<b>1</b>	<b>Design of Fuzzy Supervisor-Based Adaptive Process Control Systems.</b>	<b>1</b>
	Snejana T. Yordanova	
1.1	Introduction.	2
1.2	State-of-the-Art and Problem Formulation	5
1.2.1	Adaptive FLCs Based on Classical Adaptive Control Theory	5
1.2.2	FLS-Based Adaptive FLCs	9
1.2.3	Problem Formulation	10
1.3	Procedure for Design of Adaptive Two-Level FLS-Based FLC.	12
1.4	TSK Plant Modeling	20
1.5	GA Optimization of the FLS-Based AFLC	24
1.6	Case Studies for FLS-Based AFLC Design and GA Optimization	25
1.7	Approximation of Adaptive FLS-Based FLC with PDC of Simple Structure for the Purpose of PLC Implementation and System Stability Analysis.	35
1.7.1	Approximation TSK Modeling of the FLS-Based AFLC.	35
1.7.2	Lyapunov Stability Analysis of System with PDC-AFLC	37
1.8	Conclusion	39
	References	39
<b>2</b>	<b>Intelligent Carpooling System.</b>	<b>43</b>
	Elena Nechita, Gloria-Cerasela Crişan, Sergiu-Mădălin Obreja and Constantin-Sebastian Damian	
2.1	Introduction.	43
2.2	Shared-Use Mobility—Historical Evolution	44
2.3	Conceptual Models for Shared Mobility Systems	48

2.4	Modelling a Carpooling System for Bacău, Romania . . . . .	49
2.4.1	Country Context . . . . .	49
2.4.2	City Context . . . . .	50
2.4.3	Information Requirements for an Efficient Model . . . . .	51
2.5	Applications and Experiments . . . . .	53
2.5.1	SplitCar . . . . .	53
2.5.2	Buddy . . . . .	57
2.6	Results and Discussion . . . . .	65
2.7	Conclusions and Further Work . . . . .	68
	References . . . . .	70
<b>3</b>	<b>Naval Intelligent Authentication and Support Through Randomization and Transformative Search. . . . .</b>	<b>73</b>
	Stuart H. Rubin and Thouraya Bouabana-Tebibel	
3.1	Introduction. . . . .	73
3.1.1	Context of the Study . . . . .	74
3.1.2	Problem Description. . . . .	75
3.2	Technical Approach . . . . .	76
3.2.1	Illustrative Developments . . . . .	79
3.2.2	Stochastic Validation . . . . .	81
3.3	Domains of Application . . . . .	82
3.3.1	State-Space Prediction for Autonomic Computing . . . . .	82
3.3.2	WAMS: Wartime Associate for Military Strategy. . . . .	85
3.3.3	Cyber WAMS . . . . .	96
3.4	The System of Systems Randomization Methodology. . . . .	99
3.5	Discussion and Concluding Remarks . . . . .	103
	Appendix I: The 3-2-1 Skew . . . . .	105
	Appendix II: Performer Capabilities. . . . .	106
	References . . . . .	107
<b>4</b>	<b>Big Data Approach in an ICT Agriculture Application . . . . .</b>	<b>109</b>
	R. Dennis A. Ludena and Alireza Ahrary	
4.1	Introduction. . . . .	109
4.1.1	World Penetration of ICT in Agriculture. . . . .	111
4.1.2	Future Prospects . . . . .	112
4.2	ICT in Agriculture in Japan. . . . .	113
4.2.1	Japanese Agriculture in Numbers . . . . .	114
4.2.2	The Academic Point of View . . . . .	114
4.2.3	The Corporate Point of View. . . . .	116
4.2.4	The Future of ICT in Agriculture in Japan . . . . .	118
4.2.5	Business Applications of ICT in Agriculture in Japan . . . . .	118

4.3	Our Solution's Perspective . . . . .	119
4.3.1	Questionnaire Based Analysis . . . . .	120
4.3.2	Project Member Definition . . . . .	121
4.3.3	Functions Among Project Members . . . . .	123
4.3.4	Interface Design. . . . .	125
4.4	Big Data Approach . . . . .	125
4.4.1	Data Availability . . . . .	125
4.4.2	Security . . . . .	126
4.4.3	Ethics. . . . .	126
4.4.4	Inaccurate Interpretation of Big Data Results. . . . .	127
4.4.5	Data Set Equivalence . . . . .	127
4.4.6	Big Data Applications . . . . .	128
4.4.7	Project Security . . . . .	129
4.4.8	Project Security Definitions . . . . .	130
4.4.9	Possible Threats Against the Project Infrastructure . . . . .	130
4.5	Conclusions . . . . .	132
	References . . . . .	133
<b>5</b>	<b>Intelligent Control Systems and Applications on Smart Grids . . . . .</b>	<b>135</b>
	Hossam A. Gabbar, Adel Sharaf, Ahmed M. Othman, Ahmed S. Eldessouky and Abdelazeem A. Abdelsalam	
5.1	Introduction. . . . .	136
5.1.1	How Important Is AI to Engineering Applications? . . . . .	138
5.1.2	Artificial Intelligence History. . . . .	138
5.2	FACTS Implementing AI Algorithms . . . . .	140
5.2.1	FMRLC Algorithm. . . . .	142
5.2.2	Tri-loop Dynamic Error-Driven ANFIS-PID with GA Optimization . . . . .	146
5.3	Application 1: MG Stability Enhancement Using SVC with FMRLC. . . . .	149
5.3.1	Simulation Results . . . . .	150
5.4	Application 2: A GA-ANFIS Self Regulating Scheme for Induction Motor Filter Compensation . . . . .	152
5.4.1	Green Plug-Filter Compensator (GP-FC) Scheme. . . . .	152
5.4.2	Case System Description. . . . .	153
5.4.3	Simulation Results . . . . .	154
5.4.4	Few Extra Cases and Results for Simulated System . . . . .	158
5.4.5	Conclusion . . . . .	160
	Appendix . . . . .	161
