

Contents

1	Introduction	1
1.1	The Background	1
1.2	The Outline of the Book	3
	References	4
2	Description of String Instruments for Classical Music	5
2.1	Evolution of String Instruments	7
2.1.1	Short Historic Overview	7
2.1.2	String Instruments and the Symphony Orchestra	13
2.2	String Instruments as Art Objects	18
2.2.1	Utility and Beauty, Inseparable Concepts for Baroque Musical Instrument Building	21
2.2.2	Precious Materials for Baroque Musical Instruments	25
2.3	Organologic Description of String Instruments of a Symphony Orchestra	31
2.3.1	Geometry of String Musical Instruments	31
2.3.2	Constitutive Parts of String Instrument	42
2.4	Craftsman’s Technology for Construction of String Instruments	52
2.4.1	Technology for the Manufacture of Instruments of the Violin Family	53
2.4.2	Technology for Manufacturing a Concert Classical Guitar	55
2.4.3	Technology for the Concert Harp	58
2.4.4	Technology for the Grand Piano Soundboard	60
2.4.5	The Case of the Harpsichord	65
2.5	Directivity of String Instruments	67
2.5.1	The Violin Family	69
2.5.2	The Concert Harp	73
2.5.3	The Grand Piano	74

- 2.6 New Instruments. 74
 - 2.6.1 The Hutchins—Schelleng Violin Octet 74
 - 2.6.2 The Caldersmith Classic Guitar Family 79
- 2.7 Summary 83
- Appendices 84
- References. 88

- 3 Mechanical Characterisation of Materials for String Instrument 93**
 - 3.1 Introduction 93
 - 3.2 Mechanical Characterisation of Materials 94
 - 3.2.1 Elastic Constants of Materials—Theoretical Aspects 95
 - 3.2.2 Experimental Aspects Related to Elastic Constants Measurements 99
 - 3.3 Anisotropy of Wood. 111
 - 3.4 Effect of Wood Moisture Content Variation on Tone Quality 119
 - 3.5 Summary 122
 - Appendices 123
 - References. 129

- 4 Measuring Vibration Modes of Violins’ and Other Instruments’ Plates 133**
 - 4.1 Modal Analysis of Violins 136
 - 4.2 Experimental Modal Testing. 136
 - 4.3 Optical Methods for Vibration Measurements on Violins. 138
 - 4.3.1 Holographic Interferometry 139
 - 4.3.2 Laser Doppler Vibrometry. 142
 - 4.3.3 Near Field Acoustic Holography 146
 - 4.4 X-Ray Computed Tomography. 146
 - 4.5 Radiation and Directivity of Violins and Other Instruments 151
 - 4.6 Summary 155
 - Appendices 156
 - References. 170

- 5 Material Properties and the Modes of Vibration of Piano Soundboard. 175**
 - 5.1 Introduction 176
 - 5.2 Piano Soundboard. 179
 - 5.2.1 Manufacturing Technology of the Piano Soundboard 181
 - 5.2.2 Parameters for Quality Assessment of Wood for Soundboard 183
 - 5.2.3 Piano Soundboard Vibrations 191

5.2.4	Wood Properties and Vibroacoustical Characteristics of Different Pianos	207
5.3	Piano Action Mechanism	207
5.3.1	The Hammer	214
5.3.2	Wippen Assembly	216
5.3.3	The Keyboard	218
5.3.4	The Foot Control Pedals of the Piano	220
5.3.5	Piano Strings	224
5.3.6	Structural Elements Supporting the Strings	228
5.4	About the Connection of Case Vibration with Soundboard Vibration.	233
5.4.1	Vibration of Case Structural Elements of a Grand Piano	234
5.4.2	Vibration of Case Structural Elements of an Upright Piano	238
5.4.3	Comparison Between Grand Piano and Upright Piano Admittance	242
5.5	Summary	244
	References.	245
6	Material Properties and the Modes of Vibration of the Concert Harp Soundboard.	249
6.1	Introduction	249
6.2	Constitutive Elements and Materials for Concert Harps	256
6.2.1	The Soundbox	256
6.2.2	The Neck and the Strings	259
6.2.3	The Pillar	263
6.2.4	The Pedals and the Base of the Harp	264
6.3	Vibration of the Soundboard of a Concert Harp	265
6.4	Vibration of the Soundbox of the Concert Harp	272
6.5	About Soundbox Vibration of Old and New Harps	276
6.6	Summary	279
	References.	281
7	Ageing of Wood.	283
7.1	Introduction	284
7.2	Natural Ageing of Wood	287
7.2.1	Structural Modification	287
7.2.2	Modification of Physical and Mechanical Properties (Density, E, G, tan δ)	295
7.3	Ageing of Wood Induced by Long Term Static Loading and Vibrations	305
7.3.1	Static Loading	305
7.3.2	Vibrations	316
7.4	Summary	320
	References.	321

8	Ageing of Musical Instruments—About the “Old” and “New Violins”	325
8.1	Background	326
8.2	Wood Density on Old and New Violins	336
8.3	Ageing and Long Term Playing of Violins	339
8.4	Tonal Quality of Old and New Violins	342
8.4.1	Criteria for the Characterization of Violin Timbre	342
8.4.2	Statistical Treatment of Data on Violin Timbre	350
8.4.3	Physicists’ Viewpoints on Good and Bad Violins, at the Beginning of the XXIst Century	352
8.5	Musicians’ Viewpoints on “Good” and “Bad” Violins	367
8.6	Summary	368
	References	369
9	The Varnish	373
9.1	Introduction	373
9.2	Description of Varnishing Procedure	381
9.3	Microanalysis for Characterization of Old Violin Coating Systems	383
9.3.1	Methodologies Used for Microanalyses	387
9.3.2	Chemical Compounds	388
9.4	Influence of Coatings on Finished Surfaces Properties	418
9.4.1	Mechanical Approach. Modelling of Wood-Coating Composites	419
9.4.2	Experimental Approach	422
9.4.3	Surface Roughness	434
9.4.4	The Thin Films	439
9.5	Summary	440
	Appendices	441
	References	449
10	Strings for Musical Instruments of the Baroque and Romantic Periods	455
10.1	A Brief Formal Description of Strings	456
10.1.1	Vibration Modes and Frequency of Strings	456
10.1.2	About the Excitation of Musical Instruments	458
10.1.3	Sound Decay	462
10.1.4	Mechanical Behaviour of Strings Under Stress	462
10.2	Physical and Mechanical Properties of Materials for Strings	464
10.2.1	Historical Background	464
10.2.2	Pitch and Its Historic Evolution in Western Music	467
10.2.3	Materials for Strings	470
10.3	Inharmonicity of Strings Made of Various Materials	509
10.3.1	Inharmonicity of Piano Strings	510
10.3.2	Inharmonicity of Harp Strings	514

10.4	Summary	517
	Appendix	518
	References	520
11	The Bridge, The Soundpost and The Bass Bar for Violin Family Instruments	525
11.1	Introduction	525
11.2	The Bridge	526
11.2.1	Experimental Evidence of Bridge Geometry Effects	529
11.2.2	Bridge Mobility	533
11.2.3	Effect of Bridge Stiffness and Mass	534
11.2.4	Effect of String Coupling	536
11.2.5	Innovation in Bridge Design	537
11.3	The Soundpost, and The Bass Bar	542
11.3.1	The Soundpost	542
11.3.2	The Bass Bar	546
11.4	Damage Produced by The Bridge and The Soundpost to the Violin Top Plate	547
11.5	Summary	549
	References	549
12	Pieces for String Fitting	553
12.1	Introduction	553
12.2	The Tailpiece	554
12.3	The Neck, the Fingerboard and the Nut	559
12.4	The Pegs	563
12.5	The Endpin	566
12.5.1	The Geometry and the Materials Used for the Endpins	569
12.5.2	Endpin Effects on Acoustical Performance of Cello and Double Bass	570
12.6	Summary	579
	References	580
13	The Bow	583
13.1	Introduction	583
13.2	Bow Function	586
13.2.1	Bow Structural Elements	586
13.2.2	About the Modes of Vibrations of the Bow	589
13.2.3	About the Diameter of the Stick	591
13.2.4	About the Large Deformations of the Bow	594
13.2.5	About the Bouncing Modes of the Bow	594
13.2.6	About the Bow Hair Mechanics	600
13.3	Wood Species and Other Materials for Bows	605
13.3.1	Materials for the Stick	605
13.3.2	Materials for the Frog	620

- 13.3.3 Materials for the Button 623
- 13.4 Bow Hair 624
- 13.5 The Rosin 629
- 13.6 Summary 632
- References. 634
- 14 Dendrochronology and Wood Resources for Authentic, Historical Period Musical Instruments. 639**
 - 14.1 Background 639
 - 14.2 Violins and Annual Ring Pattern of Spruce Resonance Trees 645
 - 14.2.1 About the Resonance Trees 645
 - 14.2.2 Actual Provenance of Spruce Resonance Trees and Logs 649
 - 14.2.3 Dendro-Provenance Detection with Fourier Transform Near Infrared Spectroscopy 652
 - 14.3 Annual Rings on Violins’ Wedges and Violins’ Top Plates 655
 - 14.3.1 Manufacturing of Wedges 655
 - 14.3.2 Annual Rings on the Top Plate of the Violin 656
 - 14.4 Dendrochronology of Spruce Resonance Wood 660
 - 14.4.1 Tree Ring Chronology. 660
 - 14.4.2 Site Chronology 662
 - 14.5 Wood Provenance of Old Italian Instruments and Other Period Instruments 663
 - 14.5.1 Master Chronologies and Wood Resources Sites. 664
 - 14.5.2 Spatial Correlation Analysis and Wood Resources Sites 664
 - 14.5.3 Dating Musical Instruments Based on Master Chronologies and Spatial Correlation Analysis 665
 - 14.6 Dating Some Remarkable Period String Musical Instruments 674
 - 14.6.1 Dating Individual Instruments 674
 - 14.6.2 Dating Instruments Belonging to Different Collections 678
 - 14.7 Summary 688
 - Appendix 689
 - References. 694
- 15 Restoration of Historical Musical Instruments 699**
 - 15.1 Introduction 699
 - 15.2 Ageing of Musical Instruments. 702
 - 15.3 Criteria for Intervention on Historic Musical Instruments. 705
 - 15.3.1 Diagnosis of the Condition of Musical Instruments. 707
 - 15.3.2 Added Materials for Restoration of Stringed Musical Instruments 708

15.4	Restoration of Remarkable Historical Instruments—Some Examples	711
15.4.1	Restoration of the Guarneri Del Gesù Violin “Il Cannone”.	712
15.4.2	Restoration of a Piano Forte from Romantic Era.	714
15.5	Summary	733
	References.	733
16	Preservative Conservation of Musical Instruments.	737
16.1	Introduction	737
16.2	Environmental Requirements for Musical Instruments Conservation.	739
16.2.1	The Effect of Indoor Air Pollution on the Conservation of Musical Instruments.	739
16.2.2	Sunlight and Conservation Conditions of Musical Instruments	744
16.2.3	Climate Change Trends and Prediction of Indoor Climate Data	746
16.3	Risks of Biological Attacks on Historic Musical Instruments.	750
16.3.1	Bacterial Attack.	751
16.3.2	Fungal Attack	751
16.3.3	<i>Insects’ Attack</i>	752
16.4	Dimensional Stability and Integrity of Historic Musical Instruments.	757
16.4.1	Stringed Instruments. the Violin by Guarneri Del Gesù the ‘Cannone’	758
16.4.2	Keyboard Instruments the Harpsichord Couchet—1652	772
16.5	Cleaning and Maintenance of Stringed Musical Instruments.	781
16.5.1	Cleaning Treatments	782
16.5.2	Maintenance	783
16.5.3	Storage for Historic Musical Instruments.	784
16.6	Summary	785
	References.	786
17	About Traditional and New Wood Species for String Instruments	793
17.1	Introduction	793
17.2	Traditional Species for Violin.	794
17.2.1	Spruce (<i>Picea abies</i>)	795
17.2.2	Other Softwood Species	809
17.2.3	Curly Maple (<i>Acer pseudoplatanus</i>)	812
17.3	New Australian Species for String Instruments.	816
17.3.1	Macroscopic Description	818

- 17.3.2 Acoustical Properties of Some Australian Species 818
- 17.4 Acoustic Criteria for Matching New Species
for the Top and Back of Violins 822
- 17.5 About the Acoustical Quality of String Instruments
Made with New Species 825
- 17.6 New Wood Species for Bow 827
- 17.7 Summary 830
- Appendices 831
- References. 838
- 18 Composite Materials for Musical Instruments 845**
 - 18.1 Introduction 845
 - 18.2 Carbon and Graphite Fibre Composites 846
 - 18.2.1 Composites for Top Plates of Guitars and Violins. 850
 - 18.2.2 Composites for the Soundboards of Concert Harps 856
 - 18.2.3 Composites for Piano Soundboard
and Piano Building 862
 - 18.3 Nanocomposites 863
 - 18.4 Natural Fibre Composites 866
 - 18.5 Ceramic Polymer Composites 868
 - 18.6 Summary 870
 - Patents. 872
 - References. 873
- 19 Materials from Sustainable Resources for Musical Instruments 877**
 - 19.1 Introduction 877
 - 19.2 Materials from Natural Forest Resources 878
 - 19.2.1 Biological Treatment of Wood 878
 - 19.2.2 Chemical Treatment of Wood 881
 - 19.2.3 Physical Treatments of Wood 886
 - 19.3 New Materials from Sustainable Forest Resources 897
 - 19.4 Other Resources 900
 - 19.5 Summary 901
 - Appendices 902
 - References. 907
- 20 String Musical Instruments as Educational Tools. 911**
 - 20.1 How Musical Sound and Musical Instruments Underlie
Material Science 912
 - 20.1.1 The Musical Scale and Tunings. 913
 - 20.1.2 The Pitch and the Duration of a Musical Sound 919
 - 20.1.3 The Timbre 922
 - 20.1.4 The Loudness 923
 - 20.1.5 Musical Sounds and Material Characteristics. 925
 - 20.2 Musical Instruments in an Academic Engineering Program 927
 - 20.3 Schools and the Crafts for String Instrument Creation 928

20.4 Innovation and International Competitions for Violinmakers . . . 934

20.5 Concluding Remarks. 936

Appendices 936

References. 938

21 About the Economic Value of Musical Instruments 943

21.1 Introduction 943

21.2 Criteria for Authentication of Old Italian Violins and Period
Keyboard Instruments. 944

21.3 About the “Violin Fraud” 946

21.4 Old Violins and Other Period Instruments as an Alternative
Investment 947

21.5 Concluding Remarks. 953
