

# Contents

<b>1 Kobayashi hyperbolicity: basic theory</b>	1
1.1 The Kobayashi distance	1
1.1.1 Infinitesimal form	3
1.2 Brody's criterion for hyperbolicity	3
1.2.1 Applications	6
1.3 Riemann surfaces and uniformization	7
<b>2 Algebraic hyperbolicity</b>	11
2.1 Hyperbolicity and genus of curves	11
2.2 Algebraic hyperbolicity of generic projective hypersurfaces of high degree	16
2.2.1 Global generation of the twisted tangent bundle of the universal family	18
2.2.2 Consequences of the twisted global generation	20
2.3 A brief history of the above results	24
<b>3 Jets spaces</b>	25
3.1 Projectivization of directed manifolds	25
3.1.1 Lifting of curves	26
3.1.2 Jets of curves	26
3.2 Projectivized jet bundles	28
3.2.1 Regular and singular loci	28
3.3 Jet differentials	30
3.3.1 Invariant jet differentials and projectivized jet bundles	34
3.3.2 Sufficient conditions for relative positivity	35
<b>4 Hyperbolicity and negativity of the curvature</b>	37
4.1 Curvature and positivity	37
4.1.1 Special case of hermitian line bundles	39
4.2 The Ahlfors-Schwarz lemma	42
4.2.1 The Bloch theorem	45
4.3 A general strategy for algebraic degeneracy	47

<b>5</b>	<b>Hyperbolicity of generic surfaces in projective 3-space</b>	51
5.1	General strategy	51
5.2	Existence of jet differentials	52
5.3	Global generation of the twisted tangent space of the universal family	55
5.4	Proof of the hyperbolicity	60
<b>6</b>	<b>Algebraic degeneracy for generic projective hypersurfaces</b>	65
6.1	Statement of the result and scheme of the proof	65
6.2	Existence of jet differentials	68
6.2.1	Algebraic holomorphic Morse inequalities	68
6.3	Proof of the existence of jet differentials in dimension 3	69
6.4	Proof of the existence of jet differentials in higher dimensions	71
6.4.1	Choice of the appropriate subbundle	71
6.4.2	Cohomology ring of $X_k$	74
6.4.3	Evaluation in terms of the degree	74
6.4.4	Bigness of $\mathcal{O}_{X_n}(1)$	77
6.5	Meromorphic vector fields	81
6.6	Effective aspects	82
6.6.1	The strategy of the effective estimate	83
	<b>Bibliography</b>	87

Hyperbolicity of Projective Hypersurfaces

Diverio, S.; Rousseau, E.

2016, XIV, 89 p. 3 illus., Hardcover

ISBN: 978-3-319-32314-5
