

Contents

1	The Biophysics of Infection	1
	Mark C. Leake	
2	Single-Molecule Observation of DNA Replication Repair Pathways in <i>E. coli</i>	5
	Adam J.M. Wollman, Aisha H. Syeda, Peter McGlynn and Mark C. Leake	
3	Investigating the Swimming of Microbial Pathogens Using Digital Holography	17
	K.L. Thornton, R.C. Findlay, P.B. Walrad and L.G. Wilson	
4	What Is the ‘Minimum Inhibitory Concentration’ (MIC) of Pexiganan Acting on <i>Escherichia coli</i>?—A Cautionary Case Study	33
	Alys K. Jepson, Jana Schwarz-Linek, Lloyd Ryan, Maxim G. Ryadnov and Wilson C.K. Poon	
5	Evolution of Drug Resistance in Bacteria	49
	B. Waclaw	
6	Using Biophysics to Monitor the Essential Protonmotive Force in Bacteria.	69
	Mei-Ting Chen and Chien-Jung Lo	
7	The Type I Restriction Enzymes as Barriers to Horizontal Gene Transfer: Determination of the DNA Target Sequences Recognised by Livestock-Associated Methicillin-Resistant <i>Staphylococcus aureus</i> Clonal Complexes 133/ST771 and 398.	81
	Kai Chen, Augoustinos S. Stephanou, Gareth A. Roberts, John H. White, Laurie P. Cooper, Patrick J. Houston, Jodi A. Lindsay and David T.F. Dryden	

8	Biomechanical Analysis of Infectious Biofilms	99
	David Head	
9	Designing a Single-Molecule Biophysics Tool for Characterising DNA Damage for Techniques that Kill Infectious Pathogens Through DNA Damage Effects	115
	Helen Miller, Adam J.M. Wollman and Mark C. Leake	
10	Bacterial Surfaces: Front Lines in Host–Pathogen Interaction.	129
	Jane E. King and Ian S. Roberts	
11	Biophysical Approaches to Bacterial Gene Regulation by Riboswitches	157
	Cibran Perez-Gonzalez, Jonathan P. Grondin, Daniel A. Lafontaine and J. Carlos Penedo	
12	Bugs on a Slippery Plane	193
	Dmitri O. Pushkin and Martin A. Bees	
13	Transcription Regulation and Membrane Stress Management in Enterobacterial Pathogens	207
	Nan Zhang, Goran Jovanovic, Christopher McDonald, Oscar Ces, Xiaodong Zhang and Martin Buck	
14	How Biophysics May Help Us Understand the Flagellar Motor of Bacteria Which Cause Infections	231
	Matthew A.B. Baker	
15	Mechanics of Bacterial Cells and Initial Surface Colonisation	245
	Sebastian Aguayo and Laurent Bozec	
16	Neutron Reflectivity as a Tool for Physics-Based Studies of Model Bacterial Membranes.	261
	Robert D. Barker, Laura E. McKinley and Simon Titmuss	
17	Mechanisms of <i>Salmonella</i> Typhi Host Restriction.	283
	Stefania Spanò	
18	Insights into Biological Complexity from Simple Foundations.	295
	L. Albergante, D. Liu, S. Palmer and T.J. Newman	
19	Force Spectroscopy in Studying Infection	307
	Zhaokun Zhou and Mark C. Leake	
20	Imaging Immunity in Lymph Nodes: Past, Present and Future.	329
	James Butler, Amy Sawtell, Simon Jarrett, Jason Cosgrove, Roger Leigh, Jon Timmis and Mark Coles	

**21 Novel Approaches to Manipulating Bacterial Pathogen Biofilms:
Whole-Systems Design Philosophy and Steering Microbial
Evolution. 347**
Alexandra S. Penn

**Erratum to: The Type I Restriction Enzymes as Barriers to Horizontal
Gene Transfer: Determination of the DNA Target Sequences
Recognised by Livestock-Associated Methicillin-Resistant
Staphylococcus aureus Clonal Complexes 133/ST771 and 398 E1**
Kai Chen, Augoustinos S. Stephanou, Gareth A. Roberts, John H. White,
Laurie P. Cooper, Patrick J. Houston, Jodi A. Lindsay
and David T.F. Dryden

Index 361

Biophysics of Infection

Leake, M.C. (Ed.)

2016, IX, 362 p. 87 illus., 76 illus. in color., Hardcover

ISBN: 978-3-319-32187-5
