

Contents

Functional Analysis, Boundary Value Problems and Finite Elements	1
Batmanathan Dayanand Reddy	
Discretization Methods for Solids Undergoing Finite Deformations	17
Peter Wriggers	
Three-Field Mixed Finite Element Methods in Elasticity	53
Batmanathan Dayanand Reddy	
Stress-Based Finite Element Methods in Linear and Nonlinear Solid Mechanics	69
Benjamin Müller and Gerhard Starke	
Tutorial on Hybridizable Discontinuous Galerkin (HDG) for Second-Order Elliptic Problems.	105
Ruben Sevilla and Antonio Huerta	
Least-Squares Mixed Finite Element Formulations for Isotropic and Anisotropic Elasticity at Small and Large Strains.	131
Jörg Schröder, Alexander Schwarz and Karl Steeger	
Theoretical and Numerical Elastoplasticity.	177
Batmanathan Dayanand Reddy	
On the Use of Anisotropic Triangles with Mixed Finite Elements: Application to an “Immersed” Approach for Incompressible Flow Problems	195
Ferdinando Auricchio, Adrien Lefieux and Alessandro Reali	

Advanced Finite Element Technologies

Schröder, J.; Wriggers, P. (Eds.)

2016, VII, 236 p. 92 illus., 47 illus. in color., Hardcover

ISBN: 978-3-319-31923-0
