|          |                                                        |    |
|----------|--------------------------------------------------------|----|
| <b>1</b> | <b>Prologue</b>                                        | 1  |
| 1.1      | The KdV and the KP Equations                           | 2  |
| 1.2      | Vertex Operators and Affine Lie Algebras               | 11 |
| 1.3      | Vertex Operators and Vertex Algebras                   | 14 |
| 1.4      | The KP Hierarchy via Vertex Operators                  | 17 |
| 1.5      | Notes and References                                   | 21 |
| <b>2</b> | <b>Generic Linear Recurrence Sequences</b>             | 23 |
| 2.1      | Sequences in Modules over Algebras                     | 24 |
| 2.2      | Generic Polynomials, Partitions and Schur Determinants | 26 |
| 2.3      | Generic Linear Recurrence Sequences                    | 30 |
| 2.4      | Cauchy Problems for Linear Recurrence Sequences        | 34 |
| 2.5      | Formal Laplace Transform and Linear ODEs               | 36 |
| 2.6      | Generalized Wronskians                                 | 39 |
| 2.7      | Notes and References                                   | 45 |
| 2.8      | Exercises                                              | 46 |
| <b>3</b> | <b>Algebras and Derivations</b>                        | 51 |
| 3.1      | Tensor and Exterior Algebra of a Module                | 51 |
| 3.2      | Exterior Algebra of a Free $A$ -Module                 | 54 |
| 3.3      | Exterior Algebras Versus Clifford Algebras             | 55 |
| 3.4      | Derivations, in General                                | 57 |
| 3.5      | Derivations on an Exterior Algebra                     | 59 |
| 3.6      | Notes and References                                   | 61 |
| 3.7      | Exercises                                              | 62 |
| <b>4</b> | <b>Hasse–Schmidt Derivations on Exterior Algebras</b>  | 63 |
| 4.1      | Main Definitions and Properties                        | 63 |
| 4.2      | The Trace Operator Polynomials                         | 68 |
| 4.3      | The Exponential of an Endomorphism                     | 74 |
| 4.4      | Notes and References                                   | 77 |
| 4.5      | Exercises                                              | 79 |

|                                                                    |     |
|--------------------------------------------------------------------|-----|
| <b>5 Schubert Derivations</b>                                      | 81  |
| 5.1 Generalities on Schubert Derivations                           | 82  |
| 5.2 Pieri Formula for Schubert Derivations                         | 86  |
| 5.3 The Grassmannian and Its Plücker Embedding                     | 90  |
| 5.4 Relationship with Schubert Calculus                            | 91  |
| 5.5 Examples                                                       | 99  |
| 5.6 Module Structures Induced by Schubert Derivations, I           | 105 |
| 5.7 Module Structures Induced by Schubert Derivations, II          | 108 |
| 5.8 Giambelli Formula                                              | 110 |
| 5.9 Application to Modules of Finite Rank                          | 111 |
| 5.10 Notes and References                                          | 115 |
| 5.11 Exercises                                                     | 118 |
| <b>6 Decomposable Tensors in Exterior Powers</b>                   | 121 |
| 6.1 A Criterion for Decomposability                                | 122 |
| 6.2 A Schubert Derivation with a Stability Property                | 125 |
| 6.3 On Vertex-Like Operators                                       | 132 |
| 6.4 Plücker Equations for Grassmann Cones                          | 137 |
| 6.5 On the Infinite Exterior Power I                               | 142 |
| 6.6 Notes and References                                           | 143 |
| 6.7 Exercises                                                      | 144 |
| <b>7 Vertex Operators via Generic LRS</b>                          | 147 |
| 7.1 Bosonic and Fermionic Fock Spaces of Finite Order              | 148 |
| 7.2 The Finite Order Boson–Fermion Correspondence                  | 150 |
| 7.3 On the Infinite Exterior Power II                              | 152 |
| 7.4 On the Finite-Dimensional Heisenberg Algebra                   | 153 |
| 7.5 Schubert Derivations on the Fermionic Modules                  | 161 |
| 7.6 Extending the Boson–Fermion Correspondence                     | 168 |
| 7.7 Computing Truncated Vertex Operators                           | 170 |
| 7.8 Vertex Operators in the Classical Boson–Fermion Correspondence | 175 |
| 7.9 Notes and References                                           | 178 |
| 7.10 Exercises                                                     | 180 |
| <b>References</b>                                                  | 185 |
| <b>Index</b>                                                       | 193 |

Hasse-Schmidt Derivations on Grassmann Algebras  
With Applications to Vertex Operators

Gatto, L.; Salehyan, P.

2016, XXIV, 195 p. 16 illus., Hardcover

ISBN: 978-3-319-31841-7
