1	Aquifer Characterization and Properties	1
1.1	Introduction	1
1.2	Hydraulic Aquifer Types	4
1.3	Lithologic Aquifer Types	6
1.4	Groundwater Hydraulics Basics	7
1.4.1	Darcy's Law and Hydraulic Conductivity	7
1.4.2	Transmissivity	9
1.4.3	Storativity	10
1.4.4	Porosity and Permeability	11
1.4.5	Dispersivity	13
1.5	Aquifer Heterogeneity	15
1.5.1	Types and Scales of Aquifer Heterogeneity	15
1.5.2	Anisotropy	17
1.5.3	Connectivity	19
1.6	Aquifer Characterization Approach	20
	References	21
2	Facies Analysis and Sequence Stratigraphy	25
2.1	Introduction	25
2.2	Facies, Facies Sequences, and Facies Models	27
2.3	Limitation of Facies Models	30
2.4	Sequence Stratigraphy	31
2.4.1	Introduction	31
2.4.2	Sequence Stratigraphic Concepts and Definitions	34
2.4.3	Applications of Sequence Stratigraphy	36
2.5	Facies Modeling	40
2.6	Hydrofacies	41
	References	45
3	Siliciclastic Aquifers Facies Models	49
3.1	Introduction to Siliciclastic Aquifers	49
3.2	Fluvial Systems	53

3.2.1	Meandering River Facies	55
3.2.2	Braided-Stream Facies	60
3.2.3	Hydrogeology of Alluvial Aquifers	62
3.3	Alluvial-Fan Deposits	63
3.3.1	Alluvial-Fan Facies	63
3.3.2	Alluvial-Fan Hydrogeology	67
3.4	Deltas	68
3.5	Eolian Sand Deposits	71
3.6	Lake (Lacustrine) Deposits	75
3.7	Glacial Sediments	76
3.8	Linear Terrigenous Shorelines	81
3.8.1	Beach and Strand Plain Facies	83
3.8.2	Lagoonal and Tidal Flat Facies	85
3.8.3	Hydrogeology	87
	References	87
4	Carbonate Facies Models and Diagenesis	91
4.1	Introduction	91
4.2	Carbonate Diagenesis and Porosity and Permeability	93
4.2.1	Eogenetic Dissolution and Precipitation	94
4.2.2	Physical and Chemical Compaction	95
4.2.3	Dolomitization	97
4.3	Carbonate Facies and Sequence Stratigraphy	99
4.3.1	Shallowing-Upwards Sequences	101
4.3.2	Reefs	102
4.3.3	Carbonate Sands	106
4.3.4	Pelagic Carbonates	107
	References	108
5	Aquifer Characterization Program Development	111
5.1	Introduction	111
5.2	Groundwater Model Scale	112
5.3	Aquifer Characterization Techniques	114
5.3.1	Aquifer Hydraulic Properties Evaluation Techniques	114
5.3.2	Aquifer Lithology and Mineralogy Evaluation Techniques	117
5.3.3	Water Chemistry Evaluation Techniques	118
5.4	Scale Dependence of Aquifer Properties	120
5.5	Constraints on Implementation of Characterization Techniques	122
5.6	Use of Aquifer Characterization Data	124
