

Contents

1	Introduction	1
1.1	The spaces $C^b(K)$ and $C_0(K)$	1
1.2	Notation	2
1.3	Lattices and linear spaces	6
1.4	Topological notions	11
1.5	The Stone–Čech compactification	26
1.6	Projective topological spaces	34
1.7	Boolean algebras and Boolean rings	37
2	Banach Spaces and Banach Lattices	47
2.1	Banach spaces	47
2.2	Isomorphisms and isometric isomorphisms	55
2.3	Banach lattices	66
2.4	Complemented subspaces of Banach spaces	73
2.5	Projection properties and injective Banach spaces	80
2.6	The Krein–Milman and Radon–Nikodým properties	87
3	Banach Algebras and C^*-Algebras	93
3.1	Banach algebras	93
3.2	C^* -algebras	99
3.3	Borel functions and Baire classes	102
3.4	General C^* -algebras	105
4	Measures	109
4.1	Measures	109
4.2	Discrete and continuous measures	118
4.3	A Boolean ring	122
4.4	The spaces $L^p(K, \mu)$	128
4.5	The space $C(K)$ as a Grothendieck space	137

4.6	Singular families of measures	143
4.7	Normal measures	147
5	Hyper-Stonean Spaces	161
5.1	Hyper-Stonean spaces	161
5.2	Some commutative C^* -algebras	166
5.3	The hyper-Stonean space of the unit interval	170
5.4	The bidual of $C_0(K)$	171
5.5	L -decompositions	175
5.6	Biduals of C^* -algebras	180
6	The Banach Space $C(K)$	183
6.1	Isomorphisms of the spaces $C(K)$	184
6.2	Elementary theory	191
6.3	Uniqueness of preduals of $M(K)$	194
6.4	The isometric theory	197
6.5	The space \tilde{K}	202
6.6	Embedding Borel functions	206
6.7	Baire classes	211
6.8	Injectivity of $C(K)$ -spaces	216
6.9	The isomorphic theory	228
6.10	$C(X)$ as a bidual space	232
6.11	Summary	245
6.12	Open questions	246
	References	249
	Index of Terms	265
	Index of Symbols	275

Banach Spaces of Continuous Functions as Dual
Spaces

Dales, H.G.; Dashiell, Jr., F.K.; Lau, A.T.-M.; Strauss, D.

2016, XIV, 277 p. 6 illus., Hardcover

ISBN: 978-3-319-32347-3
