

Contents

1	Biomedical Polymers: An Overview	1
1.1	Introduction	1
1.2	Classification	2
1.2.1	Synthetic Polymers	2
1.2.2	Naturally—Occurring Polymers	9
1.3	Conclusion	17
	References	18
2	Biomedical Polymers: Synthetic Strategies	23
2.1	Introduction	23
2.2	Condensation Polymerization	24
2.2.1	Polyesters and Polyarylates	25
2.2.2	Polyesteramides	27
2.2.3	Polycarbonates	30
2.2.4	Polyurethanes	31
2.3	Addition Polymerization	33
2.3.1	Ionic Polymerization	34
2.3.2	Coordination-Insertion Polymerization	39
2.3.3	Controlled/Living Radical Polymerization	40
2.4	Conclusion	48
	References	48
3	Biomedical Polymers: Processing	55
3.1	Introduction	55
3.2	Thermal Processing	57
3.2.1	Thermoforming	57
3.2.2	Extrusion	58
3.2.3	Injection Molding	60
3.3	Solvent-Based Processing of Biomaterials	61
3.3.1	Electrospinning	62
3.3.2	Hollow Fiber Membranes	64
3.3.3	Porous Scaffolds	65

- 3.4 Solid Free Form Fabrication (SFF) 66
 - 3.4.1 Stereolithography (SLA) 67
 - 3.4.2 Fused Deposition Modeling (FDM) 68
- 3.5 Conclusion 70
- References 70

Biomedical Polymers

Synthesis and Processing

Damodaran, V.B.; Bhatnagar, D.; Murthy, N.S.

2016, VIII, 71 p. 52 illus., 17 illus. in color., Softcover

ISBN: 978-3-319-32051-9
