

Contents

1	Co-evolution	1
1.1	Introduction	1
1.2	Co-evolution	4
	References	9
2	Bat Echolocation: Adaptations for Prey Detection and Capture	13
2.1	An Introduction to Echolocation	13
2.1.1	Detection and Classification of Targets	14
2.1.2	Components of Calls	17
2.1.3	Duty Cycle	21
2.1.4	Tracking Targets	23
2.1.5	Bat Foraging Modes	23
2.1.6	Eavesdropping	26
	References	27
3	Non-auditory Defences of Prey Against Bat Predation	31
3.1	Introduction	31
3.1.1	Primary Versus Secondary Defences	31
3.2	Physical Adaptations	32
3.2.1	Size	32
3.2.2	Cryptic Shapes/Texture/Material	33
3.2.3	Body Appendages for Acoustic Diversion	33
3.2.4	Large Eyes	34
3.2.5	Cerci: Detection of Wind from the Wings of Bats	34
3.3	Behavioural Adaptations	35
3.3.1	Timing of Diel Activity	35
3.4	Acoustic Concealment (Crypsis)	36
3.4.1	Timing of Flight, Flight Patterns	36
3.4.2	Acoustic Concealment	36
3.5	Habitat Shifts	38

3.6	Flightlessness	38
3.7	Predator Swamping.	39
	References.	40
4	Passive and Active Acoustic Defences of Prey Against Bat Predation	43
4.1	Evolution of Insect Ears	43
4.2	Primary Acoustic Defence	47
4.2.1	Halting Reproductive Displays	47
4.3	Secondary Acoustic Defence	52
4.3.1	Evasive Flight	52
4.4	The Form of Insect Calling Provides Evidence that These Behaviours Have Evolved in Response to Bat Predation	56
4.5	Moth Ultrasonic Clicks.	57
4.5.1	The Jamming Hypothesis	57
4.5.2	The Startle Hypothesis	60
4.5.3	The Aposematic Hypothesis	60
4.5.4	Moth Clicks: Variability and Function	62
4.5.5	Acoustic Mimicry	64
	References.	65
5	Aerial Warfare: Have Bats and Moths Co-evolved?	73
5.1	Overview	73
5.2	Moth Hearing as a Co-evolved Trait	74
5.2.1	Moth Hearing	74
5.3	Evolution of Bat Countermeasures	78
	References.	84
6	Co-evolution Between Bats and Frogs?	89
6.1	Overview	89
6.2	Audition in Bats and Frogs.	90
6.3	Predator: Detection of Frogs by Bats	91
6.4	Prey: The Frogs' Adaptive Responses to the Detection by Bats.	92
6.4.1	Predator Avoidance Abilities (Pre-detection Primary Defence)	92
6.4.2	Capture Avoidance Strategies (Post-detection Secondary Defence)	94
6.5	Predator: The Bats' Response to Anti-bat Strategies.	97
6.5.1	Adaptive Responses to the Frogs' Anti-bat Strategies.	97
6.5.2	Novel Predator Abilities Enhancing Prey Detection and Capture.	98
6.6	Conclusion	98
	References.	100

7 Synthesis and Future Research	107
7.1 Synthesis	107
7.2 Future Research	109
7.2.1 Hearing and Avoiding Bats by Their Prey	109
7.2.2 Co-evolution Confounded by Sexual Selection	110
7.2.3 Gleaning Bats: Adaptation to Habitat or Co-evolution?	111
7.2.4 Flight Patterns and Echolocation Behaviour as Response to Prey Defence Strategies and the Importance of Knowing the Bats' Diet	112
7.2.5 Some Interesting Areas of Research on Earless Bat Prey	112
7.2.6 Improving the Taxonomic and Geographic Coverage of Bat–Prey Interactions	113
7.2.7 Life-Dinner Principle	114
