion</b>	233
	<b>Appendix B: Special Topics</b>	235
	<b>References</b>	267
	<b>Index</b>	273

Turbulence

Introduction to Theory and Applications of Turbulent  
Flows

Nieuwstadt, F.T.M.; Westerweel, J.; Boersma, B.J.

2016, XIV, 284 p. 127 illus., Hardcover

ISBN: 978-3-319-31597-3
